TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File No. 000-26719

### MERCANTILE BANK CORPORATION

(Exact name of registrant as specified in its charter)

Michigan  
(State or other jurisdiction of  
incorporation or organization)

38-3360865  
(IRS Employer Identification No.)

**310 Leonard Street, NW, Grand Rapids, MI 49504**

(Address of principal executive offices) (Zip Code)

**(616) 406-3000**

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer   
Non-accelerated filer  Smaller reporting company   
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Yes  No

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

At April 30, 2017, there were 16,465,988 shares of common stock outstanding.

MERCANTILE BANK CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

---

**1. SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Presentation:** The unaudited financial statements for the three months ended March 31, 2017 include the consolidated results of operations of Mercantile Bank Corporation and its consolidated subsidiaries. These subsidiaries include Mercantile Bank of Michigan (“our bank”) and our bank’s two subsidiaries, Mercantile Bank Real Estate Co., LLC (“our real estate company”) and Mercantile Insurance Center, Inc. (“our insurance center”). These consolidated financial statements have been prepared in accordance with the instructions for Form 10-Q and Item 303(b) of Regulation S-K and do not include all disclosures required by accounting principles generally accepted in the United States of America for a complete presentation of our financial condition and results of operations. In the opinion of management, the information reflects all adjustments (consisting only of normal recurring adjustments) which are necessary in order to make the financial statements not misleading and for a fair presentation of the results of operations for such periods. The results for the period ended March 31, 2017 should not be considered as indicative of results for a full year. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2016.

We have five separate business trusts that were formed to issue trust preferred securities. Subordinated debentures were issued to the trusts in return for the proceeds raised from the issuance of the trust preferred securities. The trusts are not consolidated, but instead we report the subordinated debentures issued to the trusts as a liability.

**Earnings Per Share:** Basic earnings per share is based on the weighted average number of common shares and participating securities outstanding during the period. Diluted earnings per share include the dilutive effect of additional potential common shares issuable under our stock-based compensation plans and are determined using the treasury stock method. Our unvested restricted shares, which contain non-forfeitable rights to dividends whether paid or accrued (i.e., participating securities), are included in the number of shares outstanding for both basic and diluted earnings per share calculations. In the event of a net loss, our unvested restricted shares are excluded from the calculation of both basic and diluted earnings per share.

Approximately 225,000 unvested restricted shares were included in determining both basic and diluted earnings per share for the three months ended March 31, 2017. In addition, stock options for approximately 34,000 shares of common stock were included in determining diluted earnings per share for the three months ended March 31, 2017. Stock options for approximately 7,000 shares of common stock were antidilutive and not included in determining diluted earnings per share for the three months ended March 31, 2017.

Approximately 150,000 unvested restricted shares were included in determining both basic and diluted earnings per share for the three months ended March 31, 2016. In addition, stock options for approximately 118,000 shares of common stock were included in determining diluted earnings per share for the three months ended March 31, 2016. Stock options for approximately 10,000 shares of common stock were antidilutive and not included in determining diluted earnings per share for the three months ended March 31, 2016.

---

(Continued)

MERCANTILE BANK CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

---

1. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

**Securities:** Debt securities classified as held to maturity are carried at amortized cost when management has the positive intent and ability to hold them to maturity. Debt securities are classified as available for sale when they might be sold prior to maturity. Equity securities with readily determinable fair values are classified as available for sale. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax. Federal Home Loan Bank stock is carried at cost.

Interest income includes amortization of purchase premiums and accretion of discounts. Premiums and discounts on securities are amortized or accreted on the level-yield method without anticipating prepayments, except for mortgage-backed securities where prepayments are anticipated. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

Declines in the fair value of debt securities below their amortized cost that are other than temporary (“OTTI”) are reflected in earnings or other comprehensive income, as appropriate. For those debt securities whose fair value is less than their amortized cost, we consider our intent to sell the security, whether it is more likely than not that we will be required to sell the security before recovery and whether we expect to recover the entire amortized cost of the security based on our assessment of the issuer’s financial condition. In analyzing an issuer’s financial condition, we consider whether the securities are issued by the federal government or its agencies, and whether downgrades by bond rating agencies have occurred. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do not meet the aforementioned criteria, the amount of impairment is split into two components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement, and 2) OTTI related to other factors, such as liquidity conditions in the market or changes in market interest rates, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost.

**Loans:** Loans that we have the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of deferred loan fees and costs and an allowance for loan losses. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method without anticipating prepayments.

Interest income on commercial loans and mortgage loans is discontinued at the time the loan is 90 days delinquent unless the loan is well-secured and in process of collection. Consumer and credit card loans are typically charged off no later than when they are 120 days past due. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal and interest is considered doubtful.

All interest accrued but not received for loans placed on nonaccrual is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

---

MERCANTILE BANK CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

---

1. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

**Loans Held for Sale:** Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market, as determined by outstanding commitments from investors. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings. As of March 31, 2017 and December 31, 2016, we determined that the fair value of our mortgage loans held for sale approximated the recorded cost of \$1.9 million and \$1.0 million, respectively. Loans held for sale are reported as part of our total loans on the balance sheet.

Mortgage loans held for sale are generally sold with servicing rights retained. Gains and losses on sales of mortgage loans are based on the difference between the selling price and the carrying value of the related loan sold, which is reduced by the cost allocated to the servicing right. We generally lock in the sale price to the purchaser of the loan at the same time we make a rate commitment to the borrower. These mortgage banking activities are not designated as hedges and are carried at fair value. The net gain or loss on mortgage banking derivatives is included in the gain on sale of loans. Mortgage loans serviced for others totaled approximately \$603 million as of March 31, 2017.

**Mortgage Banking Activities:** Mortgage loan servicing rights are recognized as assets based on the allocated value of retained servicing rights on mortgage loans sold. Mortgage loan servicing rights are carried at the lower of amortized cost or fair value and are expensed in proportion to, and over the period of, estimated net servicing revenues. Impairment is evaluated based on the fair value of the rights using groupings of the underlying mortgage loans as to interest rates. Any impairment of a grouping is reported as a valuation allowance.

Servicing fee income is recorded for fees earned for servicing mortgage loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. Amortization of mortgage loan servicing rights is netted against mortgage loan servicing income and recorded in mortgage banking activities in the income statement.

**Troubled Debt Restructurings:** A loan is accounted for as a troubled debt restructuring if we, for economic or legal reasons, grant a concession to a borrower considered to be experiencing financial difficulties that we would not otherwise consider. A troubled debt restructuring may involve the receipt of assets from the debtor in partial or full satisfaction of the loan, or a modification of terms such as a reduction of the stated interest rate or balance of the loan, a reduction of accrued interest, an extension of the maturity date or renewal of the loan at a stated interest rate lower than the current market rate for a new loan with similar risk, or some combination of these concessions. Troubled debt restructurings can be in either accrual or nonaccrual status. Nonaccrual troubled debt restructurings are included in nonperforming loans. Accruing troubled debt restructurings are generally excluded from nonperforming loans as it is considered probable that all contractual principal and interest due under the restructured terms will be collected.

In accordance with current accounting guidance, loans modified as troubled debt restructurings are, by definition, considered to be impaired loans. Impairment for these loans is measured on a loan-by-loan basis similar to other impaired loans as described below under "Allowance for Loan Losses." Certain loans modified as troubled debt restructurings may have been previously measured for impairment under a general allowance methodology (i.e., pooling), thus at the time the loan is modified as a troubled debt restructuring the allowance will be impacted by the difference between the results of these two measurement methodologies. Loans modified as troubled debt restructurings that subsequently default are factored into the determination of the allowance in the same manner as other defaulted loans.

1. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

**Allowance for Loan Losses:** The allowance for loan losses (“allowance”) is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when we believe the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. We estimate the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in our judgment, should be charged-off.

A loan is considered to be impaired when, based on current information and events, it is probable we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. We determine the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of delay, the reasons for delay, the borrower’s prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan’s effective interest rate, the loan’s obtainable market price or the fair value of collateral if the loan is collateral dependent.

**Derivatives:** Derivative financial instruments are recognized as assets or liabilities at fair value. The accounting for changes in the fair value of derivatives depends on the use of the derivatives and whether the derivatives qualify for hedge accounting. Used as part of our asset and liability management to help manage interest rate risk, our derivatives have generally consisted of interest rate swap agreements that qualified for hedge accounting. In February 2012, we entered into an interest rate swap agreement that qualifies for hedge accounting. The current outstanding interest rate swap is discussed in more detail in Note 9. We do not use derivatives for trading purposes.

Changes in the fair value of derivatives that are designated, for accounting purposes, as a hedge of the variability of cash flows to be received on various assets and liabilities and are effective are reported in other comprehensive income. They are later reclassified into earnings in the same periods during which the hedged transaction affects earnings and are included in the line item in which the hedged cash flows are recorded. If hedge accounting does not apply, changes in the fair value of derivatives are recognized immediately in current earnings as interest income or expense.

If designated as a hedge, we formally document the relationship between derivatives as hedged items, as well as the risk-management objective and the strategy for undertaking hedge transactions. This documentation includes linking cash flow hedges to specific assets and liabilities on the balance sheet. If designated as a hedge, we also formally assess, both at the hedge’s inception and on an ongoing basis, whether the derivative instruments that are used are highly effective in offsetting changes in cash flows of the hedged items. Ineffective hedge gains and losses are recognized immediately in current earnings as noninterest income or expense. We discontinue hedge accounting when we determine the derivative is no longer effective in offsetting changes in the cash flows of the hedged item, the derivative is settled or terminates, or treatment of the derivative as a hedge is no longer appropriate or intended.

1. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

**Goodwill and Core Deposit Intangible:** Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified. A more frequent assessment is performed should events or changes in circumstances indicate the carrying value of the goodwill may not be recoverable. We may elect to perform a qualitative assessment for the annual impairment test. If the qualitative assessment indicates it is more likely than not that the fair value of a reporting unit is less than its carrying amount, or if we elect not to perform a qualitative assessment, then we would be required to perform a quantitative test for goodwill impairment. The quantitative test is a two-step process consisting of comparing the carrying value of the reporting unit to an estimate of its fair value. If the estimated fair value of the reporting unit is less than the carrying value, goodwill is impaired and is written down to its estimated fair value. In 2015 and 2016, we elected to perform a qualitative assessment for our annual impairment test and concluded it is more likely than not our fair value was greater than its carrying amount; therefore, no further testing was required.

The core deposit intangible that arose from the Firstbank Corporation acquisition was initially measured at fair value and is being amortized into noninterest expense over a ten-year period using the sum-of-the-years-digits methodology.

**Adoption of New Accounting Standards:** In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*. This ASU establishes a comprehensive revenue recognition standard for virtually all industries under U.S. GAAP, including those that previously followed industry-specific guidance such as the real estate, construction and software industries. The revenue standard's core principle is built on the contract between a vendor and a customer for the provision of goods and services. It attempts to depict the exchange of rights and obligations between the parties in the pattern of revenue recognition based on the consideration to which the vendor is entitled. To accomplish this objective, the standard requires five basic steps: i) identify the contract with the customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract, and (v) recognize revenue when (or as) the entity satisfies a performance obligation. This ASU was originally effective for annual and interim periods beginning after December 15, 2016, with three transition methods available – full retrospective, retrospective and cumulative effect approach. In August 2015, the FASB issued ASU 2015-14, *Revenue from Contracts with Customers – Deferral of Effective Date*, which delays the implementation of this guidance by one year. Adoption of this ASU is not expected to have a material effect on our financial position or results of operations.

In January 2016, the FASB issued ASU 2016-1, *Recognition and Measurement of Financial Assets and Financial Liabilities*. This ASU requires an entity to (i) measure equity investments at fair value through net income, with certain exceptions; (ii) present in OCI the changes in instrument-specific credit risk for financial liabilities measured using the fair value option; (iii) present financial assets and financial liabilities by measurement category and form of financial asset; (iv) calculate the fair value of financial instruments for disclosure purposes based on an exit price; and (v) assess a valuation allowance on deferred tax assets related to unrealized losses on available for sale debt securities in combination with other deferred tax assets. This ASU provides an election to subsequently measure certain nonmarketable equity investments at cost less any impairment and adjusted for certain observable price changes. This ASU also requires a qualitative impairment assessment of such equity investments and amends certain fair value disclosure requirements. The amendments are effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017, and are not expected to have a material effect on our financial position or results of operations when adopted.

1. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

In February 2016, the FASB issued ASU 2016-02, *Leases*. This ASU establishes a right-of-use (“ROU”) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The ASU is effective for annual and interim periods beginning after December 15, 2018. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. Adoption of this ASU is not expected to have a material effect on our financial position or results of operations.

In March 2016, the FASB issued ASU 2016-09, *Compensation – Stock Compensation: Improvements to Employee Share-Based Payment Accounting*. This ASU requires that, prospectively, all tax effects related to share-based payments be made through the income statement at the time of settlement as opposed to excess tax benefits being recognized in additional paid-in capital under the current guidance. The ASU also removes the requirement to delay recognition of a tax benefit until it reduces current taxes payable. This change is required to be applied on a modified retrospective basis, with a cumulative-effect adjustment to opening retained earnings. Additionally, all tax related cash flows resulting from share-based payments are to be reported as operating activities on the statement of cash flows, a change from the current requirement to present tax benefits as an inflow from financing activities and an outflow from operating activities. Finally, entities will be allowed to withhold an amount up to the employees’ maximum individual tax rate (as opposed to the minimum statutory tax rate) in the relevant jurisdiction without resulting in liability classification of the award. The change in withholding requirements will be applied on a modified retrospective approach. This standard will be effective for annual and interim periods beginning after December 15, 2016. Adoption of this ASU did not have a material effect on our financial position or results of operations.

In June 2016, the FASB issued ASU No. 2016-13, *Measurement of Credit Losses on Financial Instruments*. This ASU significantly changes how entities will measure credit losses for most financial assets and certain other instruments that are not measured at fair value through net income. The standard will replace the current “incurred loss” approach with an “expected loss” model. The new model, referred to as the current expected credit loss (“CECL”) model, will apply to: (i) financial assets subject to credit losses and measured at amortized cost, and (ii) certain off-balance sheet credit exposures. This includes, but is not limited to, loans, leases, held-to-maturity securities, loan commitments and financial guarantees. The ASU also simplifies the accounting model for purchased credit-impaired debt securities and loans, and expands the disclosure requirements regarding an entity’s assumptions, models, and methods for estimating the allowance for loan and lease losses. In addition, entities will need to disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. This ASU is effective for interim and annual reporting periods beginning after December 15, 2019, and early adoption is permitted for interim and annual reporting periods beginning after December 15, 2018. Entities will apply the standard’s provisions as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (i.e., modified retrospective approach). We are currently evaluating the provisions of this ASU to determine the potential impact the new standard will have on our consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. This ASU will make eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows and is effective for fiscal years beginning after December 15, 2017. The new standard will require adoption on a retrospective basis unless it is impractical to apply, in which case it would be required to apply the amendments prospectively as of the earliest date practicable. We are currently evaluating the provisions of this ASU to determine the potential impact the new standard will have on our consolidated financial statements.

**1. SIGNIFICANT ACCOUNTING POLICIES** (Continued)

In January 2017, the FASB issued ASU No. 2017-04, *Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment*. This ASU simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. Under this ASU, an entity should perform the Step 1 annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying value. If the carrying amount exceeds the fair value, an entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, not to exceed the total amount of goodwill allocated to that reporting unit. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. This ASU is effective January 1, 2020 and early adoption is permitted. The ASU should be applied prospectively. Adoption of this ASU is not expected to have a material effect on our financial position or results of operations.

In March 2017, the FASB issued ASU No. 2017-08, *Premium Amortization on Purchased Callable Debt Securities*. This ASU requires the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. Previously, entities were allowed to amortize to contractual maturity or to call date. This ASU is effective for annual reporting periods beginning after December 15, 2018, and early adoption is permitted. We are currently evaluating the provisions of this ASU to determine the potential impact the new standard will have on our consolidated financial statements.

**2. SECURITIES**

The amortized cost and fair value of available for sale securities and the related pre-tax gross unrealized gains and losses recognized in accumulated other comprehensive income are as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
<u>March 31, 2017</u>				
U.S. Government agency debt obligations	\$ 162,923,000	\$ 73,000	\$ (6,985,000)	\$ 156,011,000
Mortgage-backed securities	43,525,000	472,000	(293,000)	43,704,000

MERCANTILE BANK CORPORATION  
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
 (Unaudited)

2. **SECURITIES** (Continued)

We evaluate securities for other-than-temporary impairment at least on a quarterly basis. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability we have to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. For those debt securities whose fair value is less than their amortized cost basis, we also consider our intent to sell the security, whether it is more likely than not that we will be required to sell the security before recovery and if we do not expect to recover the entire amortized cost basis of the security. In analyzing an issuer's financial condition, we may consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred and the results of reviews of the issuer's financial condition.

At March 31, 2017, 316 debt securities and one mutual fund with fair values totaling \$221 million have unrealized losses aggregating \$8.6 million. After we considered whether the securities were issued by the federal government or its agencies and whether downgrades by bond rating agencies had occurred, we determined that the unrealized losses were due to changing interest rate environments. As we do not intend to sell our debt securities before recovery of their cost basis and we believe it is more likely than not that we will not be required to sell our debt securities before recovery of the cost basis, no unrealized losses are deemed to be other-than-temporary.

The amortized cost and fair value of debt securities at March 31, 2017, by maturity, are shown in the following table. The contractual maturity is utilized for U.S. Government agency debt obligations and municipal bonds. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Securities not due at a single maturity date, primarily mortgage-backed securities, are shown separately. Weighted average yields are also reflected, with yields for municipal securities shown at their tax equivalent yield.

	Weighted Average Yield (%)	Amortized Cost	Fair Value
Due in 2017	1.45	\$ 30,644,000	\$ 30,670,000
Due in 2018 through 2022	2.24	97,092,000	97,132,000
Due in 2023 through 2027	2.68	93,216,000	90,060,000
Due in 2028 and beyond	2.84	73,501,000	68,918,000
Mortgage-backed securities	1.85	43,525,000	43,704,000
Other investments	0.65	1,986,000	1,957,000
Total available for sale securities	2.36	<u>\$ 339,964,000</u>	<u>\$ 332,441,000</u>

**2. SECURITIES** (Continued)

Securities issued by the State of Michigan and all its political subdivisions had a combined amortized cost of \$113 million and \$109 million at March 31, 2017 and December 31, 2016, respectively, with estimated market values of \$112 million and \$107 million, respectively. Securities issued by all other states and their political subdivisions had a combined amortized cost of \$18.7 million and \$19.5 million at March 31, 2017 and December 31, 2016, respectively, with estimated market values of \$18.8 million and \$19.5 million, respectively. Total securities of any other specific issuer, other than the U.S. Government and its agencies and the State of Michigan and all its political subdivisions, did not exceed 10% of shareholders' equity.

The carrying value of U.S. Government agency debt obligations and mortgage-backed securities that are pledged to secure repurchase agreements was \$127 million and \$132 million at March 31, 2017 and December 31, 2016, respectively. Investments in Federal Home Loan Bank stock are restricted and may only be resold or redeemed by the issuer.

**3. LOANS AND ALLOWANCE FOR LOAN LOSSES**

Loans originated for investment are stated at their principal amount outstanding adjusted for partial charge-offs, the allowance, and net deferred loan fees and costs. Interest income on loans is accrued over the term of the loans primarily using the simple interest method based on the principal balance outstanding. Interest is not accrued on loans where collectability is uncertain. Accrued interest is presented separately in the consolidated balance sheet. Loan origination fees and certain direct costs incurred to extend credit are deferred and amortized over the term of the loan or loan commitment period as an adjustment to the related loan yield.

Acquired loans are those purchased in the Firstbank merger. These loans were recorded at estimated fair value at the merger date with no carryover of the related allowance. The acquired loans were segregated between those considered to be performing ("acquired non-impaired loans") and those with evidence of credit deterioration ("acquired impaired loans"). Acquired loans are considered impaired if there is evidence of credit deterioration and if it is probable, at acquisition, all contractually required payments will not be collected. Acquired loans restructured after acquisition are not considered or reported as troubled debt restructurings if the loans evidenced credit deterioration as of the merger date and are accounted for in pools.

The fair value estimates for acquired loans are based on expected prepayments and the amount and timing of discounted expected principal, interest and other cash flows. Credit discounts representing the principal losses expected over the life of the loan are also a component of the initial fair value. In determining the merger date fair value of acquired impaired loans, and in subsequent accounting, we have generally aggregated acquired commercial and consumer loans into pools of loans with common risk characteristics.

The difference between the fair value of an acquired non-impaired loan and contractual amounts due at the merger date is accreted into income over the estimated life of the loan. Contractually required payments represent the total undiscounted amount of all uncollected principal and interest payments. Acquired non-impaired loans are placed on nonaccrual status and reported as nonperforming or past due using the same criteria applied to the originated loan portfolio.

---

MERCANTILE BANK CORPORATION  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

---

**3. LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

The excess of an acquired impaired loan's undiscounted contractually required payments over the amount of its undiscounted cash flows expected to be collected is referred to as the non-accretable difference. The non-accretable difference, which is neither accreted into income nor recorded on the consolidated balance sheet, reflects estimated future credit losses and uncollectible contractual interest expected to be incurred over the life of the acquired impaired loan. The excess cash flows expected to be collected over the carrying amount of the acquired loan is referred to as the accretable yield. This amount is accreted into interest income over the remaining life of the acquired loans or pools using the level yield method. The accretable yield is affected by changes in interest rate indices for variable rate loans, changes in prepayment speed assumptions and changes in expected principal and interest payments over the estimated lives of the acquired impaired loans.

We evaluate quarterly the remaining contractual required payments receivable and estimate cash flows expected to be collected over the lives of the impaired loans. Contractually required payments receivable may increase or decrease for a variety of reasons, for example, when the contractual terms of the loan agreement are modified, when interest rates on variable rate loans change, or when principal and/or interest payments are received. Cash flows expected to be collected on acquired impaired loans are estimated by incorporating several key assumptions similar to the initial estimate of fair value. These key assumptions include probability of default, loss given default, and the amount of actual prepayments after the merger date. Prepayments affect the estimated lives of loans and could change the amount of interest income, and possibly principal, expected to be collected. In re-forecasting future estimated cash flows, credit loss expectations are adjusted as necessary. The adjustments are based, in part, on actual loss severities recognized for each loan type, as well as changes in the probability of default. For periods in which estimated cash flows are not re-forecasted, the prior reporting period's estimated cash flows are adjusted to reflect the actual cash received and credit events that transpired during the current reporting period.

Increases in expected cash flows of acquired impaired loans subsequent to the merger date are recognized prospectively through adjustments of the yield on the loans or pools over their remaining lives, while decreases in expected cash flows are recognized as impairment through a provision for loan losses and an increase in the allowance.

**3. LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

The total contractually required payments due on and carrying value of acquired impaired loans were \$14.9 million and \$6.0 million, respectively, as of March 31, 2017. The total contractually required payments due on and carrying value of acquired impaired loans were \$15.5 million and \$6.2 million, respectively, as of December 31, 2016. Changes in the accretible yield for acquired impaired loans for the three months ended March 31, 2017 and March 31, 2016 were as follows:

Balance at December 31, 2016	\$	1,726,000
Additions		1,000
Accretion income		(147,000)
Net reclassification from nonaccretible to accretible		63,000
Reductions (1)		<u>(179,000)</u>
Balance at March 31, 2017	\$	<u>1,464,000</u>
Balance at December 31, 2015	\$	5,193,000
Additions		21,000
Accretion income		(680,000)
Net reclassification from nonaccretible to accretible		2,372,000
Reductions (1)		<u>(587,000)</u>
Balance at March 31, 2016	\$	<u>6,319,000</u>

(1) Reductions primarily reflect the result of exit events, including loan payoffs and charge-offs.

Nonperforming originated loans as of March 31, 2017 and December 31, 2016 were as follows:

	March 31, 2017	December 31, 2016
Loans past due 90 days or more still accruing interest	\$ 0	\$ 0
Nonaccrual loans	<u>4,716,000</u>	<u>3,328,000</u>
Total nonperforming originated loans	<u>\$ 4,716,000</u>	<u>\$ 3,328,000</u>

Nonperforming acquired loans as of March 31, 2017 and December 31, 2016 were as follows:

	March 31, 2017	December 31, 2016
Loans past due 90 days or more still accruing interest	\$ 0	\$ 0
Nonaccrual loans	<u>2,576,000</u>	<u>2,611,000</u>
Total nonperforming acquired loans	<u>\$ 2,576,000</u>	<u>\$ 2,611,000</u>

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

The recorded principal balance of nonperforming loans was as follows:

	March 31, 2017	December 31, 2016
<b>Commercial:</b>		
Commercial and industrial	\$ 3,073,000	\$ 2,296,000
Vacant land, land development, and residential construction	80,000	95,000
Real estate – owner occupied	911,000	285,000
Real estate – non-owner occupied	421,000	488,000
Real estate – multi-family and residential rental	163,000	17,000
Total commercial	<u>4,648,000</u>	<u>3,181,000</u>
<b>Retail:</b>		
Home equity and other	407,000	496,000
1-4 family mortgages	2,237,000	2,262,000
Total retail	<u>2,644,000</u>	<u>2,758,000</u>
Total nonperforming loans	<u>\$ 7,292,000</u>	<u>\$ 5,939,000</u>

Acquired impaired loans are not reported as nonperforming loans based on acquired impaired loan accounting. Acquired non-impaired loans are placed on nonaccrual status and reported as nonperforming or past due using the same criteria applied to the originated loan portfolio.

Total impaired loans	<u>\$ 6,065,000</u>	<u>\$ 5,133,000</u>	<u>\$ 9,000</u>	<u>\$ 6,684,000</u>

Impaired loans for which no allocation of the allowance for loan losses has been made generally reflect situations whereby the loans have been charged-down to estimated collateral value. Interest income recognized on accruing troubled debt restructurings totaled \$0.2 million and \$0.3 million during the first quarter of 2017 and 2016, respectively. No interest income was recognized on nonaccrual loans during either the first quarter of 2017 or 2016. Lost interest income on nonaccrual loans totaled \$0.1 million and \$0.2 million during the first quarter of 2017 and 2016, respectively.

**3. LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

*Credit Quality Indicators.* We utilize a comprehensive grading system for our commercial loans. All commercial loans are graded on a ten grade rating system. The rating system utilizes standardized grade paradigms that analyze several critical factors such as cash flow, operating performance, financial condition, collateral, industry condition and management. All commercial loans are graded at inception and reviewed and, if appropriate, re-graded at various intervals thereafter. The risk assessment for retail loans is primarily based on the type of collateral.

Credit quality indicators were as follows as of March 31, 2017:

**Originated loans**

Commercial credit exposure – credit risk profiled by internal credit risk grades:

	<u>Commercial and Industrial</u>	<u>Commercial Vacant Land, Land Development, and Residential Construction</u>	<u>Commercial Real Estate - Owner Occupied</u>	<u>Commercial Real Estate - Non-Owner Occupied</u>	<u>Commercial Real Estate - Multi-Family and Residential Rental</u>
<b>Internal credit risk grade groupings:</b>					
Grades 1 – 4	\$ 471,570,000	\$ 14,994,000	\$ 266,147,000	\$ 553,441,000	\$ 29,421,000
Grades 5 – 7	206,434,000	8,767,000	100,967,000	124,918,000	16,925,000
Grades 8 – 9	7,223,000	80,000	1,796,000	0	726,000
<b>Total commercial</b>	<b><u>\$ 685,227,000</u></b>	<b><u>\$ 23,841,000</u></b>	<b><u>\$ 368,910,000</u></b>	<b><u>\$ 678,359,000</u></b>	<b><u>\$ 47,072,000</u></b>

Retail credit exposure – credit risk profiled by collateral type:

	<u>Retail Home Equity and Other</u>	<u>Retail 1-4 Family Mortgages</u>
<b>Total retail</b>	<b><u>\$ 69,032,000</u></b>	<b><u>\$ 101,298,000</u></b>

**3. LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

All commercial loans are graded using the following criteria:

- Grade 1. Excellent credit rating that contain very little, if any, risk of loss.
- Grade 2. Strong sources of repayment and have low repayment risk.
- Grade 3. Good sources of repayment and have limited repayment risk.
- Grade 4. Adequate sources of repayment and acceptable repayment risk; however, characteristics are present that render the credit more vulnerable to a negative event.
- Grade 5. Marginally acceptable sources of repayment and exhibit defined weaknesses and negative characteristics.
- Grade 6. Well defined weaknesses which may include negative current cash flow, high leverage, or operating losses. Generally, if the credit does not stabilize or if further deterioration is observed in the near term, the loan will likely be downgraded and placed on the Watch List (i.e., list of lending relationships that receive increased scrutiny and review by the Board of Directors and senior management).
- Grade 7. Defined weaknesses or negative trends that merit close monitoring through Watch List status.
- Grade 8. Inadequately protected by current sound net worth, paying capacity of the obligor, or pledged collateral, resulting in a distinct possibility of loss requiring close monitoring through Watch List status.
- Grade 9. Vital weaknesses exist where collection of principal is highly questionable.
- Grade 10. Considered uncollectable and of such little value that continuance as an asset is not warranted.

The primary risk elements with respect to commercial loans are the financial condition of the borrower, the sufficiency of collateral, and timeliness of scheduled payments. We have a policy of requesting and reviewing periodic financial statements from commercial loan customers and employ a disciplined and formalized review of the existence of collateral and its value. The primary risk element with respect to each residential real estate loan and consumer loan is the timeliness of scheduled payments. We have a reporting system that monitors past due loans and have adopted policies to pursue creditor's rights in order to preserve our collateral position.

---

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

Activity in the allowance for loan losses for acquired loans during the twelve months ended December 31, 2016 is as follows:

	<u>Commercial Loans</u>	<u>Retail Loans</u>	<u>Unallocated</u>	<u>Total</u>
<b>Allowance for loan losses:</b>				
Beginning balance	\$ 420,000	\$ 28,000	\$ 0	\$ 448,000
Provision for loan losses	(303,000)	105,000	0	(198,000)
Charge-offs	0	(72,000)	0	(72,000)
Recoveries	(42,000)	(43,000)	0	(85,000)
Ending balance	<u>\$ 75,000</u>	<u>\$ 18,000</u>	<u>\$ 0</u>	<u>\$ 93,000</u>

The negative loan recoveries reflected for acquired loans during 2016 resulted from reversals of prior-period recoveries associated with certain purchased credit impaired (“PCI”) loans that were subject to pre-acquisition charge-offs. Post-acquisition payments received on these PCI loans were incorrectly reported as loan loss recoveries in prior periods; during the first quarter of 2016, these recoveries were reversed and properly reported as recovery income if associated with specifically reviewed PCI loans or retained gains if associated with PCI-pooled loans.

In accordance with acquisition accounting rules, acquired loans were recorded at fair value at the merger date and the prior allowance was eliminated.

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

The allowance related to loans categorized as troubled debt restructurings was as follows:

	March 31, 2017	December 31, 2016
<b>Commercial:</b>		
Commercial and industrial	\$ 2,000	\$ 9,000
Vacant land, land development, and residential construction	13,000	28,000
Real estate – owner occupied	90,000	100,000
Real estate – non-owner occupied	157,000	247,000
Real estate – multi-family and residential rental	99,000	258,000
Total commercial	<u>361,000</u>	<u>642,000</u>
<b>Retail:</b>		
Home equity and other	47,000	48,000
1-4 family mortgages	4,000	4,000
Total retail	<u>51,000</u>	<u>52,000</u>
Total related allowance	<u>\$ 412,000</u>	<u>\$ 694,000</u>

In general, our policy dictates that a renewal or modification of an 8- or 9-rated commercial loan meets the criteria of a troubled debt restructuring, although we review and consider all renewed and modified loans as part of our troubled debt restructuring assessment procedures. Loan relationships rated 8 contain significant financial weaknesses, resulting in a distinct possibility of loss, while relationships rated 9 reflect vital financial weaknesses, resulting in a highly questionable ability on our part to collect principal; we believe borrowers warranting such ratings would have difficulty obtaining financing from other market participants. Thus, due to the lack of comparable market rates for loans with similar risk characteristics, we believe 8- or 9-rated loans renewed or modified were done so at below market rates. Loans that are identified as troubled debt restructurings are considered impaired and are individually evaluated for impairment when assessing these credits in our allowance for loan losses calculation.

**4. PREMISES AND EQUIPMENT, NET**

Premises and equipment are comprised of the following:

	March 31, 2017	December 31, 2016
Land and improvements	\$ 17,665,000	\$ 17,285,000
Buildings	39,836,000	39,691,000
Furniture and equipment	17,719,000	17,195,000
	75,220,000	74,171,000
Less: accumulated depreciation	29,372,000	28,715,000
	\$ 45,848,000	\$ 45,456,000

Depreciation expense totaled \$0.7 million during the first quarter of 2017 and 2016.

**5. DEPOSITS**

Our total deposits at March 31, 2017 totaled \$2.28 billion, a decrease of \$97.0 million, or 4.1%, from December 31, 2016. The components of our outstanding balances at March 31, 2017 and December 31, 2016, and percentage change in deposits from the end of 2016 to the end of the first quarter of 2017, are as follows:

	March 31, 2017		December 31, 2016		Percent Increase (Decrease)
	Balance	%	Balance	%	
Noninterest-bearing demand	\$ 757,706,000	33.3%	\$ 810,600,000	34.1%	(6.5%)
Interest-bearing checking	371,622,000	16.3	377,929,000	15.9	(1.7)
Money market	279,120,000	12.3	272,051,000	11.5	2.6
Savings	355,354,000	15.6	344,988,000	14.5	3.0
Time, under \$100,000	142,454,000	6.2	146,169,000	6.2	(2.5)
Time, \$100,000 and over	326,694,000	14.3	347,058,000	14.6	(5.9)
Total local deposits	2,232,950,000	98.0	2,298,795,000	96.8	(2.9)
Out-of-area time, under \$100,000	0	NA	0	NA	NA
Out-of-area time, \$100,000 and over	45,066,000	2.0	76,190,000	3.2	(40.9)
Total out-of-area deposits	45,066,000	2.0	76,190,000	3.2	(40.9)
Total deposits	\$ 2,278,016,000	100.0%	\$ 2,374,985,000	100.0%	(4.1%)

Time deposits of more than \$250,000 totaled \$201 million and \$178 million at March 31, 2017 and March 31, 2016, respectively.

**6. SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE**

Securities sold under agreements to repurchase (“repurchase agreements”) are offered principally to certain large deposit customers. Information relating to our repurchase agreements follows:

	Three Months Ended March 31, 2017	Twelve Months Ended December 31, 2016
Outstanding balance at end of period	\$ 126,679,000	\$ 131,710,000
Average interest rate at end of period	0.16%	0.16%
Average daily balance during the period	\$ 128,933,000	\$ 149,079,000
Average interest rate during the period	0.16%	0.14%
Maximum daily balance during the period	\$ 142,459,000	\$ 175,088,000

Repurchase agreements generally have original maturities of less than one year. Repurchase agreements are treated as financings and the obligations to repurchase securities sold are reflected as liabilities. Securities involved with the agreements are recorded as assets of our bank and are held in safekeeping by a correspondent bank. Repurchase agreements are secured by securities with an aggregate market value equal to the aggregate outstanding balance.

**7. FEDERAL HOME LOAN BANK OF INDIANAPOLIS ADVANCES**

Federal Home Loan Bank of Indianapolis (“FHLBI”) advances totaled \$205 million at March 31, 2017, and mature at varying dates from May 2017 through April 2024, with fixed rates of interest from 1.04% to 2.39% and averaging 1.59%. FHLBI advances totaled \$175 million at December 31, 2016, and were expected to mature at varying dates ranging from March 2017 through April 2023, with fixed rates of interest from 1.04% to 2.11% and averaging 1.48%.

Each advance is payable at its maturity date and is subject to a prepayment fee if paid prior to the maturity date. The advances are collateralized by residential mortgage loans, first mortgage liens on multi-family residential property loans, first mortgage liens on commercial real estate property loans, and substantially all other assets of our bank, under a blanket lien arrangement. Our borrowing line of credit as of March 31, 2017 totaled about \$541 million, with remaining availability based on collateral approximating \$336 million.

Maturities of currently outstanding FHLBI advances are as follows:

2017	\$ 35,000,000
2018	20,000,000
2019	30,000,000
2020	30,000,000
2021	30,000,000
Thereafter	60,000,000

**8. COMMITMENTS AND OFF-BALANCE SHEET RISK**

Our bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Loan commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Standby letters of credit are conditional commitments issued by our bank to guarantee the performance of a customer to a third party. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized, if any, in the balance sheet. Our bank's maximum exposure to loan loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. Our bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. Collateral, such as accounts receivable, securities, inventory, and property and equipment, is generally obtained based on our credit assessment of the borrower. If required, estimated loss exposure resulting from these instruments is expensed and is generally recorded as a liability. There was no reserve or liability balance for these instruments as of March 31, 2017 and December 31, 2016.

A summary of the contractual amounts of our financial instruments with off-balance sheet risk at March 31, 2017 and December 31, 2016 follows:

	March 31, 2017	December 31, 2016
Commercial unused lines of credit	\$ 533,402,000	\$ 553,345,000
Unused lines of credit secured by 1 – 4 family residential properties	60,122,000	56,275,000
Credit card unused lines of credit	28,140,000	22,689,000
Other consumer unused lines of credit	8,807,000	8,489,000
Commitments to make loans	216,371,000	154,338,000
Standby letters of credit	26,902,000	26,202,000
	<u>\$ 873,744,000</u>	<u>\$ 821,338,000</u>

---

---

**8. COMMITMENTS AND OFF-BALANCE SHEET RISK** (Continued)

Certain of our commercial loan customers have entered into interest rate swap agreements directly with our correspondent banks. To assist our commercial loan customers in these transactions, and to encourage our correspondent banks to enter into the interest rate swap transactions with minimal credit underwriting analyses on their part, we have entered into risk participation agreements with the correspondent banks whereby we agree to make payments to the correspondent banks owed by our commercial loan customers under the interest rate swap agreement in the event that our commercial loan customers do not make the payments. We are not a party to the interest rate swap agreements under these arrangements. As of March 31, 2017, the total notional amount of the underlying interest rate swap agreements was \$13.6 million, with a net fair value from our commercial loan customers' perspective of negative \$1.6 million. These risk participation agreements are considered financial guarantees in accordance with applicable accounting guidance and are therefore recorded as liabilities at fair value, generally equal to the fees collected at the time of their execution. These liabilities are accreted into income during the term of the interest rate swap agreements, generally ranging from four to fifteen years.

**9. HEDGING ACTIVITIES**

Our interest rate risk policy includes guidelines for measuring and monitoring interest rate risk. Within these guidelines, parameters have been established for maximum fluctuations in net interest income. Possible fluctuations are measured and monitored using net interest income simulation. Our policy provides for the use of certain derivative instruments and hedging activities to aid in managing interest rate risk to within the policy parameters.

In February 2012, we entered into an interest rate swap agreement with a correspondent bank to hedge the floating rate on our subordinated debentures, which became effective in January 2013 and matures in January 2018. Our \$32.0 million of subordinated debentures have a rate equal to the 90-Day Libor Rate plus a fixed spread of 218 basis points, and are subject to repricing quarterly. The interest rate swap agreement provides for us to pay our correspondent bank a fixed rate, while our correspondent bank will pay us the 90-Day Libor Rate on a \$32.0 million notional amount. The quarterly re-set dates for the floating rate on the interest rate swap agreement are the same as the re-set dates for the floating rate on the subordinated debentures. The interest rate swap agreement does qualify for hedge accounting; therefore, monthly fluctuations in the present value of the interest rate swap agreement, net of tax effect, are recorded to other comprehensive income. As of March 31, 2017 and December 31, 2016, the fair value of the interest rate swap agreement was recorded as a liability in the amount of less than \$0.1 million.

Effective January 26, 2016, the notional amount of the interest rate swap agreement was reduced from \$32.0 million down to \$21.0 million, reflecting the \$11.0 million repurchase of the associated trust preferred securities on that date. We reclassified out of accumulated other comprehensive income and recorded interest expense of approximately \$0.2 million in January 2016 as part of the transaction, reflecting the market value (i.e., present value of expected future cash flows) of the interest rate swap on that date of the \$11.0 million portion.

**10. FAIR VALUES OF FINANCIAL INSTRUMENTS**

The carrying amounts, estimated fair values and level within the fair value hierarchy of financial instruments were as follows as of March 31, 2017 and December 31, 2016 (dollars in thousands):

	Level in Fair Value Hierarchy	March 31, 2017		December 31, 2016	
		Carrying Values	Fair Values	Carrying Values	Fair Values
<b>Financial assets:</b>					
Cash	Level 1	\$ 11,279	\$ 11,279	\$ 11,493	\$ 11,493
Cash equivalents	Level 2	41,697	41,697	172,103	172,103
Securities available for sale	(1)	332,441	332,441	328,060	328,060
FHLBI stock	(2)	9,236	9,236	8,026	8,026
Loans, net	Level 3	2,421,111	2,410,034	2,359,624	2,353,276
Loans held for sale	Level 2	1,927	1,927	1,035	1,035
Bank owned life insurance	Level 2	66,211	66,211	67,198	67,198
Accrued interest receivable	Level 2	8,542	8,542	7,714	7,714
<b>Financial liabilities:</b>					
Deposits	Level 2	2,278,016	2,181,344	2,374,985	2,286,548
Repurchase agreements	Level 2	126,679	126,679	131,710	131,710
FHLBI advances	Level 2	205,000	204,156	175,000	174,734
Subordinated debentures	Level 2	45,006	45,392	44,835	45,220
Accrued interest payable	Level 2	1,465	1,465	1,592	1,592
Interest rate swap	(1)	42	42	84	84

(1) See Note 11 for a description of the fair value hierarchy as well as a disclosure of levels for classes of financial assets and liabilities.

(2) It is not practical to determine the fair value of FHLBI stock due to transferability restrictions.

Carrying amount is the estimated fair value for cash and cash equivalents, accrued interest receivable and payable, bank owned life insurance, noninterest checking deposits, securities sold under agreements to repurchase, and variable rate loans and deposits that reprice frequently and fully. Security fair values are based on market prices or dealer quotes, and if no such information is available, on the rate and term of the security and information about the issuer. For fixed rate loans and deposits and for variable rate loans and deposits with infrequent repricing or repricing limits, fair value is based on discounted cash flows using current market rates applied to the estimated life and credit risk. Fair value of subordinated debentures and FHLBI advances is based on current rates for similar financing. Fair value of the interest rate swap is determined primarily utilizing market-consensus forecasted yield curves. Fair value of off-balance sheet items is estimated to be nominal.

---

**11. FAIR VALUES**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability, or in the absence of a principal market, the most advantageous market for the asset or liability. The price of the principal (or most advantageous) market used to measure the fair value of the asset or liability is not adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

We are required to use valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from independent sources, or unobservable, meaning those that reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. In that regard, we utilize a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that we have the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be derived from or corroborated by observable market data by correlation or other means.

Level 3: Significant unobservable inputs that reflect our own conclusions about the assumptions that market participants would use in pricing an asset or liability.

**11. FAIR VALUES** (Continued)

The following is a description of our valuation methodologies used to measure and disclose the fair values of our financial assets and liabilities that are recorded at fair value on a recurring or nonrecurring basis:

*Securities available for sale.* Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based on quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models. Level 2 securities include U.S. Government agency bonds, mortgage-backed securities issued or guaranteed by U.S. Government agencies, municipal general obligation and revenue bonds and mutual funds. Level 3 securities include bonds issued by certain relatively small municipalities located within our markets that have very limited marketability due to their size and lack of ratings from a recognized rating service. We carry these bonds at historical cost, which we believe approximates fair value, unless our periodic financial analysis or other information becomes known which necessitates a valuation allowance. There was no such valuation allowance as of March 31, 2017 or December 31, 2016. We have no Level 1 securities available for sale.

*Derivatives.* The interest rate swap is measured at fair value on a recurring basis. We measure fair value utilizing models that use primarily market observable inputs, such as forecasted yield curves, and accordingly, the interest rate swap agreement is classified as Level 2.

*Mortgage loans held for sale.* Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market, as determined by outstanding commitments from investors, and are measured on a nonrecurring basis. Fair value is based on independent quoted market prices, where applicable, or the prices for other mortgage whole loans with similar characteristics. As of March 31, 2017 and December 31, 2016, we determined that the fair value of our mortgage loans held for sale approximated the recorded cost of \$1.9 million and \$1.0 million, respectively.

*Loans.* We do not record loans at fair value on a recurring basis. However, from time to time, we record nonrecurring fair value adjustments to collateral dependent loans to reflect partial write-downs or specific reserves that are based on the observable market price or current estimated value of the collateral. These loans are reported in the nonrecurring table below at initial recognition of impairment and on an ongoing basis until recovery or charge-off.

*Foreclosed Assets.* At time of foreclosure or repossession, foreclosed and repossessed assets are adjusted to fair value less costs to sell upon transfer of the loans to foreclosed and repossessed assets, establishing a new cost basis. We subsequently adjust estimated fair value of foreclosed assets on a nonrecurring basis to reflect write-downs based on revised fair value estimates.

**11. FAIR VALUES** (Continued)

*Assets and Liabilities Measured at Fair Value on a Recurring Basis*

The balances of assets and liabilities measured at fair value on a recurring basis as of March 31, 2017 are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<b>Available for sale securities</b>				
U.S. Government agency debt obligations	\$ 156,011,000	\$ 0	\$ 156,011,000	\$ 0
Mortgage-backed securities	43,704,000	0	43,704,000	0
Municipal general obligation bonds	122,530,000	0	116,131,000	6,399,000
Municipal revenue bonds	8,239,000	0	8,239,000	0
Other investments	1,957,000	0	1,957,000	0
Interest rate swap	(42,000)	0	(42,000)	0
Total	<u>\$ 332,399,000</u>	<u>\$ 0</u>	<u>\$ 326,000,000</u>	<u>\$ 6,399,000</u>

There were no transfers in or out of Level 1, Level 2 or Level 3 during the first three months of 2017.

The balances of assets and liabilities measured at fair value on a recurring basis as of December 31, 2016 are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
<b>Available for sale securities</b>				
U.S. Government agency debt obligations	\$ 152,040,000	\$ 0	\$ 152,040,000	\$ 0
Mortgage-backed securities	47,392,000	0	47,392,000	0
Municipal general obligation bonds	119,047,000	0	112,648,000	6,399,000
Municipal revenue bonds	7,631,000	0	7,631,000	0
Other investments	1,950,000	0	1,950,000	0
Interest rate swap	(84,000)	0	(84,000)	0
Total	<u>\$ 327,976,000</u>	<u>\$ 0</u>	<u>\$ 321,577,000</u>	<u>\$ 6,399,000</u>

There were no transfers in or out of Level 1, Level 2 or Level 3 during 2016.

**11. FAIR VALUES** (Continued)

*Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis*

The balances of assets and liabilities measured at fair value on a nonrecurring basis as of March 31, 2017 are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 8,119,000	\$ 0	\$ 0	\$ 8,119,000
Foreclosed assets	495,000	0	0	495,000
Total	<u>\$ 8,614,000</u>	<u>\$ 0</u>	<u>\$ 0</u>	<u>\$ 8,614,000</u>

The balances of assets and liabilities measured at fair value on a nonrecurring basis as of December 31, 2016 are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 9,896,000	\$ 0	\$ 0	\$ 9,896,000
Foreclosed assets	469,000	0	0	469,000
Total	<u>\$ 10,365,000</u>	<u>\$ 0</u>	<u>\$ 0</u>	<u>\$ 10,365,000</u>

The carrying values are based on the estimated value of the property or other assets. Fair value estimates of collateral on impaired loans and foreclosed assets are reviewed periodically. Our credit policies establish criteria for obtaining appraisals and determining internal value estimates. We may also adjust outside appraisals and internal evaluations based on identifiable trends within our markets, such as sales of similar properties or assets, listing prices and offers received. In addition, we may discount certain appraised and internal value estimates to address current distressed market conditions. For real estate dependent loans and foreclosed assets, we generally assign a 15% to 25% discount factor for commercial-related properties, and a 25% to 50% discount factor for residential-related properties. In a vast majority of cases, we assign a 10% discount factor for estimated selling costs.

**12. REGULATORY MATTERS**

We are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on our financial statements.

The prompt corrective action regulations provide five classifications, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If an institution is not well capitalized, regulatory approval is required to accept brokered deposits. Subject to limited exceptions, no institution may make a capital distribution if, after making the distribution, it would be undercapitalized. If an institution is undercapitalized, it is subject to close monitoring by its principal federal regulator, its asset growth and expansion are restricted, and plans for capital restoration are required. In addition, further specific types of restrictions may be imposed on the institution at the discretion of the federal regulator. At March 31, 2017 and December 31, 2016, our bank was in the well capitalized category under the regulatory framework for prompt corrective action. There are no conditions or events since March 31, 2017 that we believe have changed our bank's categorization.

Our actual capital levels (dollars in thousands) and the minimum levels required to be categorized as adequately and well capitalized were:

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required to be Well Capitalized Under Prompt Corrective Action Regulations	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
<b>March 31, 2017</b>

	Amount	Ratio	Amount	Ratio	Amount	Ratio
<b>December 31, 2016</b>						
Total capital (to risk weighted assets)						
Consolidated	\$ 354,278	13.1%	\$ 215,819	8.0%	NA	NA
Bank	353,243	13.1	215,605	8.0	269,506	10.0%
Tier 1 capital (to risk weighted assets)						
Consolidated	336,316	12.5	161,864	6.0	NA	NA
Bank	335,282	12.4	161,704	6.0	215,605	8.0
Common equity tier 1 (to risk weighted assets)						
Consolidated	293,555	10.9	121,398	4.5	NA	NA
Bank	335,282	12.4	121,278	4.5	175,179	6.5
Tier 1 capital (to average assets)						
Consolidated	336,316	11.2	120,486	4.0	NA	NA
Bank	335,282	11.1	120,383	4.0	150,479	5.0

Our consolidated capital levels as of March 31, 2017 and December 31, 2016 include \$42.9 million and \$42.8 million, respectively, of trust preferred securities subject to certain limitations. Under applicable Federal Reserve guidelines, the trust preferred securities constitute a restricted core capital element. The guidelines provide that the aggregate amount of restricted core elements that may be included in our Tier 1 capital must not exceed 25% of the sum of all core capital elements, including restricted core capital elements, net of goodwill less any associated deferred tax liability. Our ability to include the trust preferred securities in Tier 1 capital in accordance with the guidelines is not affected by the provision of the Dodd-Frank Act generally restricting such treatment, because (i) the trust preferred securities were issued before May 19, 2010, and (ii) our total consolidated assets as of December 31, 2009 were less than \$15.0 billion. As of March 31, 2017 and December 31, 2016, all \$42.9 million and \$42.8 million, respectively, of the trust preferred securities were included in our consolidated Tier 1 capital.

Under the final BASEL III capital rules that became effective on January 1, 2015, there is a requirement for a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do not meet this required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in cash dividends or used for stock repurchases and on the payment of discretionary bonuses to senior executive management. The capital buffer requirement is being phased in over three years beginning in 2016. The capital buffer requirement effectively raises the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5% and the total capital ratio to 10.5% on a fully phased-in basis on January 1, 2019. We believe that, as of March 31, 2017, our bank would meet all capital adequacy requirements under the BASEL III capital rules on a fully phased-in basis as if all such requirements were currently in effect.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

---

**12. REGULATORY MATTERS** (Continued)

Our and our bank's ability to pay cash and stock dividends is subject to limitations under various laws and regulations and to prudent and sound banking practices. On January 12, 2017, our Board of Directors declared a cash dividend on our common stock in the amount of \$0.18 per share that was paid on March 22, 2017 to shareholders of record as of March 10, 2017. On April 13, 2017, our Board of Directors declared a cash dividend on our common stock in the amount of \$0.18 per share that will be paid on June 21, 2017 to shareholders of record as of June 9, 2017.

On January 30, 2015, we announced that our Board of Directors had authorized a new program to repurchase up to \$20.0 million of our common stock from time to time in open market transactions at prevailing market prices or by other means in accordance with applicable regulations. On April 19, 2016, we announced a \$15.0 million expansion of the stock repurchase plan. Since inception, we have purchased a total of 956,419 shares at a total price of \$19.5 million, at an average price per share of \$20.38; no shares were purchased under the authorized plan during the first three months of 2017. The stock buybacks have been funded from cash dividends paid to us from our bank. Additional repurchases may be made in future periods under the authorized plan, which would also likely be funded from cash dividends paid to us from our bank.

On January 26, 2016, we closed on a repurchase of trust preferred securities that were auctioned as part of a pooled collateralized debt obligation ("Fund"). The Fund owned \$11.0 million of the \$32.0 million in trust preferred securities that had been issued by Mercantile Bank Capital Trust I, a wholly-owned business trust subsidiary. The \$11.0 million in trust preferred securities was retired upon the repurchase, resulting in a commensurate reduction in the related Floating Rate Junior Subordinate Note, leaving \$21.0 million outstanding. Our winning bid equated to 73% of the \$11.0 million par value, with the 27% discount resulting in a pre-tax gain of approximately \$3.0 million (after-tax gain of approximately \$1.8 million, or \$0.11 per diluted share). The repurchase was primarily funded via a \$9.1 million cash dividend from our bank, resulting in an approximately 35 basis point decline in the bank's regulatory capital ratios. Subsequent to the repurchase, the regulatory capital ratios of both Mercantile and our bank remained well above the minimum thresholds to be categorized as well capitalized.

**Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

**Forward Looking Statements**

This report contains forward-looking statements that are based on management’s beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and our company. Words such as “anticipates,” “believes,” “estimates,” “expects,” “forecasts,” “intends,” “is likely,” “plans,” “projects,” and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions (“Future Factors”) that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements. We undertake no obligation to update, amend, or clarify forward looking-statements, whether as a result of new information, future events (whether anticipated or unanticipated), or otherwise.

Future Factors include, among others, changes in interest rates and interest rate relationships; demand for products and services; the degree of competition by traditional and non-traditional competitors; changes in banking regulation or actions by bank regulators; changes in tax laws; changes in prices, levies, and assessments; the impact of technological advances; governmental and regulatory policy changes; the outcomes of contingencies; trends in customer behavior as well as their ability to repay loans; changes in local real estate values; changes in the national and local economies; and risk factors described in our annual report on Form 10-K for the year ended December 31, 2016 or in this report. These are representative of the Future Factors that could cause a difference between an ultimate actual outcome and a forward-looking statement.

**Introduction**

The following discussion compares the financial condition of Mercantile Bank Corporation and its consolidated subsidiaries, including Mercantile Bank of Michigan (“our bank”) and our bank’s two subsidiaries, Mercantile Bank Real Estate Co., LLC (“our real estate company”) and Mercantile Insurance Center, Inc. (“our insurance company”), at March 31, 2017 and December 31, 2016 and the results of operations for the three months ended March 31, 2017 and March 31, 2016. This discussion should be read in conjunction with the interim consolidated financial statements and footnotes included in this report. Unless the text clearly suggests otherwise, references in this report to “us,” “we,” “our” or “the company” include Mercantile Bank Corporation and its consolidated subsidiaries referred to above.

**Critical Accounting Policies**

Accounting principles generally accepted in the United States of America are complex and require us to apply significant judgment to various accounting, reporting and disclosure matters. We must use assumptions and estimates to apply these principles where actual measurements are not possible or practical. Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our unaudited financial statements included in this report. For a discussion of our significant accounting policies, see Note 1 of the Notes to our Consolidated Financial Statements included on pages F-42 through F-49 in our Form 10-K for the fiscal year ended December 31, 2016 (Commission file number 000-26719). Our critical accounting policies are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements, and actual results may differ from those estimates. We have reviewed the application of these policies with the Audit Committee of our Board of Directors.

MERCANTILE BANK CORPORATION

---

**Allowance for Loan Losses:** The allowance for loan losses (“allowance”) is maintained at a level we believe is adequate to absorb probable incurred losses identified and inherent in the originated loan portfolio. Our evaluation of the adequacy of the allowance is an estimate based on past loan loss experience, the nature and volume of the loan portfolio, information about specific borrower situations and estimated collateral values, guidance from bank regulatory agencies, and assessments of the impact of current and anticipated economic conditions on the loan portfolio. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in our judgment, should be charged-off. Loan losses are charged against the allowance when we believe the uncollectability of a loan is likely. The balance of the allowance represents our best estimate, but significant downturns in circumstances relating to loan quality or economic conditions could result in a requirement for an increased allowance in the future. Likewise, an upturn in loan quality or improved economic conditions may result in a decline in the required allowance in the future. In either instance, unanticipated changes could have a significant impact on the allowance and operating results.

The allowance is increased through a provision charged to operating expense. Uncollectable loans are charged-off through the allowance. Recoveries of loans previously charged-off are added to the allowance. A loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. Impairment is evaluated on an individual loan basis. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan’s existing rate or at the fair value of collateral if repayment is expected solely from the collateral. The timing of obtaining outside appraisals varies, generally depending on the nature and complexity of the property being evaluated, general breadth of activity within the marketplace and the age of the most recent appraisal. For collateral dependent impaired loans, in most cases we obtain and use the “as is” value as indicated in the appraisal report, adjusting for any expected selling costs. In certain circumstances, we may internally update outside appraisals based on recent information impacting a particular or similar property, or due to identifiable trends (e.g., recent sales of similar properties) within our markets. The expected future cash flows exclude potential cash flows from certain guarantors. To the extent these guarantors provide repayments, a recovery would be recorded upon receipt. Loans are evaluated for impairment when payments are delayed, typically 30 days or more, or when serious deficiencies are identified within the credit relationship. Our policy for recognizing income on impaired loans is to accrue interest unless a loan is placed on nonaccrual status. We put loans into nonaccrual status when the full collection of principal and interest is not expected.

**Income Tax Accounting:** Current income tax assets and liabilities are established for the amount of taxes payable or refundable for the current year. In the preparation of income tax returns, tax positions are taken based on interpretation of federal and state income tax laws for which the outcome may be uncertain. We periodically review and evaluate the status of our tax positions and make adjustments as necessary. Deferred income tax assets and liabilities are also established for the future tax consequences of events that have been recognized in our financial statements or tax returns. A deferred income tax asset or liability is recognized for the estimated future tax effects attributable to temporary differences that can be carried forward (used) in future years. The valuation of our net deferred income tax asset is considered critical as it requires us to make estimates based on provisions of the enacted tax laws. The assessment of the realizability of the net deferred income tax asset involves the use of estimates, assumptions, interpretations and judgments concerning accounting pronouncements, federal and state tax codes and the extent of future taxable income. There can be no assurance that future events, such as court decisions, positions of federal and state tax authorities, and the extent of future taxable income will not differ from our current assessment, the impact of which could be significant to the consolidated results of operations and reported earnings.

MERCANTILE BANK CORPORATION

---

Accounting guidance requires that we assess whether a valuation allowance should be established against our deferred tax assets based on the consideration of all available evidence using a “more likely than not” standard. In making such judgments, we consider both positive and negative evidence and analyze changes in near-term market conditions as well as other factors which may impact future operating results. Significant weight is given to evidence that can be objectively verified.

**Securities and Other Financial Instruments:** Securities available for sale consist of bonds and notes which might be sold prior to maturity due to changes in interest rates, prepayment risks, yield and availability of alternative investments, liquidity needs or other factors. Securities classified as available for sale are reported at their fair value. Declines in the fair value of securities below their cost that are other than temporary are reflected as realized losses. In estimating other than temporary losses, management considers: (1) the length of time and extent that fair value has been less than carrying value; (2) the financial condition and near term prospects of the issuer; and (3) the Company’s ability and intent to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. Fair values for securities available for sale are obtained from outside sources and applied to individual securities within the portfolio. The difference between the amortized cost and the current fair value of securities is recorded as a valuation adjustment and reported in other comprehensive income.

**Mortgage Servicing Rights:** Mortgage servicing rights are recognized as assets based on the allocated fair value of retained servicing rights on loans sold. Servicing rights are carried at the lower of amortized cost or fair value and are expensed in proportion to, and over the period of, estimated net servicing income. We utilize a discounted cash flow model to determine the value of our servicing rights. The valuation model utilizes mortgage prepayment speeds, the remaining life of the mortgage pool, delinquency rates, our cost to service loans, and other factors to determine the cash flow that we will receive from serving each grouping of loans. These cash flows are then discounted based on current interest rate assumptions to arrive at the fair value of the right to service those loans. Impairment is evaluated quarterly based on the fair value of the servicing rights, using groupings of the underlying loans classified by interest rates. Any impairment of a grouping is reported as a valuation allowance.

**Goodwill:** Generally accepted accounting principles require us to determine the fair value of all of the assets and liabilities of an acquired entity, and record their fair value on the date of acquisition. We employ a variety of means in determination of the fair value, including the use of discounted cash flow analysis, market comparisons, and projected future revenue streams. For certain items that we believe we have the appropriate expertise to determine the fair value, we may choose to use our own calculation of the value. In other cases, where the value is not easily determined, we consult with outside parties to determine the fair value of the asset or liability. Once valuations have been adjusted, the net difference between the price paid for the acquired company and the value of its balance sheet is recorded as goodwill.

Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified. A more frequent assessment is performed if conditions in the market place or changes in the company’s organizational structure occur. We use a discounted income approach and a market valuation model, which compares the inherent value of our company to valuations of recent transactions in the market place to determine if our goodwill has been impaired.

MERCANTILE BANK CORPORATION

---

**Financial Overview**

We reported net income of \$7.6 million, or \$0.46 per diluted share, for the first quarter of 2017, compared to \$8.5 million, or \$0.52 per diluted share, during the first quarter of 2016. A bank owned life insurance benefit claim during the first quarter of 2017 increased diluted earnings per share by \$0.06, while the repurchase of \$11.0 million in trust preferred securities at a 27% discount during the first quarter of 2016 increased diluted earnings per share by \$0.11. Adjusting net income by eliminating these two events, we earned \$0.40 per diluted share during the first quarter of 2017, compared to \$0.41 per diluted share during the first quarter of 2016.

The overall quality of our loan portfolio remains strong, with nonperforming loans equaling only 0.30% of total loans as of March 31, 2017. Gross loan charge-offs totaled \$0.5 million during the first quarter of 2017, while recoveries of prior period loan charge-offs totaled \$0.2 million, providing for net loan charge-offs of only \$0.3 million, or 0.05% of average total loans on an annualized basis. We continue our collection efforts on charged-off loans and expect to record recoveries in future periods; however, given the nature of these efforts, it is not practical to forecast the dollar amount and timing of the recoveries.

New commercial term loan originations totaled approximately \$130 million during the first quarter of 2017. Net loan growth for the first quarter of 2017 totaled \$62.7 million, reflecting the impact of scheduled monthly payments as well as expected and unexpected commercial loan payoffs. The new loan pipeline remains strong, and at March 31, 2017, we had over \$83 million in unfunded loan commitments on commercial construction and development projects that are in the construction phase. We believe our loan portfolio remains well diversified, with commercial and industrial loans equaling 31%, commercial real estate non-owner occupied loans comprising 32%, commercial real estate owner occupied loans comprising 19% and residential mortgage and consumer loans aggregating 13% of total loans at March 31, 2017. As a percent of total commercial loans, commercial and industrial loans and commercial real estate owner occupied loans combined equaled 57% at March 31, 2017.

We believe our funding structure also remains well diversified. As of March 31, 2017, noninterest-bearing checking accounts comprised 29%, interest-bearing checking and securities sold under agreements to repurchase ("sweep accounts") combined for 19%, savings deposits and money market accounts aggregated to 24% and local time deposits accounted for 18% of total funds. Wholesale funds, comprised of brokered deposits and Federal Home Loan Bank of Indianapolis ("FHLBI") advances, represented the remaining 10% of total funds.

**Financial Condition**

Our total assets decreased \$63.7 million during the first three months of 2017, and totaled \$3.02 billion as of March 31, 2017. Total loans increased \$62.7 million and securities available for sale grew \$4.4 million, while cash and cash equivalents declined \$131 million. Total deposits decreased \$97.0 million during the first three months of 2017, while FHLBI advances increased \$30.0 million. The decline in cash and cash equivalents, largely reflecting a reduction in our deposit account at the Federal Reserve Bank of Chicago, primarily resulted from the use of on balance sheet liquidity to fund loan growth and deposit withdrawals. Noninterest-bearing deposits declined \$52.9 million, in general reflecting federal income tax payments from certain of our commercial customers during the initial few weeks of the quarter. Interest-bearing deposits decreased \$44.1 million, of which \$31.1 million represents a reduction in our brokered deposit portfolio. The \$30.0 million increase in FHLBI advances reflects new advances obtained late in the quarter to fund loan growth.

## MERCANTILE BANK CORPORATION

Commercial loans increased \$58.0 million during the first three months of 2017, and at March 31, 2017 totaled \$2.12 billion, or 87.0% of the loan portfolio. As of December 31, 2016, the commercial loan portfolio comprised 86.8% of total loans. The increase in commercial loans during the first three months of 2017 primarily reflects new commercial term loans to existing and new borrowers. Commercial and industrial loans were up \$43.3 million, non-owner occupied commercial real estate (“CRE”) loans increased \$20.3 million and owner occupied CRE loans increased \$1.9 million. Multi-family and residential rental loans declined \$4.6 million and vacant land, land development and residential construction loans were down \$2.9 million. As a percent of total commercial loans, commercial and industrial loans and commercial real estate owner occupied loans combined equaled 57.0% as of March 31, 2017, compared to 56.4% at December 31, 2016.

We are very pleased with the approximately \$1.2 billion in new commercial term loan fundings since the beginning of 2015, including about \$130 million during the first three months of 2017. As of March 31, 2017, availability on existing construction and development loans totaled over \$83 million, with most of those funds expected to be drawn over the next 12 to 18 months. Our current pipeline reports indicate continued strong commercial loan funding opportunities in future periods, including approximately \$216 million in new lending commitments, a majority of which we expect to be accepted and funded over the next 12 to 18 months. Our commercial lenders also report substantial additional opportunities they are currently discussing with existing and potentially new borrowers.

We continue to experience commercial loan principal paydowns and payoffs. While a portion of the principal paydowns and payoffs received have been welcomed, such as on stressed loan relationships, we have also experienced instances where well-performing relationships have been refinanced at other financial institutions or non-bank entities, and other situations where the borrower has sold the underlying asset. In many of those instances where the loans were refinanced elsewhere, we believed the terms and conditions of the new lending arrangements were too aggressive, generally reflecting the very competitive banking environment in our markets. We remain committed to prudent underwriting standards that provide for an appropriate yield and risk relationship, as well as concentration limits we have established within our commercial loan portfolio. Usage of existing commercial lines of credit has remained relatively steady.

One-to-four family mortgage loans and other consumer loans increased a combined \$4.7 million during the first three months of 2017, and at March 31, 2017, totaled a combined \$318 million, or 13.0% of total loans. One-to-four family mortgage loans and other consumer loans, when combined, equated to 13.2% of total loans as of December 31, 2016.

The following table summarizes our loan portfolio at March 31, 2017:

	3/31/17	12/31/16	9/30/16	6/30/16	3/31/16
<b>Commercial:</b>

## MERCANTILE BANK CORPORATION

Our credit policies establish guidelines to manage credit risk and asset quality. These guidelines include loan review and early identification of problem loans to provide effective loan portfolio administration. The credit policies and procedures are meant to minimize the risk and uncertainties inherent in lending. In following these policies and procedures, we must rely on estimates, appraisals and evaluations of loans and the possibility that changes in these could occur quickly because of changing economic conditions. Identified problem loans, which exhibit characteristics (financial or otherwise) that could cause the loans to become nonperforming or require restructuring in the future, are included on an internal watch list. Senior management and the Board of Directors review this list regularly. Market value estimates of collateral on impaired loans, as well as on foreclosed and repossessed assets, are reviewed periodically; however, we have a process in place to monitor whether value estimates at each quarter-end are reflective of current market conditions. Our credit policies establish criteria for obtaining appraisals and determining internal value estimates. We may also adjust outside and internal valuations based on identifiable trends within our markets, such as recent sales of similar properties or assets, listing prices and offers received. In addition, we may discount certain appraised and internal value estimates to address distressed market conditions.

Nonperforming assets, comprised of nonaccrual loans, loans past due 90 days or more and accruing interest and foreclosed properties, totaled \$7.8 million (0.3% of total assets) as of March 31, 2017, compared to \$6.4 million (0.2% of total assets) as of December 31, 2016. Given the low level of nonperforming loans and accruing loans 30 to 89 days delinquent, combined with the manageable and steady level of watch list credits and what we believe are strong credit administration practices, we remain pleased with the overall quality of the loan portfolio.

The following tables provide a breakdown of nonperforming assets by collateral type:

## NONPERFORMING LOANS

MERCANTILE BANK CORPORATION

---

During the first quarter of 2017, loan charge-offs totaled \$0.5 million while recoveries of prior period charge-offs equaled \$0.2 million, providing for net loan charge-offs of \$0.3 million, or an annualized 0.05% of average total loans. We continue our collection efforts on charged-off loans and expect to record recoveries in future periods; however, given the nature of these efforts, it is not practical to forecast the dollar amount and timing of the recoveries.

In each accounting period, we adjust the allowance to the amount we believe is necessary to maintain the allowance at an adequate level. Through the loan review and credit departments, we establish portions of the allowance based on specifically identifiable problem loans. The evaluation of the allowance is further based on, but not limited to, consideration of the internally prepared allowance analysis, loan loss migration analysis, composition of the loan portfolio, third party analysis of the loan administration processes and portfolio, and general economic conditions.

The allowance analysis applies reserve allocation factors to non-impaired outstanding loan balances, the result of which is combined with specific reserves to calculate an overall allowance dollar amount. For non-impaired commercial loans, reserve allocation factors are based on the loan ratings as determined by our standardized grade paradigms and by loan purpose. Our commercial loan portfolio is segregated into five classes: 1) commercial and industrial loans; 2) vacant land, land development and residential construction loans; 3) owner occupied real estate loans; 4) non-owner occupied real estate loans; and 5) multi-family and residential rental property loans. The reserve allocation factors are primarily based on the historical trends of net loan charge-offs through a migration analysis whereby net loan losses are tracked via assigned grades over various time periods, with adjustments made for environmental factors reflecting the current status of, or recent changes in, items such as: lending policies and procedures; economic conditions; nature and volume of the loan portfolio; experience, ability and depth of management and lending staff; volume and severity of past due, nonaccrual and adversely classified loans; effectiveness of the loan review program; value of underlying collateral; loan concentrations; and other external factors such as competition and regulatory environment. Adjustments for specific lending relationships, particularly impaired loans, are made on a case-by-case basis. Non-impaired retail loan reserve allocations are determined in a similar fashion as those for non-impaired commercial loans, except that retail loans are segmented by type of credit and not a grading system. We regularly review the allowance analysis and make needed adjustments based upon identifiable trends and experience.

A migration analysis is completed quarterly to assist us in determining appropriate reserve allocation factors for non-impaired commercial loans. Our migration analysis takes into account various time periods, with most weight placed on the time frame from December 31, 2010 through March 31, 2017. We believe this time period represents an appropriate range of economic conditions, and that it provides for an appropriate basis in determining reserve allocation factors given current economic conditions and the general consensus of economic conditions in the near future.

Although the migration analysis provides a historical accounting of our net loan losses, it is not able to fully account for environmental factors that will also very likely impact the collectability of our commercial loans as of any quarter-end date. Therefore, we incorporate the environmental factors as adjustments to the historical data. Environmental factors include both internal and external items. We believe the most significant internal environmental factor is our credit culture and the relative aggressiveness in assigning and revising commercial loan risk ratings, with the most significant external environmental factor being the assessment of the current economic environment and the resulting implications on our commercial loan portfolio.

The primary risk elements with respect to commercial loans are the financial condition of the borrower, the sufficiency of collateral, and timeliness of scheduled payments. We have a policy of requesting and reviewing periodic financial statements from commercial loan customers, and we have a disciplined and formalized review of the existence of collateral and its value. The primary risk element with respect to each residential real estate loan and consumer loan is the timeliness of scheduled payments. We have a reporting system that monitors past due loans and have adopted policies to pursue creditor's rights in order to preserve our collateral position.

MERCANTILE BANK CORPORATION

The allowance for originated loans equaled \$18.1 million as of March 31, 2017, or 0.9% of total originated loans outstanding, compared to \$17.9 million, or 0.9% of total originated loans outstanding at December 31, 2016. We also had an allowance for acquired loans as of March 31, 2017 and December 31, 2016, equaling \$0.2 million and \$0.1 million, respectively. The allowance equaled 251% of nonperforming loans as of March 31, 2017, compared to 302% as of December 31, 2016. The decrease in this ratio during the first quarter primarily reflects a \$1.4 million increase in nonperforming loans.

As of March 31, 2017, the allowance for originated loans was comprised of \$14.5 million in general reserves relating to non-impaired loans, \$3.2 million in specific reserve allocations relating to nonaccrual loans, and \$0.4 million in specific reserves on other loans, primarily accruing loans designated as troubled debt restructurings. Troubled debt restructurings totaled \$12.2 million at March 31, 2017, consisting of \$0.7 million that are on nonaccrual status and \$11.5 million that are on accrual status. The latter, while considered and accounted for as impaired loans in accordance with accounting guidelines, is not included in our nonperforming loan totals. Impaired loans with an aggregate carrying value of \$0.6 million as of March 31, 2017 had been subject to previous partial charge-offs aggregating \$0.7 million. Those partial charge-offs were primarily recorded in 2011 and 2010. As of March 31, 2017, there were no specific reserves allocated to impaired loans that had been subject to a previous partial charge-off.

The following table provides a breakdown of our originated and acquired loans categorized as troubled debt restructurings:

	<u>3/31/17</u>	<u>12/31/16</u>	<u>9/30/16</u>	<u>6/30/16</u>	<u>3/31/16</u>
Performing	\$ 11,497,000	\$ 12,480,000	\$ 17,717,000	\$ 19,403,000	\$ 19,088,000
Nonperforming	731,000	1,132,000	1,630,000	1,950,000	2,112,000
Total	<u>\$ 12,228,000</u>	<u>\$ 13,612,000</u>	<u>\$ 19,347,000</u>	<u>\$ 21,353,000</u>	<u>\$ 21,200,000</u>

Although we believe the allowance is adequate to absorb loan losses in our originated loan portfolio as they arise, there can be no assurance that we will not sustain loan losses in any given period that could be substantial in relation to, or greater than, the size of the allowance.

Securities available for sale increased \$4.4 million during the first three months of 2017, totaling \$332 million as of March 31, 2017. Purchases during the first three months of 2017, consisting almost exclusively of U.S. Government agency bonds (\$10.2 million) and municipal bonds (\$4.5 million), totaled \$14.7 million. Proceeds from matured and called U.S. Government agency bonds and municipal bonds during the first three months of 2017 totaled \$6.5 million and \$0.7 million, respectively, with another \$3.7 million from principal paydowns on mortgage-backed securities. At March 31, 2017, the portfolio was primarily comprised of U.S. Government agency bonds (47%), municipal bonds (39%) and U.S. Government agency issued or guaranteed mortgage-backed securities (13%). All of our securities are currently designated as available for sale, and are therefore stated at fair value. The fair value of securities designated as available for sale at March 31, 2017 totaled \$332 million, including a net unrealized loss of \$7.5 million. We maintain the securities portfolio at levels to provide adequate pledging and secondary liquidity for our daily operations. In addition, the securities portfolio serves a primary interest rate risk management function. We expect purchases during the remainder of 2017 to generally consist of U.S. Government agency bonds and municipal bonds, with the securities portfolio maintained at about 11% of total assets.

FHLBI stock totaled \$9.2 million as of March 31, 2017, up \$1.2 million from the balance at December 31, 2016. The increase reflects additional stock purchased in association with the \$30 million increase in outstanding advances during the first quarter. Our investment in FHLBI stock is necessary to engage in their advance and other financing programs. We have regularly received quarterly cash dividends, and we expect a cash dividend will continue to be paid in future quarterly periods.

MERCANTILE BANK CORPORATION

---

Market values on our U.S. Government agency bonds, mortgage-backed securities issued or guaranteed by U.S. Government agencies and municipal bonds are generally determined on a monthly basis with the assistance of a third party vendor. Evaluated pricing models that vary by type of security and incorporate available market data are utilized. Standard inputs include issuer and type of security, benchmark yields, reported trades, broker/dealer quotes and issuer spreads. The market value of certain non-rated securities issued by relatively small municipalities generally located within our markets is estimated at carrying value. We believe our valuation methodology provides for a reasonable estimation of market value, and that it is consistent with the requirements of accounting guidelines.

Interest-earning balances, primarily consisting of excess funds deposited at the Federal Reserve Bank of Chicago, are used to manage daily liquidity needs and interest rate sensitivity. During the first three months of 2017, the average balance of these funds equaled \$61.4 million, or 2.2% of average earning assets. We expect the level of these funds to average approximately 1% to 2% of average earning assets in future quarters.

Net premises and equipment equaled \$45.8 million at March 31, 2017, an increase of \$0.4 million during the first three months of 2017. Purchases totaled \$1.1 million, while depreciation expense totaled \$0.7 million. Foreclosed and repossessed assets equaled \$0.5 million as of March 31, 2017, unchanged from year-end 2016. While we expect periodic transfers from loans to foreclosed and repossessed assets in future periods reflecting our collection efforts on some impaired lending relationships, we believe the overall strong quality of our loan portfolio will limit any overall increase in, and average balance of, this particular nonperforming asset category.

Total deposits decreased \$97.0 million during the first three months of 2017, totaling \$2.28 billion at March 31, 2017. Out-of-area deposits decreased \$31.1 million during the first three months of 2017, and as a percent of total deposits, equaled 2.0% as of March 31, 2017, compared to 3.2% as of December 31, 2016.

Noninterest-bearing checking accounts decreased \$52.9 million during the first three months of 2017, generally due to federal income tax payments by certain commercial customers, which more than offset growth from deposit account openings as part of recently established commercial lending relationships and transfers from closed sweep accounts. Interest-bearing checking accounts decreased \$6.3 million, money market deposit accounts grew \$7.1 million and savings deposits increased \$10.4 million during the first three months of 2017. Local time deposits declined \$24.1 million, primarily consisting of transfers to non-time deposits at maturity by businesses and consumers, as well as non-renewed maturities from certain municipal customers. The transfers are a continuation of a trend over the past several years due to the low interest rate environment, and we expect this trend to continue at least until deposit rates start to increase in a meaningful way.

Sweep accounts decreased \$5.0 million during the first three months of 2017, totaling \$127 million as of March 31, 2017. Total balances in this product have been on a declining trend over the past few years, in large part reflecting customers closing sweep accounts and depositing the funds into stand-alone noninterest-bearing checking accounts. Our sweep account program entails transferring collected funds from certain business noninterest-bearing checking accounts and savings deposits into over-night interest-bearing repurchase agreements. Such sweep accounts are not deposit accounts and are not afforded federal deposit insurance, and are accounted for as secured borrowings.

## MERCANTILE BANK CORPORATION

FHLBI advances increased \$30.0 million during the first three months of 2017, reflecting new advances obtained to fund loan growth and brokered deposit maturities. As of March 31, 2017, FHLBI advances totaled \$205 million. The FHLBI advances are generally collateralized by a blanket lien on our residential mortgage loan portfolio and certain commercial real estate loans. Our borrowing line of credit as of March 31, 2017 totaled about \$541 million, with remaining availability approximating \$336 million.

Shareholders' equity was \$348 million at March 31, 2017, compared to \$341 million at December 31, 2016. The \$7.2 million increase during the first three months of 2017 primarily reflects the positive impact of net income totaling \$7.6 million and the negative impact of cash dividends on common shares totaling \$2.9 million. Also positively impacting shareholders' equity during the first three months of 2017 was an aggregate \$1.1 million issuance of common stock via our dividend reinvestment plan.

**Liquidity**

Liquidity is measured by our ability to raise funds through deposits, borrowed funds, and capital, or cash flow from the repayment of loans and securities. These funds are used to fund loans, meet deposit withdrawals, maintain reserve requirements and operate our company. Liquidity is primarily achieved through local and out-of-area deposits and liquid assets such as securities available for sale, matured and called securities, federal funds sold and interest-earning deposits. Asset and liability management is the process of managing our balance sheet to achieve a mix of earning assets and liabilities that maximizes profitability, while providing adequate liquidity.

To assist in providing needed funds, we periodically obtain monies from wholesale funding sources. Wholesale funds, primarily comprised of deposits from customers outside of our market areas and advances from the FHLBI, totaled \$250 million, or 9.6% of combined deposits and borrowed funds, as of March 31, 2017, compared to \$251 million, or 9.4% of combined deposits and borrowed funds, as of December 31, 2016.

Sweep accounts decreased \$5.0 million during the first three months of 2017, totaling \$127 million as of March 31, 2017. Total balances in this product have been on a declining trend over the past few years, in large part reflecting customers closing sweep accounts and depositing the funds into stand-alone noninterest-bearing checking accounts. Our sweep account program entails transferring collected funds from certain business noninterest-bearing checking accounts and savings deposits into over-night interest-bearing repurchase agreements. Such sweep accounts are not deposit accounts and are not afforded federal deposit insurance, and are accounted for as secured borrowings. Information regarding our repurchase agreements as of March 31, 2017 and during the first three months of 2017 is as follows:

Outstanding balance at March 31, 2017	\$	126,679,000
Weighted average interest rate at March 31, 2017		0.16%
Maximum daily balance three months ended March 31, 2017	\$	142,459,000
Average daily balance for three months ended March 31, 2017	\$	128,933,000
Weighted average interest rate for three months ended March 31, 2017		0.16%

As a member of FHLBI, we have access to FHLBI advance borrowing programs. FHLBI advances increased \$30.0 million during the first three months of 2017, in large part to fund loan growth and brokered deposit maturities. As of March 31, 2017, FHLBI advances totaled \$205 million, and based on available collateral we could borrow an additional \$336 million.

We also have the ability to borrow up to \$30.0 million on a daily basis through a correspondent bank using an established unsecured federal funds purchased line of credit. We accessed this line of credit in one instance during the first three months of 2017, the first time we have accessed any federal funds purchased lines of credit since January of 2010. In contrast, our interest-earning deposit balance with the Federal Reserve Bank of Chicago averaged \$59.1 million during the first three months of 2017. We also have a line of credit through the Discount Window of the Federal Reserve Bank of Chicago. Using certain municipal bonds as collateral, we could have borrowed up to \$22.0 million as of March 31, 2017. We did not utilize this line of credit during the first three months of 2017 or at any time during the previous eight fiscal years, and do not plan to access this line of credit in future periods.

## MERCANTILE BANK CORPORATION

The following table reflects, as of March 31, 2017, significant fixed and determinable contractual obligations to third parties by payment date, excluding accrued interest:

	One Year or Less	One to Three Years	Three to Five Years	Over Five Years	Total
Deposits without a stated maturity	\$ 1,763,802,000	\$ 0	\$ 0	\$ 0	\$ 1,763,802,000

In addition to normal loan funding and deposit flow, we must maintain liquidity to meet the demands of certain unfunded loan commitments and standby letters of credit. As of March 31, 2017, we had a total of \$847 million in unfunded loan commitments and \$26.9 million in unfunded standby letters of credit. Of the total unfunded loan commitments, \$631 million were commitments available as lines of credit to be drawn at any time as customers' cash needs vary, and \$216 million were for loan commitments generally expected to close and become funded within the next 12 to 18 months. We regularly monitor fluctuations in loan balances and commitment levels, and include such data in our overall liquidity management.

We monitor our liquidity position and funding strategies on an ongoing basis, but recognize that unexpected events, changes in economic or market conditions, a reduction in earnings performance, declining capital levels or situations beyond our control could cause liquidity challenges. While we believe it is unlikely that a funding crisis of any significant degree is likely to materialize, we have developed a comprehensive contingency funding plan that provides a framework for meeting liquidity disruptions.

**Capital Resources**

Shareholders' equity was \$348 million at March 31, 2017, compared to \$341 million at December 31, 2016. The \$7.2 million increase during the first three months of 2017 primarily reflects the positive impact of net income totaling \$7.6 million and the negative impact of cash dividends on common shares totaling \$2.9 million. Also positively impacting shareholders' equity during the first three months of 2017 was an aggregate \$1.1 million issuance of common stock via our dividend reinvestment plan.

On January 30, 2015, we announced that our Board of Directors had authorized a new program to repurchase up to \$20.0 million of our common stock from time to time in open market transactions at prevailing market prices or by other means in accordance with applicable regulations. On April 19, 2016, we announced a \$15.0 million expansion of the stock repurchase plan. Since inception, we have purchased approximately 956,000 shares at a total price of \$19.5 million, at an average price per share of \$20.38; no shares were purchased under the authorized plan during the first three months of 2017. The stock buybacks have been funded from cash dividends paid to us from our bank. Additional repurchases may be made during in future periods under the authorized plan, which would also likely be funded from cash dividends paid to us from our bank.

MERCANTILE BANK CORPORATION

---

We and our bank are subject to regulatory capital requirements administered by state and federal banking agencies. Failure to meet the various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements. Under the final BASEL III capital rules that became effective on January 1, 2015, there is a requirement for a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do not meet this required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in cash dividends or used for stock repurchases and on the payment of discretionary bonuses to senior executive management. The capital buffer requirement is being phased in over three years beginning in 2016. The capital buffer requirement effectively raises the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5% and the total capital ratio to 10.5% on a fully phased-in basis on January 1, 2019. We believe that, as of March 31, 2017, our bank would meet all capital adequacy requirements under the BASEL III capital rules on a fully phased-in basis as if all such requirements were currently in effect.

As of March 31, 2017, our bank's total risk-based capital ratio was 13.0%, compared to 13.1% at December 31, 2016. Our bank's total regulatory capital increased \$3.6 million during the first three months of 2017, in large part reflecting the net impact of net income totaling \$8.6 million and cash dividends paid to us aggregating \$4.0 million. Our bank's total risk-based capital ratio was also impacted by a \$60.0 million increase in total risk-weighted assets, primarily resulting from net loan growth. As of March 31, 2017, our bank's total regulatory capital equaled \$357 million, or approximately \$81 million in excess of the 10.0% minimum which is among the requirements to be categorized as "well capitalized." Our and our bank's capital ratios as of March 31, 2017 and December 31, 2016 are disclosed in Note 12 of the Notes to Condensed Consolidated Financial Statements.

**Results of Operations**

We recorded net income of \$7.6 million, or \$0.46 per basic and diluted share, for the first quarter of 2017, compared to net income of \$8.5 million, or \$0.52 per basic and diluted share, for the first quarter of 2016. A bank owned life insurance death benefits claim during the first quarter of 2017 increased reported net income by approximately \$1.1 million, or \$0.06 per diluted share, while the repurchase of \$11.0 million in trust preferred securities at a 27% discount during the first quarter of 2016 increased reported net income by approximately \$1.8 million, or \$0.11 per diluted share. Excluding the impacts of these transactions, diluted earnings per share during the first quarters of 2017 and 2016 equaled \$0.40 and \$0.41, respectively.

The lower level of net income in the first quarter of 2017 compared to the prior-year first quarter resulted from decreased noninterest income and net interest income, which more than offset reduced overhead costs. Noninterest income during the first quarter of 2016 was elevated mainly as a result of the recording of a gain associated with the trust preferred securities repurchase transaction, which more than offset the impact of the bank owned life insurance death benefits claim recorded during the first quarter of 2017. Excluding these transactions, noninterest income during the current-year first quarter was up compared to the respective 2016 period. The decreased net interest income primarily resulted from a lower net interest margin and the first quarter of 2017 having one less calendar day than the previous year's first quarter, which more than offset a higher level of earning assets. The reduction in noninterest expense mainly reflects cost savings related to the cost efficiency program that was announced in the latter part of 2015 and lower Federal Deposit Insurance Corporation ("FDIC") insurance premiums, which more than offset higher salary and benefit costs.

## MERCANTILE BANK CORPORATION

---

Interest income during the first quarter of 2017 was \$28.7 million, a decrease of \$0.2 million, or 0.6%, from the \$28.9 million earned during the first quarter of 2016. The decrease in interest income resulted from a lower yield on average earning assets and the first quarter of 2017 having one less calendar day, which more than offset an increase in average earning assets. The yield on average earning assets was 4.20% during the first quarter of 2017, compared to 4.37% during the first quarter of 2016. The lower yield on average earning assets primarily resulted from a decreased yield on loans, which equaled 4.54% and 4.72% during the first quarters of 2017 and 2016, respectively. The decreased yield on loans reflects the ongoing low interest rate environment, competitive pressures and a lower level of purchased loan discount accretion. The negative impact of these factors on the commercial loan yield, which declined from 4.65% in the first quarter of 2016 to 4.49% in the first quarter of 2017, was somewhat mitigated by increased rates on certain variable-rate loans stemming from the Federal Open Market Committee (“FOMC”) raising the targeted federal funds rate by 25 basis points in December of 2016 and again in March of 2017. Accretion of acquired loans amounted to \$0.8 million during the first quarter of 2017, compared to \$1.3 million during the first quarter of 2016. Purchased loan accretion amounts vary from period to period as a result of periodic cash flow re-estimations, loan payoffs, and payment performance. A decreased yield on securities, which declined from 2.52% during the prior-year first quarter to 2.35% during the current-year first quarter mainly due to a reduced yield on U.S. Government agency bonds, also contributed to the lower yield on average earning assets. The decreased yield on U.S. Government agency bonds largely resulted from a lower level of accelerated unaccreted discount being recorded as interest income; unaccreted discount totaling approximately \$0.3 million associated with called bonds was recorded as interest income during the first quarter of 2016, compared to only a nominal amount during the first quarter of 2017. Average earning assets equaled \$2.79 billion during the first quarter of 2017, up \$120 million, or 4.5%, from the level of \$2.67 billion during the first quarter of 2016; average loans were up \$116 million, average interest-earning deposit balances were up \$19.4 million, and average securities were down \$15.0 million during the current-year first quarter compared to the respective 2016 period.

Interest expense during the first quarter of 2017 was \$3.2 million, an increase of \$0.2 million, or 6.3%, from the \$3.0 million expensed during the first quarter of 2016. The increase in interest expense is primarily attributable to a higher weighted average cost of interest-bearing liabilities, which equaled 0.68% in the first quarter of 2017 compared to 0.64% in the first quarter of 2016. The increase in the weighted average cost of interest-bearing liabilities mainly reflects a change in interest-bearing liability mix and higher costs of time deposits and certain non-certificate of deposit account categories. Average higher-costing FHLBI advances represented 9.3% of average interest-bearing liabilities during the first quarter of 2017, up from 4.8% during the prior-year first quarter, while lower-costing non-time deposit accounts represented 52.7% of average interest-bearing liabilities during the first quarter of 2017, down from 53.6% during the respective 2016 period. Longer-term FHLBI advances totaling \$107 million were obtained during the twelve months ended March 31, 2017 to meet loan funding and other liquidity needs. The higher cost of time deposits primarily reflects increased rates paid on time deposits over the past twelve months. The cost of interest-bearing non-time deposit accounts increased from 0.09% during the first quarter of 2016 to 0.12% during the first quarter of 2017 in light of rates being raised on certain account categories since March 31, 2016.

Net interest income during the first quarter of 2017 was \$25.5 million, a decrease of \$0.4 million, or 1.4%, from the \$25.9 million earned during the first quarter of 2016. The decrease in net interest income was due to a lower net interest margin and the first quarter of 2017 having one less calendar day, which more than offset an increase in average earning assets. The net interest margin declined from 3.92% in the first quarter of 2016 to 3.73% in the current-year first quarter primarily due to a decreased yield on average earning assets. The decrease in the yield on average earning assets from 4.37% during the first quarter of 2016 to 4.20% during the first quarter of 2017 mainly resulted from a lower yield on loans. The ongoing low interest rate environment and continuing competitive pressures, along with a lower level of purchased loan discount accretion, negatively impacted the yield on loans during the first quarter of 2017. The negative impact of these factors was somewhat mitigated by increased rates on certain variable-rate loans stemming from the FOMC’s two recent rate hikes. As depicted by the results of our interest rate risk measurement system, further FOMC rate hikes should positively impact our net interest margin.

MERCANTILE BANK CORPORATION

---

The net interest margin in the first quarter of 2017 was virtually the same as the 3.72% margin in the linked quarter in light of a relatively stable yield on average earning assets and cost of funds. The yield on average earning assets equaled 4.20% and 4.18%, respectively, during the first quarter of 2017 and the fourth quarter of 2016, while the cost of funds equaled 0.47% and 0.46% during the respective periods. The negative impact of the previously-discussed lower loan yield during the first quarter of 2017 was substantially offset by the positive impact of a change in earning asset mix, resulting in the relatively steady yield on average earning assets. The change in earning asset mix primarily reflects loan growth and a reduction in interest-earning deposit balances. Higher-yielding average loans represented 85.6 percent of average earning assets during the first quarter of 2017, up from 83.6 percent during the linked quarter, while lower-yielding average interest-earning deposit balances represented 2.2 percent of average earning assets during the current-year first quarter, down from 4.5 percent during the linked quarter. The elevated level of interest-earning deposit balances during the fourth quarter of 2016 reflected a combination of a reduction in total loans and growth in local deposits. Purchased loan discount accretion totaled \$1.7 million during the fourth quarter of 2016, compared to \$0.8 million during the first quarter of 2017. The elevated level of purchased loan discount accretion in the fourth quarter of 2016 reflects a change in the accounting treatment for our pool of purchased CRE impaired loans as of year-end 2016, whereby we switched to the cost recovery methodology. As of December 31, 2016, payments received on CRE-pooled loans since the merger date lowered the recorded investment to \$0. In accordance with the cost recovery methodology, the net deferred gain of \$1.0 million was immediately recorded as interest income. After December 31, 2016, accretion income was no longer recorded on the CRE pool, but instead all payments received from borrowers were immediately recorded as interest income.

The following table sets forth certain information relating to our consolidated average interest-earning assets and interest-bearing liabilities and reflects the average yield on assets and average cost of liabilities for the first quarter of 2017 and 2016. Such yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the period presented. Tax-exempt securities interest income and yield have been computed on a tax equivalent basis using a marginal tax rate of 35%. Securities interest income was increased by \$167,000 and \$184,000 in the first quarter of 2017 and 2016, respectively, for this non-GAAP, but industry standard, adjustment. This adjustment equated to a two basis point increase in our net interest margin during the first quarter of 2017, and a three basis point increase in our net interest margin during the first quarter of 2016.

A loan loss provision expense of \$0.6 million was recorded during both the first quarter of 2017 and the first quarter of 2016. The provision expense recorded during the periods primarily reflects ongoing loan growth. Net loan charge-offs of \$0.3 million and less than \$0.1 million were recorded during the first quarters of 2017 and 2016, respectively. The allowance for originated loans, as a percentage of total originated loans, was 0.9% as of March 31, 2017, and March 31, 2016. Our allowances for originated loans and acquired loans totaled \$18.1 million and \$0.2 million, respectively, as of March 31, 2017.

MERCANTILE BANK CORPORATION

---

Noninterest income during the first quarter of 2017 was \$5.9 million, a decrease of \$1.2 million, or 17.4%, from the \$7.1 million earned during the prior-year first quarter. Noninterest income during the first quarter of 2017 included a bank owned life insurance death benefits claim of \$1.4 million, while noninterest income during the first quarter of 2016 included a \$2.9 million gain associated with a trust preferred securities repurchase transaction and a \$0.3 million gain related to the sale of an equity investment; excluding these transactions, noninterest income increased \$0.6 million or 16.6 percent in the current-year first quarter compared to the prior-year first quarter. The increase in core noninterest income primarily reflects higher mortgage banking income resulting from the positive impact of strategic initiatives that were implemented in the latter half of 2016, including the hiring of additional loan originators, introduction of new and enhanced products, loan programs and increased marketing efforts. In addition, increased payroll processing fees, debit and credit card fees, and service charges on accounts, also reflecting the success of recently-implemented strategic initiatives, contributed to the higher level of noninterest income.

Noninterest expense during the first quarter of 2017 was \$19.8 million, a decrease of \$0.1 million, or 0.5%, from the \$19.9 million expensed during the first quarter of 2016. The decreased noninterest expense primarily reflected cost savings associated with the cost efficiency program that was announced in the latter part of 2015 and lower FDIC insurance premiums, which more than offset higher salary and benefit costs. The quarterly cost savings related to the cost efficiency program, which saves us approximately \$2.7 million per year on a pre-tax basis, were fully realized starting in the second quarter of 2016. FDIC insurance premiums totaled \$0.2 million during the first quarter of 2017, down \$0.2 million from the prior-year first quarter mainly due to changes to the deposit insurance assessment calculation that became effective in the third quarter of 2016. Salary and benefit costs totaled \$11.3 million during the current-year first quarter, up \$0.3 million or 2.5 percent from the prior-year first quarter primarily due to employee merit pay increases and higher stock-based compensation expense.

During the first quarter of 2017, we recorded income before federal income tax of \$11.0 million and a federal income tax expense of \$3.4 million. During the first quarter of 2016, we recorded income before federal income tax of \$12.5 million and a federal income tax expense of \$4.0 million. The decrease in federal income tax expense resulted from the lower level of income before federal income tax and a higher level of nontaxable bank owned life insurance income stemming from the aforementioned death benefits claim. Our effective tax rate was 30.7% during the first three months of 2017, compared to 31.6% during the respective 2016 period.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Our primary market risk exposure is interest rate risk and, to a lesser extent, liquidity risk. All of our transactions are denominated in U.S. dollars with no specific foreign exchange exposure. We have only limited agricultural-related loan assets and therefore have no significant exposure to changes in commodity prices. Any impact that changes in foreign exchange rates and commodity prices would have on interest rates is assumed to be insignificant. Interest rate risk is the exposure of our financial condition to adverse movements in interest rates. We derive our income primarily from the excess of interest collected on our interest-earning assets over the interest paid on our interest-bearing liabilities. The rates of interest we earn on our assets and owe on our liabilities generally are established contractually for a period of time. Since market interest rates change over time, we are exposed to lower profitability if we cannot adapt to interest rate changes. Accepting interest rate risk can be an important source of profitability and shareholder value; however, excessive levels of interest rate risk could pose a significant threat to our earnings and capital base. Accordingly, effective risk management that maintains interest rate risk at prudent levels is essential to our safety and soundness.

MERCANTILE BANK CORPORATION

---

Evaluating the exposure to changes in interest rates includes assessing both the adequacy of the process used to control interest rate risk and the quantitative level of exposure. Our interest rate risk management process seeks to ensure that appropriate policies, procedures, management information systems and internal control procedures are in place to maintain interest rate risk at prudent levels with consistency and continuity. In evaluating the quantitative level of interest rate risk, we assess the existing and potential future effects of changes in interest rates on our financial condition, including capital adequacy, earnings, liquidity and asset quality.

We use two interest rate risk measurement techniques. The first, which is commonly referred to as GAP analysis, measures the difference between the dollar amounts of interest sensitive assets and liabilities that will be refinanced or repriced during a given time period. A significant repricing gap could result in a negative impact to our net interest margin during periods of changing market interest rates.

MERCANTILE BANK CORPORATION

The following table depicts our GAP position as of March 31, 2017:

	Within Three Months	Three to Twelve Months	One to Five Years	After Five Years	Total
<b>Assets:</b>					
Commercial loans (1)	\$ 1,033,870,000	\$ 78,464,000	\$ 671,751,000	\$ 309,181,000	\$ 2,093,266,000

<b>Cumulative GAP</b>	<b>\$ (173,904,000)</b>	<b>\$ (267,118,000)</b>	<b>\$ 342,113,000</b>	<b>\$ 895,335,000</b>	
<b>Percent of cumulative GAP to total assets</b>	<b>(5.8%)</b>	<b>(8.8%)</b>	<b>11.3%</b>	<b>29.7%</b>	

(1) Floating rate loans that are currently at interest rate floors are treated as fixed rate loans and are reflected using maturity date and not repricing frequency.

(2) Mortgage-backed securities are categorized by average life calculations based upon prepayment trends as of March 31, 2017.

The second interest rate risk measurement we use is commonly referred to as net interest income simulation analysis. We believe that this methodology provides a more accurate measurement of interest rate risk than the GAP analysis, and therefore, it serves as our primary interest rate risk measurement technique. The simulation model assesses the direction and magnitude of variations in net interest income resulting from potential changes in market interest rates.

## MERCANTILE BANK CORPORATION

Key assumptions in the model include prepayment speeds on various loan and investment assets; cash flows and maturities of interest sensitive assets and liabilities; and changes in market conditions impacting loan and deposit volume and pricing. These assumptions are inherently uncertain, subject to fluctuation and revision in a dynamic environment; therefore, the model cannot precisely estimate net interest income or exactly predict the impact of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes and changes in market conditions and our strategies, among other factors.

We conducted multiple simulations as of March 31, 2017, in which it was assumed that changes in market interest rates occurred ranging from up 400 basis points to down 400 basis points in equal quarterly instalments over the next twelve months. The following table reflects the suggested impact on net interest income over the next twelve months in comparison to estimated net interest income based on our balance sheet structure, including the balances and interest rates associated with our specific loans, securities, deposits and borrowed funds, as of March 31, 2017. The resulting estimates are well within our policy parameters established to manage and monitor interest rate risk.

Interest Rate Scenario	Dollar Change	Percent Change
	In Net Interest Income	In Net Interest Income
Interest rates down 400 basis points	\$ (15,100,000)	(14.6%)
Interest rates down 300 basis points	(13,000,000)	(12.6)
Interest rates down 200 basis points	(10,000,000)	(9.7)
Interest rates down 100 basis points	(5,600,000)	(5.4)
No change in interest rates	(400,000)	(0.4)
Interest rates up 100 basis points	2,100,000	2.0
Interest rates up 200 basis points	4,500,000	4.4
Interest rates up 300 basis points	7,000,000	6.8
Interest rates up 400 basis points	9,400,000	9.1

The resulting estimates have been significantly impacted by the current interest rate and economic environments, as adjustments have been made to critical model inputs with regards to traditional interest rate relationships. This is especially important as it relates to floating rate commercial loans, which comprise a sizable portion of our balance sheet.

In addition to changes in interest rates, the level of future net interest income is also dependent on a number of other variables, including: the growth, composition and absolute levels of loans, deposits, and other earning assets and interest-bearing liabilities; level of nonperforming assets; economic and competitive conditions; potential changes in lending, investing, and deposit gathering strategies; client preferences; and other factors.

#### Item 4. Controls and Procedures

As of March 31, 2017, an evaluation was performed under the supervision of and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of March 31, 2017.

There have been no changes in our internal control over financial reporting during the quarter ended March 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## MERCANTILE BANK CORPORATION

**PART II – OTHER INFORMATION****Item 1. Legal Proceedings.**

From time to time, we may be involved in various legal proceedings that are incidental to our business. In our opinion, we are not a party to any current legal proceedings that are material to our financial condition, either individually or in the aggregate.

**Item 1A. Risk Factors.**

There have been no material changes in our risk factors from those previously disclosed in our annual report on Form 10-K for the year ended December 31, 2016, and incorporated therein by reference.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

We made no unregistered sales of equity securities during the quarter ended March 31, 2017.

**Issuer Purchases of Equity Securities**

We announced on January 30, 2015 that our Board of Directors had authorized a new program to repurchase up to \$20.0 million of our common stock from time to time in open market transactions at prevailing market prices or by other means in accordance with applicable regulations. On April 19, 2016, we announced a \$15.0 million expansion of the stock repurchase plan. No shares of our common stock were repurchased during the first quarter of 2017.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares or Approximate Dollar Value that May Yet Be Purchased Under the Plans or Programs
January 1 - 31	0	\$ NA	0	\$ 15,505,000
February 1 - 28	0	NA	0	15,505,000
March 1 - 31	0	NA	0	15,505,000
Total	0	\$ NA	0	\$ 15,505,000

**Item 3. Defaults Upon Senior Securities.**

Not applicable.

**Item 4. Mine Safety Disclosures.**

Not applicable.

**Item 5. Other Information.**

Not applicable.

## **Section 2: EX-31 (EXHIBIT 31)**

**EXHIBIT 31**

**RULE 13a-14(a) CERTIFICATIONS**

I, Robert B. Kaminski, Jr., President and Chief Executive Officer of Mercantile Bank Corporation, certify that:

1. I have reviewed this report on Form 10-Q of Mercantile Bank Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: May 5, 2017

/s/ Robert B. Kaminski, Jr.

Robert B. Kaminski, Jr.

President and Chief Executive Officer

I, Charles E. Christmas, Executive Vice President, Chief Financial Officer and Treasurer of Mercantile Bank Corporation, certify that:

1. I have reviewed this report on Form 10-Q of Mercantile Bank Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## Section 3: EX-32.1 (EXHIBIT 32.1)

### EXHIBIT 32.1

**CERTIFICATION PURSUANT TO  
18 U.S.C. SECTION 1350,  
AS ADOPTED PURSUANT TO  
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

This certification is provided pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. § 1350, and accompanies the quarterly report on Form 10-Q for the quarter ended March 31, 2017 (the "Form 10-Q") of Mercantile Bank Corporation (the "Issuer").

I, Robert B. Kaminski, Jr., President and Chief Executive Officer of the Issuer, certify that to my knowledge:

- (i) the Form 10-Q fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934; and
- (ii) the information contained in the Form 10-Q fairly presents, in all material respects, the financial condition and results of operations of the Issuer.

Dated: May 5, 2017
