MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

I. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation: The unaudited financial statements for the *six* months ended *June 30, 2020* include the consolidated results of operations of Mercantile Bank Corporation and its consolidated subsidiaries. These subsidiaries include Mercantile Bank of Michigan (“our bank”) and our bank’s *two* subsidiaries, Mercantile Bank Real Estate Co., LLC and Mercantile Insurance Center, Inc. These consolidated financial statements have been prepared in accordance with the instructions for Form 10-Q and Item 303(b) of Regulation S-K and do *not* include all disclosures required by accounting principles generally accepted in the United States of America for a complete presentation of our financial condition and results of operations. In the opinion of management, the information reflects all adjustments (consisting only of normal recurring adjustments) which are necessary in order to make the financial statements *not* misleading and for a fair presentation of the results of operations for such periods. The results for the period ended *June 30, 2020* should *not* be considered as indicative of results for a full year. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended *December 31, 2019*.

We have five separate business trusts that were formed to issue trust preferred securities. Subordinated debentures were issued to the trusts in return for the proceeds raised from the issuance of the trust preferred securities. The trusts are *not* consolidated, but instead we report the subordinated debentures issued to the trusts as a liability.

Earnings Per Share: Basic earnings per share is based on the weighted average number of common shares and participating securities outstanding during the period. Diluted earnings per share include the dilutive effect of additional potential common shares issuable under our stock-based compensation plans and are determined using the treasury stock method. Our unvested restricted shares, which contain non-forfeitable rights to dividends whether paid or accrued (i.e., participating securities), are included in the number of shares outstanding for both basic and diluted earnings per share calculations. In the event of a net loss, our unvested restricted shares are excluded from the calculation of both basic and diluted earnings per share.

Approximately 256,000 unvested restricted shares were included in determining both basic and diluted earnings per share for the *three* and *six* months ended *June 30, 2020*. In addition, stock options for approximately 2,000 shares of common stock were included in determining diluted earnings per share for the *three* and *six* months ended *June 30, 2020*. Stock options for approximately 9,000 shares of common stock were antidilutive and *not* included in determining diluted earnings per share for the *three* and *six* months ended *June 30, 2020*.

Approximately 261,000 unvested restricted shares were included in determining both basic and diluted earnings per share for the *three* and *six* months ended *June 30, 2019*. In addition, stock options for approximately 10,000 shares of common stock were included in determining diluted earnings per share for the *three* and *six* months ended *June 30, 2019*. Stock options for approximately 7,000 shares of common stock were antidilutive and *not* included in determining diluted earnings per share for the *three* and *six* months ended *June 30, 2019*.

Securities: Debt securities classified as held to maturity are carried at amortized cost when management has the positive intent and ability to hold them to maturity. Debt securities are classified as available for sale when they might be sold prior to maturity. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in other comprehensive income, net of tax. Federal Home Loan Bank stock is carried at cost.

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interest income includes amortization of purchase premiums and accretion of discounts. Premiums and discounts on securities are amortized or accreted on the level-yield method without anticipating prepayments, except for mortgage-backed securities where prepayments are anticipated. Gains and losses on sales are recorded on the trade date and determined using the specific identification method.

Declines in the fair value of debt securities below their amortized cost that are other-than-temporary impairment (“OTTI”) are reflected in earnings or other comprehensive income, as appropriate. For those debt securities whose fair value is less than their amortized cost, we consider our intent to sell the security, whether it is more likely than *not* that we will be required to sell the security before recovery and whether we expect to recover the entire amortized cost of the security based on our assessment of the issuer’s financial condition. In analyzing an issuer’s financial condition, we consider whether the securities are issued by the federal government or its agencies, and whether downgrades by bond rating agencies have occurred. If either of the criteria regarding intent or requirement to sell is met, the entire difference between amortized cost and fair value is recognized as impairment through earnings. For debt securities that do *not* meet the aforementioned criteria, the amount of impairment is split into *two* components as follows: 1) OTTI related to credit loss, which must be recognized in the income statement, and 2) OTTI related to other factors, such as liquidity conditions in the market or changes in market interest rates, which is recognized in other comprehensive income. The credit loss is defined as the difference between the present value of the cash flows expected to be collected and the amortized cost.

Loans: Loans that we have the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal balance outstanding, net of deferred loan fees and costs and an allowance for loan losses. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method without anticipating prepayments.

Interest income on commercial loans and mortgage loans is discontinued at the time the loan is 90 days delinquent unless the loan is well-secured and in process of collection. Consumer and credit card loans are typically charged off *no* later than when they are 120 days past due. Past due status is based on the contractual terms of the loan. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal and interest is considered doubtful.

All interest accrued but *not* received for loans placed on nonaccrual is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Loans Held for Sale: Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market, as determined by outstanding commitments from investors. Net unrealized losses, if any, are recorded as a valuation allowance and charged to earnings. As of *June 30, 2020* and *December 31, 2019*, we determined the fair value of our mortgage loans held for sale to be \$42.8 million and \$5.0 million, respectively. Loans held for sale are reported as part of our total loans on the balance sheet.

Mortgage loans held for sale are generally sold with servicing rights retained. Gains and losses on sales of mortgage loans are based on the difference between the selling price and the carrying value of the related loan sold, which is reduced by the cost allocated to the servicing right. We generally lock in the sale price to the purchaser of the loan at the same time we make an interest rate commitment to the borrower. These mortgage banking activities are *not* designated as hedges and are carried at fair value. The net gain or loss on mortgage banking derivatives is included in the gain on sale of loans. Mortgage loans serviced for others totaled approximately \$846 million and \$727 million as of *June 30, 2020*, and *December 31, 2019*, respectively.

(Continued)

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

I. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

Mortgage Banking Activities: Mortgage loan servicing rights, included in “other assets” on the consolidated balance sheet, are recognized as assets based on the allocated value of retained servicing rights on mortgage loans sold. Mortgage loan servicing rights are carried at the lower of amortized cost or fair value and are expensed in proportion to, and over the period of, estimated net servicing revenues. Impairment is evaluated based on the fair value of the rights using groupings of the underlying mortgage loans as to interest rates. Any impairment of a grouping is reported as a valuation allowance.

Servicing fee income is recorded for fees earned for servicing mortgage loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. Amortization of mortgage loan servicing rights is netted against mortgage loan servicing income and recorded in mortgage banking activities in the income statement.

Troubled Debt Restructurings: A loan is accounted for as a troubled debt restructuring if we, for economic or legal reasons, grant a concession to a borrower considered to be experiencing financial difficulties that we would *not* otherwise consider. A troubled debt restructuring *may* involve the receipt of assets from the debtor in partial or full satisfaction of the loan, or a modification of terms such as a reduction of the stated interest rate or balance of the loan, a reduction of accrued interest, an extension of the maturity date or renewal of the loan at a stated interest rate lower than the current market rate for a new loan with similar risk, or some combination of these concessions. Troubled debt restructurings can be in either accrual or nonaccrual status. Nonaccrual troubled debt restructurings are included in nonperforming loans. Accruing troubled debt restructurings are generally excluded from nonperforming loans as it is considered probable that all contractual principal and interest due under the restructured terms will be collected.

In accordance with current accounting guidance, loans modified as troubled debt restructurings are, by definition, considered to be impaired loans. Impairment for these loans is measured on a loan-by-loan basis similar to other impaired loans as described below under “Allowance for Loan Losses.” Certain loans modified as troubled debt restructurings *may* have been previously measured for impairment under a general allowance methodology (i.e., pooling), thus at the time the loan is modified as a troubled debt restructuring the allowance will be impacted by the difference between the results of these *two* measurement methodologies. Loans modified as troubled debt restructurings that subsequently default are factored into the determination of the allowance in the same manner as other defaulted loans.

The federal banking agencies issued an “*Interagency Statement on Loan Modifications and Reporting for Financial Institutions Working with Customers Affected by the Coronavirus*” on *March 22, 2020*, which was subsequently revised on *April 7, 2020*. This guidance encourages financial institutions to work prudently with borrowers that are or *may* be unable to meet their contractual obligations because of the effects of the Coronavirus. Pursuant to the guidance, the federal banking agencies have concluded, in consultation with FASB staff, that short-term modifications (e.g. *six months*) made on a good faith basis to borrowers who were current prior to any relief are *not* troubled debt restructurings. This guidance complements Section 4013 of the CARES Act, which specified that Coronavirus-related modifications made on loans that were current as of *December 31, 2019* and that occur between *March 1, 2020* and the earlier of *60 days* after the date of termination of the National Emergency or *December 31, 2020*, as applicable, are *not* troubled debt restructurings.

(Unaudited)

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

In early *April 2020*, we developed internal programs of loan payment deferments for commercial and retail borrowers. For commercial borrowers, we offer 90-day (*three* payments) interest only amendments as well as 90-day (*three* payments) principal and interest payment deferments. Under the latter program, borrowers are extended a 12-month single payment note at 0% interest in an amount equal to *three* payments, with loan proceeds used to make the scheduled payments. As of *June 30, 2020*, we had processed 463 interest only amendments with loan balances aggregating \$421 million and 242 principal and interest payment deferments with loan balances totaling \$298 million and resulting single payment loans aggregating \$8.1 million. The single payment notes receive a loan grade equal to the current loan grade of each respective borrowing relationship. For retail borrowers, we offer 90-day (*three* payments) principal and interest payment deferments, with deferred amounts added to the end of the loan. As of *June 30, 2020*, we had processed 260 principal and interest payment deferments with loan balances totaling \$23.8 million. These payment deferral transactions largely applied to the borrowers' *April, May* and *June* of 2020 loan payments.

We have also had some instances where commercial borrowers have subsequently requested and received an additional 90-day (*three* payments) interest only amendment or 90-day (*three* payments) principal and interest payment deferment. Under the latter program, the amount equal to the *three* payments is added to the original deferment note which has *nine* months remaining to maturity; however, the original 0% interest rate is modified to equal the rate associated with each borrower's traditional lending relationship with us for the remainder of the term. As of *July 31, 2020*, we had processed an additional 16 interest only amendments with loan balances aggregating \$31.0 million and 21 principal and interest payment deferments with loan balances totaling \$117 million and resulting single payment loans aggregating \$4.2 million. Additional 90-day (*three* payments) principal and interest payment deferments for retail borrowers have been nominal with loan balances aggregating less than \$2.0 million through *July 31, 2020*.

Allowance for Loan Losses: The allowance for loan losses ("allowance") is a valuation allowance for probable incurred credit losses. Loan losses are charged against the allowance when we believe the uncollectability of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance. We estimate the allowance balance required using past loan loss experience, the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions and other factors. Allocations of the allowance *may* be made for specific loans, but the entire allowance is available for any loan that, in our judgment, should be charged-off.

A loan is considered to be impaired when, based on current information and events, it is probable we will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Factors considered in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are *not* classified as impaired. We determine the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of delay, the reasons for delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of collateral if the loan is collateral dependent.

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial institutions are *not* required to comply with the Current Expected Credit Loss (“CECL”) methodology requirements from the enactment date of the CARES Act until the earlier of the end of the President’s declaration of a National Emergency or *December 31, 2020*. An economic forecast is a key component of the CECL methodology. As we continue to experience an unprecedented economic environment whereby a sizable portion of the economy has been significantly impacted by shelter in place declarations and similar reactions by businesses and individuals, substantial government stimulus has been provided to businesses, individuals and state and local governments and financial institutions have offered businesses and individuals payment relief options, economic forecasts are regularly revised and there continues to be *no* economic forecast consensus. Given the high degree of uncertainty surrounding economic forecasting, we have elected to postpone the adoption of CECL, and will continue to use our incurred loan loss reserve model as permitted.

Derivatives: Derivative financial instruments are recognized as assets or liabilities at fair value. The accounting for changes in the fair value of derivatives depends on the use of the derivatives and whether the derivatives qualify for hedge accounting. Used as part of our asset and liability management to help manage interest rate risk, our derivatives have generally consisted of interest rate swap agreements that qualified for hedge accounting. We do *not* use derivatives for trading purposes.

Changes in the fair value of derivatives that are designated, for accounting purposes, as a hedge of the variability of cash flows to be received on various assets and liabilities and are effective are reported in other comprehensive income. They are later reclassified into earnings in the same periods during which the hedged transaction affects earnings and are included in the line item in which the hedged cash flows are recorded. If hedge accounting does *not* apply, changes in the fair value of derivatives are recognized immediately in current earnings as interest income or expense.

If designated as a hedge, we formally document the relationship between the derivatives and hedged items, as well as the risk-management objective and the strategy for undertaking hedge transactions. This documentation includes linking cash flow hedges to specific assets and liabilities on the balance sheet. If designated as a hedge, we also formally assess, both at the hedge’s inception and on an ongoing basis, whether the derivative instruments that are used are highly effective in offsetting changes in cash flows of the hedged items. Ineffective hedge gains and losses are recognized immediately in current earnings as noninterest income or expense. We discontinue hedge accounting when we determine the derivative is *no* longer effective in offsetting changes in the cash flows of the hedged item, the derivative is settled or terminates, or treatment of the derivative as a hedge is *no* longer appropriate or intended.

Goodwill and Core Deposit Intangible: Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified. A more frequent assessment is performed should events or changes in circumstances indicate the carrying value of the goodwill *may not* be recoverable. We *may* elect to perform a qualitative assessment for the annual impairment test. If the qualitative assessment indicates it is more likely than *not* that the fair value of a reporting unit is less than its carrying amount, or if we elect *not* to perform a qualitative assessment, then we would be required to perform a quantitative test for goodwill impairment. If the estimated fair value of the reporting unit is less than the carrying value, goodwill is impaired and is written down to its estimated fair value. In *2019*, we elected to perform a qualitative assessment for our annual impairment test and concluded it was more likely than *not* our fair value was greater than its carrying amount; therefore, *no* further testing was required.

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Due to current stressed economic and market conditions, we assessed goodwill for impairment as of *March 31, 2020* and *June 30, 2020*. For *March 31, 2020*, we used a discounted income approach and a market valuation model, which compared the inherent value of our company to valuations of recent transactions in the market place to determine if our goodwill had been impaired. It was determined goodwill was *not* impaired as of *March 31, 2020*. For *June 30, 2020*, we used the *Step 0* methodology for which we assessed the macro and microeconomic conditions, industry and market conditions, financial performance, and our underlying stock performance. We concluded it was more likely than *not* our fair value was greater than its carrying amount; therefore, no further testing was required.

The core deposit intangible that arose from the Firstbank Corporation acquisition was initially measured at fair value and is being amortized into noninterest expense over a ten-year period using the sum-of-the-years-digits methodology.

Revenue from Contracts with Customers: We record revenue from contracts with customers in accordance with Accounting Standards Codification Topic 606, “*Revenue from Contracts with Customers*” (“Topic 606”). Under Topic 606, we must identify the contract with a customer, identify the performance obligations in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract, and recognize revenue when (or as) we satisfy a performance obligation. Significant revenue has *not* been recognized in the current reporting period that results from performance obligations satisfied in previous periods.

Our primary sources of revenue are derived from interest and dividends earned on loans, securities and other financial instruments that are *not* within the scope of Topic 606. We have evaluated the nature of our contracts with customers and determined that further disaggregation of revenue from contracts with customers into more granular categories beyond what is presented in the Consolidated Statements of Income was *not* necessary. We generally satisfy our performance obligations on contracts with customers as services are rendered, and the transaction prices are typically fixed and charged either on a periodic basis (generally monthly) or based on activity. Because performance obligations are satisfied as services are rendered and the transaction prices are fixed, there is little judgment involved in applying Topic 606 that significantly affects the determination of the amount and timing of revenue from contracts with customers.

Recent Events: The U.S. economy deteriorated rapidly during the latter part of the *first* quarter and into the *second* quarter of 2020 due to the ongoing pandemic of coronavirus disease 2019 (“COVID-19”) caused by severe acute respiratory syndrome coronavirus 2 (the “Coronavirus Pandemic”). COVID-19 is primarily spread between people during close contact, often via small droplets produced by coughing, sneezing or talking. People *may* also become infected by touching a contaminated surface and then touching their eyes, nose or mouth. There is currently *no* known vaccine or specific antiviral treatment, with the primary treatment being symptomatic and supportive therapies. Recommended preventive measures include hand washing, covering one’s mouth when coughing and maintaining distance from other people, as well as self-isolation for people who suspect they are infected.

The outbreak was initially identified in Wuhan, China in *December 2019*. The World Health Organization declared the outbreak to be a Public Health Emergency Concern on *January 30, 2020*, and then recognized it as a pandemic on *March 11, 2020*. The *first* known case in the United States was identified in the State of Washington on *January 20, 2020*. The White House Coronavirus Task Force was established on *January 29, 2020*. President Trump declared a Public Health Emergency on *January 31, 2020*, which was elevated by the President’s declaration of a National Emergency on *March 13, 2020* (the “National Emergency”).

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Coronavirus Pandemic has caused severe global socioeconomic disruptions. It has led to the postponement or cancellation of sporting, religious, political and cultural events, as well as widespread supply shortages exacerbated by panic buying. Service industry businesses, such as restaurants, hotels, airlines, cruise lines and movie theaters, have been particularly negatively impacted by the restrictions and stay-at-home orders issued by authorities around a vast majority of the world. The health care industry has also been significantly impacted, from a combination of treating infected patients to the cancellation of medical appointments and elective surgeries. At the current time, it is highly uncertain as to when conditions will begin to return to normal. Most agree that a return to normal conditions will be accomplished in phases, taking into account factors such as regional rates and trends of infections, types of businesses and required social distancing measures. Human behavior will also likely play a significant role as people make individual choices to re-engage in permissible activities.

The *first* known case in the State of Michigan was identified on *March 10, 2020*, which triggered a State of Emergency response from Governor Whitmer. Soon thereafter, Governor Whitmer ordered the closure of all K-12 school buildings until early *April*, which was later amended to suspend all face-to-face instruction for the remainder of the *2019-2020* school year. In mid-*March*, Governor Whitmer ordered all bars, restaurants, entertainment venues and other similar businesses to partially close for *two* weeks, and banned all gatherings of more than *50* people for the period of mid-*March* into early *April*. On *March 24, 2020*, Governor Whitmer issued a state-wide stay-at-home order limiting all non-essential travel and discontinuing all non-essential business services and operations. The order was originally set to expire on *April 13, 2020*; however, the order was extended, and expanded with additional restrictions, until *April 30, 2020*. On *April 24, 2020*, Governor Whitmer issued an amended stay-at-home order that was scheduled to expire on *May 15, 2020* to replace the stay-at-home order that was scheduled to expire on *April 30, 2020*. On *May 7, 2020*, Governor Whitmer issued an amended stay-at-home order that expired on *May 28, 2020* to replace the stay-at-home order that was scheduled to expire on *May 15, 2020*. The amended orders reduced some of the restrictions from the previous orders, permitting certain activities in limited or restricted capacities. The stay-at-home order was lifted effective *June 5, 2020*; however, restrictions on indoor and outdoor gatherings remain, businesses are required to ensure CDC-recommended guidelines are followed and certain industries remain significantly impacted. An increase in COVID-19 cases in Michigan near the end of the *second* quarter and into the *third* quarter has temporarily delayed further re-opening activities, and Governor Whitmer has indicated a willingness to reinstitute restrictions on activities of businesses and consumers.

Responding to the Coronavirus Pandemic and Governor Whitmer's stay-at-home orders, by *March 23, 2020*, over 75% of our employees were working from home. In addition, beginning on *March 18, 2020* our branch lobbies were allowing face-to-face contact with customers by appointment only. On *March 25, 2020*, we enhanced our social distancing response by closing our branch lobbies to all customers, with all banking transactions conducted via drive-thru, virtual banking machines, online banking and our call center. We have developed comprehensive social distancing guidelines and associated protocols using information provided by the CDC and other federal and state government agencies, and started to return our employees to their work locations in mid-*June*. On *June 26, 2020*, we re-opened our branch lobbies, and virtually all of our employees were back to their physical work locations by *July 1, 2020*.

In response to the substantial negative impact of the Coronavirus Pandemic and the associated social distancing orders and measures on the United States and global economies, Congress passed the Coronavirus Aid, Relief and Economic Security Act ("CARES Act"), which was signed by President Trump on *March 27, 2020*. The CARES Act is in large part a \$1.8 trillion spending bill that builds upon *two* earlier and considerably smaller federal government support measures in the wake of the Coronavirus Pandemic and associated economic fallout. The CARES Act is comprehensive and touches on many facets of federal government assistance and banking regulatory requirements. In addition, the Federal Open Market Committee lowered the targeted federal funds rate by 50 basis points on *March 3, 2020* and by another 100 basis points on *March 15, 2020*, and announced the resumption of quantitative easing.

(Continued)

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Coronavirus Pandemic is a highly unusual, unprecedented and evolving public health and economic crisis and *may* have a negative material impact on our financial condition and results of operations. We are in an asset-sensitive position, whereby interest rate environments characterized by numerous and/or high magnitude interest rate reductions have a negative impact on our net interest income and net income. Additionally, the consequences of the unprecedented economic impact of the Coronavirus Pandemic are likely to result in declining asset quality, reflected by a higher level of loan delinquencies and loan charge-offs, as well as downgrades of commercial lending relationships, which will necessitate additional provisions for our allowance and reduced net income.

The Paycheck Protection Program (“PPP”) reflects a substantial expansion of the Small Business Administration’s 100% guaranteed 7(a) loan program. The CARES Act authorized up to \$350 billion in loans to businesses with fewer than 500 employees, including non-profit organizations, tribal business concerns, self-employed and individual contractors. The PPP provides 100% guaranteed loans to cover specific operating costs, with the maximum loan size capped at the lesser of 250% of the average monthly payroll costs or \$10.0 million. PPP loans are eligible to be forgiven based upon certain criteria. In general, the amount of the loan that is forgivable is the sum of the payroll costs, interest payments on mortgages, rent and utilities incurred or paid by the business during a prescribed period beginning on the loan origination date. Any remaining balance after forgiveness is maintained at the 100% guarantee for the duration of the loan. The loan tenor is 24 months for loans originated prior to June 5, 2020 and 60 months for loans originated on or after June 5, 2020. Loans originated prior to June 5, 2020 can be modified to a tenor of 60 months upon the mutual agreement of the lender and borrower. To date, we have *not* modified the maturity date of any loans made prior to June 5, 2020. The interest rate on the loan is fixed at 1.00%, with the financial institution receiving a loan origination fee ranging from 1% to 5% of the loan amount paid by the Small Business Administration. The loan origination fees, net of the direct origination costs, totaled \$14.7 million during the *second* quarter of 2020 and are being accreted into interest income on loans using the level yield methodology. The program was originally scheduled to end on June 30, 2020, but was recently modified to now end effective August 8, 2020. Participation in the PPP has had a significant impact on the composition of our loan and deposit portfolios and our net interest income starting during the *second* quarter of 2020, which is expected to remain for at least most of the remainder of 2020. As of July 31, 2020, we had originated almost 2,200 loans aggregating \$550 million under the PPP.

Congress passed, and on April 24, 2020 President Trump signed, legislation which added \$300 billion to the PPP. Included in the legislation was a specific allocation of \$30 billion for financial institutions under \$10 billion.

Under the CARES Act, a PPP loan is assigned a risk weight of 0% under the risk-based capital rules of the federal banking agencies. On April 9, 2020, the federal banking agencies issued an interim final rule allowing financial institutions to exclude PPP loans from the average asset calculation to the degree the PPP loans are financed through the Paycheck Protection Program Lending Facility (“PPPLF”) for the Tier 1 Leverage Capital Ratio.

In April, 2020, the Federal Reserve initiated the PPPLF, which is designed to facilitate lending by financial institutions to small businesses under the PPP. Only PPP loans are eligible to serve as collateral for the PPPLF, with each dollar of PPP loans providing *one* dollar of advance availability. The maturity date of an extension of credit under the PPPLF will equal the maturity date of the pool of PPP loans pledged to secure the extension of credit. Any principal payments received by the financial institution on the PPP loans, such as PPP loan forgiveness payments from the Small Business Administration or principal payments from the borrower after the initial *six*-month deferment period, must be used to pay down the PPPLF advance by the same dollar amount, maintaining the dollar-for-dollar advance amount and PPP aggregate loan balance relationship. The interest rate on PPPLF advances is fixed at 0.35%. *No* PPPLF advances can be obtained after September 30, 2020. We obtained a PPPLF advance in the amount of \$43.7 million in late April 2020 and paid it off in full in early June 2020. As of June 30, 2020, we had no advances outstanding under the PPPLF. We *may* obtain additional PPPLF advances as our borrowers utilize PPP loan proceeds for permissible purposes.

I. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Adoption of New Accounting Standards: In February 2016, the FASB issued ASU 2016-02, *Leases*. This ASU (as subsequently amended by ASU 2018-01, ASU 2018-10, ASU 2018-11 and ASU 2018-20) establishes a right-of-use (“ROU”) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The ASU was effective for annual and interim periods beginning after December 15, 2018. The adoption of this new standard as of January 1, 2019 resulted in the recording of a ROU asset and associated lease liability of approximately \$1.3 million.

In June 2016, the FASB issued ASU No. 2016-13, *Measurement of Credit Losses on Financial Instruments*. This ASU (as subsequently amended by ASU 2018-19) significantly changes how entities will measure credit losses for most financial assets and certain other instruments that are *not* measured at fair value through net income. The standard will replace the current “incurred loss” approach with an “expected loss” model. The new model, referred to as the current expected credit loss (“CECL”) model, will apply to: (i) financial assets subject to credit losses and measured at amortized cost, and (ii) certain off-balance sheet credit exposures. This includes, but is *not* limited to, loans, leases, held-to-maturity securities, loan commitments and financial guarantees. The ASU also simplifies the accounting model for purchased credit-impaired debt securities and loans, and expands the disclosure requirements regarding an entity’s assumptions, models, and methods for estimating the allowance for loan and lease losses. In addition, entities will need to disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. This ASU is effective for interim and annual reporting periods beginning after December 15, 2019.

Financial institutions are *not* required to comply with the CECL methodology requirements from the enactment date of the CARES Act until the earlier of the end of the National Emergency or December 31, 2020. We elected to postpone CECL adoption as permitted. An economic forecast is a key component of the CECL methodology. As we continue to experience an unprecedented economic environment whereby a sizable portion of the economy has been significantly impacted by shelter in place declarations and similar reactions by businesses and individuals, substantial government stimulus has been provided to businesses, individuals and state and local governments, and financial institutions have offered businesses and individuals payment relief options, economic forecasts are regularly updated and there is *no* economic forecast consensus. Given the high degree of uncertainty surrounding economic forecasting, we have elected to postpone the adoption of CECL, and will continue to use our incurred loan loss reserve model as permitted. Had we adopted CECL on January 1, 2020, the allowance would have decreased by \$1.0 million, resulting in an increase to retained earnings of \$0.8 million.

We evaluate securities for other-than-temporary impairment at least on a quarterly basis. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability we have to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. For those securities whose fair value is less than their amortized cost basis, we also consider our intent to sell the security, whether it is more likely than *not* that we will be required to sell the security before recovery and if we do *not* expect to recover the entire amortized cost basis of the security. In analyzing an issuer's financial condition, we *may* consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred and the results of reviews of the issuer's financial condition.

At *June 30, 2020*, ten debt securities with fair values totaling \$16.4 million have unrealized losses aggregating less than \$0.1 million. After we considered whether the securities were issued by the federal government or its agencies and whether downgrades by bond rating agencies had occurred, we determined that the unrealized losses were due to changing interest rate environments. As we do *not* intend to sell our debt securities before recovery of their cost basis and we believe it is more likely than *not* that we will *not* be required to sell our debt securities before recovery of the cost basis, no unrealized losses are deemed to be other-than-temporary.

The amortized cost and fair value of debt securities at *June 30, 2020*, by maturity, are shown in the following table. The contractual maturity is utilized for U.S. Government agency debt obligations and municipal bonds. Expected maturities *may* differ from contractual maturities because borrowers *may* have the right to call or prepay obligations with or without call or prepayment penalties. Securities *not* due at a single maturity date, primarily mortgage-backed securities, are shown separately. Weighted average yields are also reflected, with yields for municipal securities shown at their tax equivalent yield.

2. **SECURITIES** (Continued)

	Weighted Average Yield	Amortized Cost	Fair Value
Due in 2020	4.11%	\$ 410,000	\$ 412,000
Due in 2021 through 2025	1.97	60,097,000	61,369,000
Due in 2026 through 2030	2.13	133,632,000	137,347,000
Due in 2031 and beyond	2.64	70,554,000	72,000,000
Mortgage-backed securities	2.57	34,765,000	36,033,000
Other investments	4.50	500,000	500,000
Total available for sale securities	2.27%	<u>\$ 299,958,000</u>	<u>\$ 307,661,000</u>

Securities issued by the State of Michigan and all its political subdivisions had a combined amortized cost of \$98.5 million and \$96.5 million at *June 30, 2020* and *December 31, 2019*, respectively, with estimated market values of \$104 million and \$99.4 million, respectively. Securities issued by all other states and their political subdivisions had a combined amortized cost of \$4.6 million and \$5.9 million at *June 30, 2020* and *December 31, 2019*, respectively, with estimated market values of \$4.6 million and \$5.9 million, respectively. Total securities of any other specific issuer, other than the U.S. Government and its agencies and the State of Michigan and all its political subdivisions, did *not* exceed 10% of shareholders' equity.

The carrying value of U.S. Government agency debt obligations and mortgage-backed securities that are pledged to secure repurchase agreements was \$168 million and \$103 million at *June 30, 2020* and *December 31, 2019*, respectively. Investments in Federal Home Loan Bank stock are restricted and *may* only be resold or redeemed by the issuer.

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES**

Loans originated for investment are stated at their principal amount outstanding adjusted for partial charge-offs, the allowance, and net deferred loan fees and costs. Interest income on loans is accrued over the term of the loans primarily using the simple interest method based on the principal balance outstanding. Interest is *not* accrued on loans where collectability is uncertain. Accrued interest is presented separately in the consolidated balance sheet. Loan origination fees and certain direct costs incurred to extend credit are deferred and amortized over the term of the loan or loan commitment period as an adjustment to the related loan yield.

Commercial	\$ 10,674,000	\$ 10,604,000	\$ 1,184,000	\$ 23,834,000	\$ 22,315,000
Retail	5,411,000	4,018,000	439,000	4,772,000	4,771,000
Total impaired loans	<u>\$ 16,085,000</u>	<u>\$ 14,622,000</u>	<u>\$ 1,623,000</u>	<u>\$ 28,606,000</u>	<u>\$ 27,086,000</u>

Impaired loans for which *no* allocation of the allowance for loan losses has been made generally reflect situations whereby the loans have been charged-down to estimated fair value. Interest income recognized on accruing troubled debt restructurings totaled \$0.4 million and \$0.2 million during the *second* quarters of 2020 and 2019, respectively, and \$0.6 million and \$0.5 million during the *first six* months of 2020 and 2019, respectively. No interest income was recognized on nonaccrual loans during the *second* quarter and *first six* months of 2020 or during the respective 2019 periods. Lost interest income on nonaccrual loans totaled less than \$0.1 million during the *second* quarters of 2020 and 2019, and \$0.1 million and less than \$0.1 million during the *first six* months of 2020 and 2019, respectively.

3. LOANS AND ALLOWANCE FOR LOAN LOSSES (Continued)

Credit Quality Indicators. We utilize a comprehensive grading system for our commercial loans. All commercial loans are graded on a *ten* grade rating system. The rating system utilizes standardized grade paradigms that analyze several critical factors such as cash flow, operating performance, financial condition, collateral, industry condition and management. All commercial loans are graded at inception and reviewed and, if appropriate, re-graded at various intervals thereafter. The risk assessment for retail loans is primarily based on the type of collateral.

Credit quality indicators were as follows as of *June 30, 2020*:

Commercial credit exposure – credit risk profiled by internal credit risk grades:

	Commercial and Industrial	Commercial Vacant Land, Land Development, and Residential Construction	Commercial Real Estate - Owner Occupied	Commercial Real Estate - Non-Owner Occupied	Commercial Real Estate - Multi-Family and Residential Rental
Internal credit risk grade groupings:					
Grades 1 – 4 ⁽¹⁾	\$ 1,008,010,000	\$ 21,500,000	\$ 309,221,000	\$ 545,764,000	\$ 73,394,000
Grades 5 – 7	289,342,000	30,914,000	253,695,000	294,423,000	58,461,000
Grades 8 – 9	10,103,000	570,000	4,705,000	958,000	192,000
Total commercial	<u>\$ 1,307,455,000</u>	<u>\$ 52,984,000</u>	<u>\$ 567,621,000</u>	<u>\$ 841,145,000</u>	<u>\$ 132,047,000</u>

Retail credit exposure – credit risk profiled by collateral type:

	Retail Home Equity and Other	Retail 1-4 Family Mortgages
Performing	64,493,000	364,695,000
Nonperforming	250,000	2,366,000
Total retail	<u>\$ 64,743,000</u>	<u>\$ 367,061,000</u>

(1) Included in Commercial and Industrial Loans Grades 1 – 4 are \$549 million of loans originated under the Paycheck Protection Program.

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

All commercial loans are graded using the following criteria:

- Grade 1. “Exceptional” Loans with this rating contain very little, if any, risk.
- Grade 2. “Outstanding” Loans with this rating have excellent and stable sources of repayment and conform to bank policy and regulatory requirements.
- Grade 3. “Very Good” Loans with this rating have strong sources of repayment and conform to bank policy and regulatory requirements. These are loans for which repayment risks are acceptable.
- Grade 4. “Good” Loans with this rating have solid sources of repayment and conform to bank policy and regulatory requirements. These are loans for which repayment risks are modest.
- Grade 5. “Acceptable” Loans with this rating exhibit acceptable sources of repayment and conform with most bank policies and all regulatory requirements. These are loans for which repayment risks are satisfactory.
- Grade 6. “Monitor” Loans with this rating are considered to have emerging weaknesses which *may* include negative current cash flow, high leverage, or operating losses. Generally, if further deterioration is observed, these credits will be downgraded to the criticized asset report.
- Grade 7. “Special Mention” Loans with this rating have potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses *may* result in deterioration of the repayment prospects for the loan at some future date.
- Grade 8. “Substandard” Loans with this rating are inadequately protected by current sound net worth, paying capacity of the obligor, or of the pledged collateral, if any. A Substandard loan normally has *one* or more well-defined weaknesses that jeopardize the repayment of the debt. They are characterized by the distinct possibility of loss if the deficiencies are *not* corrected.
- Grade 9. “Doubtful” Loans with this rating exhibit all the weaknesses inherent in the Substandard classification and where collection or liquidation in full is highly questionable and improbable.
- Grade 10. “Loss” Loans with this rating are considered uncollectable, and of such little value that continuance as an active asset is *not* warranted.

The primary risk elements with respect to commercial loans are the financial condition of the borrower, the sufficiency of collateral, and timeliness of scheduled payments. We have a policy of requesting and reviewing periodic financial statements from commercial loan customers and employ a disciplined and formalized review of the existence of collateral and its value. The primary risk element with respect to each residential real estate loan and consumer loan is the timeliness of scheduled payments. We have a reporting system that monitors past due loans and have adopted policies to pursue creditors’ rights in order to preserve our collateral position.

3. **LOANS AND ALLOWANCE FOR LOAN LOSSES** (Continued)

The allowance related to loans categorized as troubled debt restructurings was as follows:

	June 30, 2020	December 31, 2019
Commercial:		
Commercial and industrial	\$ 946,000	\$ 202,000
Vacant land, land development, and residential construction	0	0
Real estate – owner occupied	2,000	982,000
Real estate – non-owner occupied	3,000	0
Real estate – multi-family and residential rental	0	0
Total commercial	951,000	1,184,000
Retail:		
Home equity and other	288,000	311,000
1-4 family mortgages	154,000	83,000
Total retail	442,000	394,000
Total related allowance	\$ 1,393,000	\$ 1,578,000

In general, our policy dictates that a renewal or modification of an 8- or 9-rated commercial loan meets the criteria of a troubled debt restructuring, although we review and consider all renewed and modified loans as part of our troubled debt restructuring assessment procedures. Loan relationships rated 8 contain significant financial weaknesses, resulting in a distinct possibility of loss, while relationships rated 9 reflect vital financial weaknesses, resulting in a highly questionable ability on our part to collect principal. We believe borrowers warranting such ratings would have difficulty obtaining financing from other market participants. Thus, due to the lack of comparable market rates for loans with similar risk characteristics, we believe 8- or 9-rated loans renewed or modified were done so at below market rates. Loans that are identified as troubled debt restructurings are considered impaired and are individually evaluated for impairment when assessing these credits in our allowance for loan losses calculation.

4. **PREMISES AND EQUIPMENT, NET**

Premises and equipment are comprised of the following:

	June 30, 2020	December 31, 2019
Land and improvements	\$ 17,218,000	\$ 17,039,000
Buildings	55,580,000	52,847,000
Furniture and equipment	21,790,000	22,712,000
	94,588,000	92,598,000
Less: accumulated depreciation	35,433,000	35,271,000
Premises and equipment, net	\$ 59,155,000	\$ 57,327,000

Depreciation expense totaled \$1.3 million and \$0.9 million during the *second* quarters of 2020 and 2019, respectively. Depreciation expense totaled \$2.5 million during the *first six* months of 2020, compared to \$1.9 million during the *first six* months of 2019.

5. **DEPOSITS**

Our total deposits at *June 30, 2020* totaled \$3.26 billion, an increase of \$572 million, or 21.3%, from *December 31, 2019*. The components of our outstanding balances at *June 30, 2020* and *December 31, 2019*, and percentage change in deposits from the end of 2019 to the end of the *second* quarter of 2020, are

as follows:

	June 30, 2020		December 31, 2019		Percent Increase (Decrease)
	Balance	%	Balance	%	
Noninterest-bearing demand	\$ 1,445,620,000	44.3%	\$ 924,916,000	34.4%	56.3%
Interest-bearing checking	382,522,000	11.7	332,373,000	12.3	15.1
Money market	541,929,000	16.6	509,368,000	18.9	6.4
Savings	301,881,000	9.2	269,318,000	10.0	12.1
Time, under \$100,000	178,838,000	5.5	198,123,000	7.4	(9.7)
Time, \$100,000 and over	334,781,000	10.3	322,827,000	12.0	3.7
Total local deposits	3,185,571,000	97.6	2,556,925,000	95.0	24.6
Out-of-area time, under \$100,000	0	NA	0	NA	NA
Out-of-area time, \$100,000 and over	76,709,000	2.4	133,459,000	5.0	(42.5)
Total out-of-area deposits	76,709,000	2.4	133,459,000	5.0	(42.5)
Total deposits	\$ 3,262,280,000	100.0%	\$ 2,690,384,000	100.0%	21.3%

Total time deposits of more than \$250,000 totaled \$289 million and \$320 million at *June 30, 2020* and *December 31, 2019*, respectively.

6. SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements to repurchase (“repurchase agreements”) are offered principally to certain large deposit customers. Information relating to our repurchase agreements follows:

	Six Months Ended June 30, 2020	Twelve Months Ended December 31, 2019
Outstanding balance at end of period	\$ 167,527,000	\$ 102,675,000
Average interest rate at end of period	0.10%	0.17%
Average daily balance during the period	\$ 123,486,000	\$ 105,234,000
Average interest rate during the period	0.13%	0.24%
Maximum daily balance during the period	\$ 167,527,000	\$ 133,411,000

Repurchase agreements generally have maturities of one business day. Repurchase agreements are treated as financings and the obligations to repurchase securities sold are reflected as liabilities. Securities involved with the agreements are recorded as assets of our bank and are held in safekeeping by a correspondent bank. Repurchase agreements are secured by securities with an aggregate market value equal to the aggregate outstanding balance.

7. FEDERAL HOME LOAN BANK OF INDIANAPOLIS ADVANCES

Federal Home Loan Bank of Indianapolis (“FHLBI”) advances totaled \$394 million at *June 30, 2020*, and mature at varying dates from *November 2021* through *June 2027*, with fixed rates of interest from 0.55% to 3.18% and averaging 2.06%. FHLBI advances totaled \$354 million at *December 31, 2019*, and were scheduled to mature at varying dates from *April 2020* through *June 2025*, with fixed rates of interest from 1.36% to 3.18% and averaging 2.45%. In *June 2020*, we executed a blend and extend transaction with the FHLBI to extend the duration of the FHLBI advance portfolio as part our interest rate risk management program. We prepaid *seven* advances aggregating \$70.0 million with maturities ranging from *August 2020* through *October 2021* and fixed interest rates from 1.36% to 2.84% and averaging 1.97%, using the proceeds from *seven* new advances aggregating \$70.0 million with maturities ranging from *June 2024* through *June 2027* and fixed interest rates from 0.55% to 1.18% and averaging 0.84%. Prepayment fees totaling \$0.9 million were embedded into the fixed rates on the newly obtained advances, equating to 0.22% of the 0.84% average rate of the new advances.

Each advance is payable at its maturity date and is subject to a prepayment fee if paid prior to the maturity date. The advances are collateralized by residential mortgage loans, *first* mortgage liens on multi-family residential property loans, *first* mortgage liens on commercial real estate property loans, and substantially all other assets of our bank, under a blanket lien arrangement. Our borrowing line of credit as of *June 30, 2020* totaled about \$775 million, with remaining availability based on collateral approximating \$375 million.

Maturities of currently outstanding FHLBI advances are as follows:

2020	\$	0
------	----	---

2021	20,000,000
2022	94,000,000
2023	80,000,000
2024	80,000,000
Thereafter	120,000,000

8. COMMITMENTS AND OFF-BALANCE SHEET RISK

Our bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Loan commitments to extend credit are agreements to lend to a customer as long as there is *no* violation of any condition established in the contract. Standby letters of credit are conditional commitments issued by our bank to guarantee the performance of a customer to a *third* party. Commitments generally have fixed expiration dates or other termination clauses and *may* require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do *not* necessarily represent future cash requirements.

These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized, if any, in the balance sheet. Our bank's maximum exposure to loan loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. Our bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. Collateral, such as accounts receivable, securities, inventory, and property and equipment, is generally obtained based on our credit assessment of the borrower. If required, estimated loss exposure resulting from these instruments is expensed and recorded as a liability. There was no liability balance for these instruments as of *June 30, 2020* and *December 31, 2019*.

A summary of the contractual amounts of our financial instruments with off-balance sheet risk at *June 30, 2020* and *December 31, 2019* follows:

	June 30, 2020	December 31, 2019
Commercial unused lines of credit	\$ 862,725,000	\$ 776,493,000
Unused lines of credit secured by 1 – 4 family residential properties	60,196,000	60,858,000
Credit card unused lines of credit	63,951,000	58,199,000
Other consumer unused lines of credit	23,080,000	18,135,000
Commitments to make loans	175,951,000	101,961,000
Standby letters of credit	21,427,000	22,798,000
	<u>\$ 1,207,330,000</u>	<u>\$ 1,038,444,000</u>

9. FAIR VALUES OF FINANCIAL INSTRUMENTS

The carrying amounts, estimated fair values and level within the fair value hierarchy of financial instruments were as follows as of *June 30, 2020* and *December 31, 2019* (dollars in thousands):

	Level in Fair Value Hierarchy	June 30, 2020		December 31, 2019	
		Carrying Values	Fair Values	Carrying Values	Fair Values
Financial assets:					
Cash	<i>Level 1</i>	\$ 18,930	\$ 18,930	\$ 16,430	\$ 16,430
Cash equivalents	<i>Level 2</i>	452,297	452,297	217,301	217,301
Securities available for sale	<i>(1)</i>	307,661	307,661	334,655	334,655
FHLBI stock	<i>(2)</i>	18,002	18,002	18,002	18,002

Loans, net	Level 3	3,259,673	3,346,702	2,827,800	2,887,168
Loans held for sale	Level 2	41,137	42,806	4,978	4,978
Mortgage servicing rights	Level 2	5,636	8,418	4,652	7,375
Accrued interest receivable	Level 2	9,290	9,290	9,944	9,944
Financial liabilities:					
Deposits	Level 2	3,262,280	3,237,888	2,690,384	2,600,452
Repurchase agreements	Level 2	167,527	167,527	102,675	102,675
FHLBI advances	Level 2	394,000	413,915	354,000	361,887
Subordinated debentures	Level 2	47,222	46,172	46,881	46,140
Accrued interest payable	Level 2	3,011	3,011	3,949	3,949

(1) See Note 10 for a description of the fair value hierarchy as well as a disclosure of levels for classes of financial assets and liabilities.

(2) It is *not* practical to determine the fair value of FHLBI stock due to transferability restrictions; therefore, fair value is estimated at carrying amount.

Carrying amount is the estimated fair value for cash and cash equivalents, FHLBI stock, accrued interest receivable and payable, noninterest-bearing checking accounts and securities sold under agreements to repurchase. Security fair values are based on market prices or dealer quotes, and if *no* such information is available, on the rate and term of the security and information about the issuer. Fair value for loans is based on an exit price model as required by ASU 2016-01, taking into account inputs such as discounted cash flows, probability of default and loss given default assumptions. Fair value for deposits accounts other than noninterest-bearing checking accounts is based on discounted cash flows using current market rates applied to the estimated life. The fair value of mortgage servicing rights is estimated using a valuation model that calculates the present value of estimated future net servicing cash flows, taking into consideration expected mortgage loan prepayment rates, discount rates, servicing costs and other economic factors, which are determined based on current market conditions. The fair values of subordinated debentures and FHLBI advances are based on current rates for similar financing. The fair value of off-balance sheet items is estimated to be nominal.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

10. FAIR VALUES

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability, or in the absence of a principal market, the most advantageous market for the asset or liability. The price of the principal (or most advantageous) market used to measure the fair value of the asset or liability is *not* adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is *not* a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

We are required to use valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs *may* be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from independent sources, or unobservable, meaning those that reflect our own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. In that regard, we utilize a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that we have the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are *not* active; or other inputs that are observable or can be derived from or corroborated by observable market data by correlation or other means.

Level 3: Significant unobservable inputs that reflect our own conclusions about the assumptions that market participants would use in pricing an asset or liability.

The following is a description of our valuation methodologies used to measure and disclose the fair values of our financial assets and liabilities that are recorded at fair value on a recurring or nonrecurring basis:

Securities available for sale. Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based on quoted prices, if available. If quoted prices are *not* available, fair values are measured using independent pricing models. Level 2 securities include U.S. Government agency bonds, mortgage-backed securities issued or guaranteed by U.S. Government agencies, and municipal general obligation and revenue bonds. Level 3 securities include bonds issued by certain relatively small municipalities located within our markets that have very limited marketability due to their size and

lack of ratings from a recognized rating service. We carry these bonds at historical cost, which we believe approximates fair value, unless our periodic financial analysis or other information that becomes known to us necessitates an impairment. There was no such impairment as of *June 30, 2020* or *December 31, 2019*. We have no Level 1 securities available for sale.

(Continued)

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

10. FAIR VALUES (Continued)

Derivatives. We measure fair value utilizing models that use primarily market observable inputs, such as forecasted yield curves.

Mortgage loans held for sale. Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market, as determined by outstanding commitments from investors, and are measured on a nonrecurring basis. Fair value is based on independent quoted market prices, where applicable, or the prices for other mortgage whole loans with similar characteristics. As of *June 30, 2020* and *December 31, 2019*, we determined the fair value of our mortgage loans held for sale to be \$42.8 million and \$5.0 million, respectively.

Loans. We do *not* record loans at fair value on a recurring basis. However, from time to time, we record nonrecurring fair value adjustments to collateral dependent loans to reflect partial write-downs or specific reserves that are based on the observable market price or current estimated value of the collateral. These loans are reported in the nonrecurring table below at initial recognition of impairment and on an ongoing basis until recovery or charge-off. The fair values of impaired loans are determined using either the sales comparison approach or income approach; respective unobservable inputs for the approaches consist of adjustments for differences between comparable sales and the utilization of appropriate capitalization rates.

Foreclosed Assets. At time of foreclosure or repossession, foreclosed and repossessed assets are adjusted to fair value less costs to sell upon transfer of the loans to foreclosed and repossessed assets, establishing a new cost basis. We subsequently adjust estimated fair value of foreclosed assets on a nonrecurring basis to reflect write-downs based on revised fair value estimates. The fair values of parcels of other real estate owned are determined using either the sales comparison approach or income approach; respective unobservable inputs for the approaches consist of adjustments for differences between comparable sales and the utilization of appropriate capitalization rates.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The balances of assets and liabilities measured at fair value on a recurring basis as of *June 30, 2020* are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available for sale securities				
U.S. Government agency debt obligations	\$ 162,497,000	\$ 0	\$ 162,497,000	\$ 0
Mortgage-backed securities	36,033,000	0	36,033,000	0
Municipal general obligation bonds	102,467,000	0	101,661,000	806,000
Municipal revenue bonds	6,164,000	0	6,164,000	0
Other investments	500,000	0	500,000	0
Total	\$ 307,661,000	\$ 0	\$ 306,855,000	\$ 806,000

There were *no* transfers in or out of Level 1, Level 2 or Level 3 during the *first six* months of 2020. The \$1.2 million reduction in Level 3 municipal general obligation bonds during the *first six* months of 2020 reflects the scheduled maturities of such bonds.

MERCANTILE BANK CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

10. FAIR VALUES (Continued)

The balances of assets and liabilities measured at fair value on a recurring basis as of *December 31, 2019* are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available for sale securities				
U.S. Government agency debt obligations	\$ 186,410,000	\$ 0	\$ 186,410,000	\$ 0
Mortgage-backed securities	42,470,000	0	42,470,000	0
Municipal general obligation bonds	101,079,000	0	99,029,000	2,050,000
Municipal revenue bonds	4,196,000	0	4,196,000	0
Other investments	500,000	0	500,000	0
Total	<u>\$ 334,655,000</u>	<u>\$ 0</u>	<u>\$ 332,605,000</u>	<u>\$ 2,050,000</u>

There were *no* transfers in or out of Level 1, Level 2 or Level 3 during 2019. The \$1.7 million reduction in Level 3 municipal general obligation bonds during 2019 reflects the scheduled maturities of such bonds.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The balances of assets and liabilities measured at fair value on a nonrecurring basis as of *June 30, 2020* are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 3,082,000	\$ 0	\$ 0	\$ 3,082,000
Foreclosed assets	198,000	0	0	198,000
Total	<u>\$ 3,280,000</u>	<u>\$ 0</u>	<u>\$ 0</u>	<u>\$ 3,280,000</u>

(Continued)

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

10. FAIR VALUES (Continued)

The balances of assets and liabilities measured at fair value on a nonrecurring basis as of *December 31, 2019* are as follows:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Impaired loans	\$ 1,107,000	\$ 0	\$ 0	\$ 1,107,000
Foreclosed assets	452,000	0	0	452,000
Total	<u>\$ 1,559,000</u>	<u>\$ 0</u>	<u>\$ 0</u>	<u>\$ 1,559,000</u>

The carrying values are based on the estimated value of the property or other assets. Fair value estimates of collateral on impaired loans and foreclosed assets are reviewed periodically. Our credit policies establish criteria for obtaining appraisals and determining internal value estimates. We *may* also adjust outside appraisals and internal evaluations based on identifiable trends within our markets, such as sales of similar properties or assets, listing prices and offers received. In addition, we *may* discount certain appraised and internal value estimates to address current distressed market conditions. For real estate dependent loans and foreclosed assets, we generally assign a 15% to 25% discount factor for commercial-related properties, and a 25% to 50% discount factor for residential-related properties. In a vast majority of cases, we assign a 10% discount factor for estimated selling costs.

11. REGULATORY MATTERS

We are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings, and other factors, and the regulators can lower classifications in certain cases. Failure to meet various capital requirements can initiate regulatory action that could have a direct material effect on our financial statements.

The prompt corrective action regulations provide *five* classifications, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are *not* used to represent overall financial condition. If an institution is *not* well capitalized, regulatory approval is required to accept brokered deposits. Subject to limited exceptions, *no* institution *may* make a capital distribution if, after making the distribution, it would be undercapitalized. If an institution is undercapitalized, it is subject to close monitoring by its principal federal regulator, its asset growth and expansion are restricted, and plans for capital restoration are required. In addition, further specific types of restrictions *may* be imposed on the institution at the discretion of the federal regulator. At *June 30, 2020* and *December 31, 2019*, our bank was in the well capitalized category under the regulatory framework for prompt corrective action. There are *no* conditions or events since *June 30, 2020* that we believe have changed our bank's categorization.

MERCANTILE BANK CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

11. REGULATORY MATTERS (Continued)

Our consolidated capital levels as of *June 30, 2020* and *December 31, 2019* include \$45.1 million and \$44.8 million, respectively, of trust preferred securities. Under applicable Federal Reserve guidelines, the trust preferred securities constitute a restricted core capital element. The guidelines provide that the aggregate amount of restricted core elements that *may* be included in our Tier 1 capital must *not* exceed 25% of the sum of all core capital elements, including restricted core capital elements, net of goodwill less any associated deferred tax liability. Our ability to include the trust preferred securities in Tier 1 capital in accordance with the guidelines is *not* affected by the provision of the Dodd-Frank Act generally restricting such treatment, because (i) the trust preferred securities were issued before *May 19, 2010*, and (ii) our total consolidated assets as of *December 31, 2009* were less than \$15.0 billion. As of *June 30, 2020* and *December 31, 2019*, all \$45.1 million and \$44.8 million, respectively, of the trust preferred securities were included in our consolidated Tier 1 capital.

Under the final BASEL III capital rules that became effective on *January 1, 2015*, there is a requirement for a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do *not* meet this required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in cash dividends or used for stock repurchases and on the payment of discretionary bonuses to senior executive management. The capital buffer requirement was phased in over *three* years beginning in *2016*. The capital buffer requirement raised the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5% and the total capital ratio to 10.5% on a fully phased-in basis on *January 1, 2019*. We believe that, as of *June 30, 2020*, our bank meets all capital adequacy requirements under the BASEL III capital rules on a fully phased-in basis.

Our and our bank's ability to pay cash and stock dividends is subject to limitations under various laws and regulations and to prudent and sound banking practices. On *January 16, 2020*, our Board of Directors declared a cash dividend on our common stock in the amount of \$0.28 per share that was paid on *March 18, 2020* to shareholders of record as of *March 6, 2020*. On *April 16, 2020*, our Board of Directors declared a cash dividend on our common stock in the amount of \$0.28 per share that was paid on *June 17, 2020* to shareholders of record as of *June 5, 2020*. On *July 16, 2020*, our Board of Directors declared a cash dividend on our common stock in the amount of \$0.28 per share that will be paid on *September 16, 2020* to shareholders of record as of *September 4, 2020*.

In *May 2019*, we announced that our Board of Directors had authorized a program to repurchase up to \$20.0 million of our common stock from time to time in open market transactions at prevailing market prices or by other means in accordance with applicable regulations. This stock repurchase plan was instituted in conjunction with the completion of our existing program that was introduced in *January 2015* and later expanded in *April 2016*. During the *first six* months of *2020*, we repurchased a total of 222,385 shares at a total price of \$6.3 million, at an average price per share of \$28.25. During the period of *January 2015* through *March 31, 2020*, we repurchased a total of about 1.6 million shares at a total price of \$38.9 million, at an average price per share of \$24.13. Availability under our current repurchase plan totals \$10.1 million. The stock buybacks have been funded from cash dividends paid to us from our bank. Additional repurchases *may* be made in future periods under the authorized plan or a new plan, which would also likely be funded from cash dividends paid to us from our bank.

MERCANTILE BANK CORPORATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and our company. Words such as "anticipates," "believes," "estimates," "expects," "intends," "is likely," "plans," "projects," and variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("Future Factors") that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements. We undertake no obligation to update, amend, or clarify forward looking-statements, whether as a result of new information, future events (whether anticipated or unanticipated), or otherwise.

Future Factors include, among others, adverse changes in interest rates and interest rate relationships; significant declines in the value of commercial real estate; market volatility; demand for products and services; the degree of competition by traditional and non-traditional competitors; changes in banking regulation or actions by bank regulators; changes in the method of determining Libor, or the replacement of Libor with an alternative reference rate; changes in tax laws; changes in prices, levies, and assessments; the impact of technological advances; risks associated with cyber-attacks on our computer systems; governmental and regulatory policy changes; the outcomes of contingencies; trends in customer behavior as well as their ability to repay loans; changes in local real estate values; damage to our reputation resulting from adverse publicity, regulatory actions, litigation, operational failures, the failure to meet client expectations and other facts; changes in the national and local economies, including the significant disruption to financial market and other economic activity caused by the outbreak of COVID-19; and risk factors described in our annual report on Form 10-K for the year ended December 31, 2019 or in this report. These are representative of the Future Factors that could cause a difference between an ultimate actual outcome and a forward-looking statement.

Introduction

The following discussion compares the financial condition of Mercantile Bank Corporation and its consolidated subsidiaries, including Mercantile Bank of Michigan ("our bank") and our bank's two subsidiaries, Mercantile Bank Real Estate Co., LLC and Mercantile Insurance Center, Inc., at June 30, 2020 and

December 31, 2019 and the results of operations for the three months and six months ended June 30, 2020 and June 30, 2019. This discussion should be read in conjunction with the interim consolidated financial statements and footnotes included in this report. Unless the text clearly suggests otherwise, references in this report to “us,” “we,” “our” or “the company” include Mercantile Bank Corporation and its consolidated subsidiaries referred to above.

Critical Accounting Policies

GAAP is complex and requires us to apply significant judgment to various accounting, reporting and disclosure matters. We must use assumptions and estimates to apply these principles where actual measurements are not possible or practical. Management’s Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our unaudited financial statements included in this report. For a discussion of our significant accounting policies, see Note 1 of the Notes to our Consolidated Financial Statements included in our Form 10-K for the fiscal year ended December 31, 2019 (Commission file number 000-26719). Our critical accounting policies are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements, and actual results may differ from those estimates. We have reviewed the application of these policies with the Audit Committee of our Board of Directors.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Allowance for Loan Losses: The allowance for loan losses (“allowance”) is maintained at a level we believe is adequate to absorb probable incurred losses identified and inherent in the loan portfolio. Our evaluation of the adequacy of the allowance is an estimate based on past loan loss experience, the nature and volume of the loan portfolio, information about specific borrower situations and estimated collateral values, guidance from bank regulatory agencies, and assessments of the impact of current and anticipated economic conditions on the loan portfolio. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in our judgment, should be charged-off. Loan losses are charged against the allowance when we believe the uncollectability of a loan is likely. The balance of the allowance represents our best estimate, but significant downturns in circumstances relating to loan quality or economic conditions could result in a requirement for an increased allowance in the future. Likewise, an upturn in loan quality or improved economic conditions may result in a decline in the required allowance in the future. In either instance, unanticipated changes could have a significant impact on the allowance and operating results. Loans made under the Payment Protection Program are fully guaranteed by the Small Business Administration; therefore, such loans do not have an associated allowance.

The allowance is increased through a provision charged to operating expense. Uncollectable loans are charged-off through the allowance. Recoveries of loans previously charged-off are added to the allowance. A loan is considered impaired when it is probable that contractual interest and principal payments will not be collected either for the amounts or by the dates as scheduled in the loan agreement. Impairment is evaluated on an individual loan basis. If a loan is impaired, a portion of the allowance is allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan’s existing rate or at the fair value of collateral if repayment is expected solely from the collateral. The timing of obtaining outside appraisals varies, generally depending on the nature and complexity of the property being evaluated, general breadth of activity within the marketplace and the age of the most recent appraisal. For collateral dependent impaired loans, in most cases we obtain and use the “as is” value as indicated in the appraisal report, adjusting for any expected selling costs. In certain circumstances, we may internally update outside appraisals based on recent information impacting a particular or similar property, or due to identifiable trends (e.g., recent sales of similar properties) within our markets. The expected future cash flows exclude potential cash flows from certain guarantors. To the extent these guarantors provide repayments, a recovery would be recorded upon receipt. Loans are evaluated for impairment when payments are delayed, typically 30 days or more, or when serious deficiencies are identified within the credit relationship. Our policy for recognizing income on impaired loans is to accrue interest unless a loan is placed on nonaccrual status. We put loans into nonaccrual status when the full collection of principal and interest is not expected.

Financial institutions are not required to comply with the Current Expected Credit Loss (“CECL”) methodology requirements from the enactment date of the CARES Act until the earlier of the end of the President’s declaration of a National Emergency or December 31, 2020. An economic forecast is a key component of the CECL methodology. As we continue to experience an unprecedented economic environment whereby a sizable portion of the economy has been significantly impacted by shelter in place declarations and similar reactions by businesses and individuals, substantial government stimulus has been provided to businesses, individuals and state and local governments and financial institutions have offered businesses and individuals payment relief options, economic forecasts are regularly revised and there continues to be no economic forecast consensus. Given the high degree of uncertainty surrounding economic forecasting, we have elected to postpone the adoption of CECL, and will continue to use our incurred loan loss reserve model as permitted.

Income Tax Accounting: Current income tax assets and liabilities are established for the amount of taxes payable or refundable for the current year. In the preparation of income tax returns, tax positions are taken based on interpretation of federal and state income tax laws for which the outcome may be uncertain. We periodically review and evaluate the status of our tax positions and make adjustments as necessary. Deferred income tax assets and liabilities are also established for the future tax consequences of events that have been recognized in our financial statements or tax returns. A deferred income tax asset or liability is recognized for the estimated future tax effects attributable to temporary differences that can be carried forward (used) in future years. The valuation of our net deferred income tax asset is considered critical as it requires us to make estimates based on provisions of the enacted tax laws. The assessment of the realizability of the net deferred income tax asset involves the use of estimates, assumptions, interpretations and judgments concerning accounting pronouncements, federal and state tax codes and the extent of future taxable income. There can be no assurance that future events, such as court decisions, positions of federal and state tax authorities, and the extent of future taxable income will not differ from our current assessment, the impact of which could be significant to the consolidated results of operations and reported earnings.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Accounting guidance requires that we assess whether a valuation allowance should be established against our deferred tax assets based on the consideration of all available evidence using a “more likely than not” standard. In making such judgments, we consider both positive and negative evidence and analyze changes

in near-term market conditions as well as other factors which may impact future operating results. Significant weight is given to evidence that can be objectively verified.

Securities and Other Financial Instruments: Securities available for sale consist of bonds and notes which might be sold prior to maturity due to changes in interest rates, prepayment risks, yield and availability of alternative investments, liquidity needs or other factors. Securities classified as available for sale are reported at their fair value. Declines in the fair value of securities below their cost that are other-than-temporary are reflected as realized losses. In estimating other-than-temporary losses, management considers: (1) the length of time and extent that fair value has been less than carrying value; (2) the financial condition and near term prospects of the issuer; and (3) the Company's ability and intent to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value. Fair values for securities available for sale are obtained from outside sources and applied to individual securities within the portfolio. The difference between the amortized cost and the current fair value of securities is recorded as a valuation adjustment and reported in other comprehensive income.

Mortgage Servicing Rights: Mortgage servicing rights are recognized as assets based on the allocated fair value of retained servicing rights on loans sold. Servicing rights are carried at the lower of amortized cost or fair value and are expensed in proportion to, and over the period of, estimated net servicing income. We utilize a discounted cash flow model to determine the value of our servicing rights. The valuation model utilizes mortgage prepayment speeds, the remaining life of the mortgage pool, delinquency rates, our cost to service loans, and other factors to determine the cash flow that we will receive from serving each grouping of loans. These cash flows are then discounted based on current interest rate assumptions to arrive at the fair value of the right to service those loans. Impairment is evaluated quarterly based on the fair value of the servicing rights, using groupings of the underlying loans classified by interest rates. Any impairment of a grouping is reported as a valuation allowance.

Goodwill: GAAP requires us to determine the fair value of all of the assets and liabilities of an acquired entity, and record their fair value on the date of acquisition. We employ a variety of means in determination of the fair value, including the use of discounted cash flow analysis, market comparisons, and projected future revenue streams. For certain items that we believe we have the appropriate expertise to determine the fair value, we may choose to use our own calculation of the value. In other cases, where the value is not easily determined, we consult with outside parties to determine the fair value of the asset or liability. Once valuations have been adjusted, the net difference between the price paid for the acquired company and the value of its balance sheet is recorded as goodwill.

Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified. A more frequent assessment is performed if conditions in the market place or changes in the company's organizational structure occur. Due to current stressed economic and market conditions, we assessed goodwill for impairment as of March 31, 2020 and June 30, 2020. For March 31, 2020, we used a discounted income approach and a market valuation model, which compared the inherent value of our company to valuations of recent transactions in the market place to determine if our goodwill had been impaired. It was determined goodwill was not impaired as of March 31, 2020. For June 30, 2020, we used the Step 0 methodology for which we assessed the macro and microeconomic conditions, industry and market conditions, financial performance, and our underlying stock performance. We concluded it was more likely than not our fair value was greater than its carrying amount; therefore, no further testing was required.

Coronavirus Pandemic

The U.S. economy deteriorated rapidly during the latter part of the first quarter and into the second quarter of 2020 due to the ongoing pandemic of coronavirus disease 2019 ("COVID-19") caused by severe acute respiratory syndrome coronavirus 2 (the "Coronavirus Pandemic"). COVID-19 is primarily spread between people during close contact, often via small droplets produced by coughing, sneezing or talking. People may also become infected by touching a contaminated surface and then touching their eyes, nose or mouth. There is currently no known vaccine or specific antiviral treatment, with the primary treatment being symptomatic and supportive therapies. Recommended preventive measures include hand washing, covering one's mouth when coughing and maintaining distance from other people, as well as self-isolation for people who suspect they are infected.

The outbreak was initially identified in Wuhan, China in December 2019. The World Health Organization declared the outbreak to be a Public Health Emergency Concern on January 30, 2020, and then recognized it as a pandemic on March 11, 2020. The first known case in the United States was identified in the State of Washington on January 20, 2020. The White House Coronavirus Task Force was established on January 29, 2020. President Trump declared a Public Health Emergency on January 31, 2020, which was elevated by the President's declaration of a National Emergency on March 13, 2020 (the "National Emergency").

The Coronavirus Pandemic has caused severe global socioeconomic disruptions. It has led to the postponement or cancellation of sporting, religious, political and cultural events, as well as widespread supply shortages exacerbated by panic buying. Service industry businesses, such as restaurants, hotels, airlines, cruise lines and movie theaters, have been particularly negatively impacted by the restrictions and stay-at-home orders issued by authorities around a vast majority of the world. The health care industry has also been significantly impacted, from a combination of treating infected patients to the cancellation of medical appointments and elective surgeries. At the current time, it is highly uncertain as to when conditions will begin to return to normal. Most agree that a return to normal conditions will be accomplished in phases, taking into account factors such as regional rates and trends of infections, types of businesses and required social distancing measures. Human behavior will also likely play a significant role as people make individual choices to re-engage in permissible activities.

The first known case in the State of Michigan was identified on March 10, 2020, which triggered a State of Emergency response from Governor Whitmer. Soon thereafter, Governor Whitmer ordered the closure of all K-12 school buildings until early April, which was later amended to suspend all face-to-face instruction for the remainder of the 2019-2020 school year. In mid-March, Governor Whitmer ordered all bars, restaurants, entertainment venues and other similar businesses to partially close for two weeks, and banned all gatherings of more than 50 people for the period of mid-March into early April. On March 24, 2020, Governor Whitmer issued a state-wide stay-at-home order limiting all non-essential travel and discontinuing all non-essential business services and operations. The order was originally set to expire on April 13, 2020; however, the order was extended, and expanded with additional restrictions, until April 30, 2020. On April 24, 2020, Governor Whitmer issued an amended stay-at-home order that was scheduled to expire on May 15, 2020 to replace the stay-at-home order that was scheduled to expire on April 30, 2020. On May 7, 2020, Governor Whitmer issued an amended stay-at-home order that expired on May 28, 2020 to replace the stay-at-home order that was scheduled to expire on May 15, 2020. The amended orders reduced some of the restrictions from the previous orders, permitting certain activities in limited or restricted capacities. The stay-at-home order was lifted effective June 5, 2020; however, restrictions on indoor and outdoor gatherings remain, businesses are required to ensure CDC-recommended guidelines are followed and certain industries remain significantly impacted. An increase in COVID-19

cases in Michigan near the end of the second quarter and into the third quarter has temporarily delayed further re-opening activities, and Governor Whitmer has indicated a willingness to reinstitute restrictions on activities of businesses and consumers.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Responding to the Coronavirus Pandemic and Governor Whitmer's stay-at-home orders, by March 23, 2020, over 75% of our employees were working from home. In addition, beginning on March 18, 2020 our branch lobbies were allowing face-to-face contact with customers by appointment only. On March 25, 2020, we enhanced our social distancing response by closing our branch lobbies to all customers, with all banking transactions conducted via drive-thru, virtual banking machines, online banking and our call center. We have developed comprehensive social distancing guidelines and associated protocols using information provided by the CDC and other federal and state government agencies, and started to return our employees to their work locations in mid-June. On June 26, 2020, we re-opened our branch lobbies, and virtually all of our employees were back to their physical work locations by July 1, 2020.

In response to the substantial negative impact of the Coronavirus Pandemic and the associated social distancing orders and measures on the United States and global economies, Congress passed the Coronavirus Aid, Relief and Economic Security Act ("CARES Act"), which was signed by President Trump on March 27, 2020. The CARES Act is in large part a \$1.8 trillion spending bill that builds upon two earlier and considerably smaller federal government support measures in the wake of the Coronavirus Pandemic and associated economic fallout. The CARES Act is comprehensive and touches on many facets of federal government assistance and banking regulatory requirements. In addition, the Federal Open Market Committee lowered the targeted federal funds rate by 50 basis points on March 3, 2020 and by another 100 basis points on March 15, 2020, and announced the resumption of quantitative easing.

The Coronavirus Pandemic is a highly unusual, unprecedented and evolving public health and economic crisis and may have a material negative impact on our financial condition and results of operations. We are in an asset-sensitive position, whereby interest rate environments characterized by numerous and/or high magnitude interest rate reductions have a negative impact on our net interest income and net income. Additionally, the consequences of the unprecedented economic impact of the Coronavirus Pandemic are likely to result in declining asset quality, reflected by a higher level of loan delinquencies and loan charge-offs, as well as downgrades of commercial lending relationships, which would necessitate additional provisions for our allowance and reduced net income.

The following section summarizes the primary measures that directly impact us and our customers.

- Paycheck Protection Program

The Paycheck Protection Program ("PPP") reflects a substantial expansion of the Small Business Administration's 100% guaranteed 7(a) loan program. The CARES Act authorized up to \$350 billion in loans to businesses with fewer than 500 employees, including non-profit organizations, tribal business concerns, self-employed and individual contractors. The PPP provides 100% guaranteed loans to cover specific operating costs, with the maximum loan size capped at the lesser of 250% of the average monthly payroll costs or \$10.0 million. PPP loans are eligible to be forgiven based upon certain criteria. In general, the amount of the loan that is forgivable is the sum of the payroll costs, interest payments on mortgages, rent and utilities incurred or paid by the business during a prescribed period beginning on the loan origination date. Any remaining balance after forgiveness is maintained at the 100% guarantee for the duration of the loan. The loan tenor is 24 months for loans originated prior to June 5, 2020 and 60 months for loans originated on or after June 5, 2020. Loans originated prior to June 5, 2020 can be modified to a tenor of 60 months upon the mutual agreement of the lender and borrower. To date, we have not modified the maturity date of any loans made prior to June 5, 2020. The interest rate on the loan is fixed at 1.00%, with the financial institution receiving a loan origination fee ranging from 1% to 5% of the loan amount paid by the Small Business Administration. The loan origination fees, net of the direct origination costs, totaled \$14.7 million during the second quarter of 2020 and are being accreted into interest income on loans using the level yield methodology. The program was originally scheduled to end on June 30, 2020, but was recently modified to now end effective August 8, 2020. Participation in the PPP has had a significant impact on the composition of our loan and deposit portfolios and our net interest income starting during the second quarter of 2020, which is expected to remain for at least most of the remainder of 2020. As of July 31, 2020, we had originated almost 2,200 loans aggregating \$550 million under the PPP.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Congress passed, and on April 24, 2020 President Trump signed, legislation which added \$300 billion to the PPP. Included in the legislation was a specific allocation of \$30 billion for financial institutions under \$10 billion.

Under the CARES Act, a PPP loan is assigned a risk weight of 0% under the risk-based capital rules of the federal banking agencies. On April 9, 2020, the federal banking agencies issued an interim final rule allowing financial institutions to exclude PPP loans from the average asset calculation to the degree the PPP loans are financed through the Paycheck Protection Program Lending Facility ("PPPLF") for the Tier 1 Leverage Capital Ratio.

- Individual Economic Impact Payments

The Internal Revenue Service began making Individual Economic Impact Payments in mid-April via direct deposit or mailed checks. Individuals with adjusted gross income of \$75,000 or less received payments of \$1,200, with a reduction formula for those individuals with adjusted gross income over \$75,000 but less than \$99,000. Individuals with adjusted gross income of over \$99,000 did not receive a payment. Married couples filing jointly with adjusted gross income of \$150,000 or less received payments of \$2,400, with a reduction formula for those married couples filing jointly with adjusted gross income over \$150,000 but less than \$198,000. Married couples filing jointly with adjusted gross income of over \$198,000 did not receive a payment.

- **Troubled Debt Restructuring Relief**

From March 1, 2020 through 60 days after the end of the National Emergency (or December 31, 2020 if earlier), a financial institution may elect to suspend GAAP principles and regulatory determinations with respect to loan modifications related to COVID-19 that would otherwise be categorized as troubled debt restructurings. Banking agencies must defer to the financial institution's election. We elected to suspend GAAP principles and regulatory determinations as permitted.

- **Current Expected Credit Loss Methodology Delay**

Financial institutions are not required to comply with the Current Expected Credit Loss ("CECL") methodology requirements from the enactment date of the CARES Act until the earlier of the end of the National Emergency or December 31, 2020. We elected to postpone CECL adoption as permitted.

In early April 2020, we developed internal programs of loan payment deferrals for commercial and retail borrowers. For commercial borrowers, we offer 90-day (three payments) interest only amendments as well as 90-day (three payments) principal and interest payment deferrals. Under the latter program, borrowers are extended a 12-month single payment note at 0% interest in an amount equal to three payments, with loan proceeds used to make the scheduled payments. As of June 30, 2020, we had processed 463 interest only amendments with loan balances aggregating \$421 million and 242 principal and interest payment deferrals with loan balances totaling \$298 million and resulting single payment loans aggregating \$8.1 million. The single payment notes receive a loan grade equal to the current loan grade of each respective borrowing relationship. For retail borrowers, we offer 90-day (three payments) principal and interest payment deferrals, with deferred amounts added to the end of the loan. As of June 30, 2020, we had processed 260 principal and interest payment deferrals with loan balances totaling \$23.8 million. These payment deferral transactions largely applied to the borrowers' April, May and June of 2020 loan payments.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

We have also had some instances where commercial borrowers have subsequently requested and received an additional 90-day (three payments) interest only amendment or 90-day (three payments) principal and interest payment deferral. Under the latter program, the amount equal to the three payments is added to the original deferral note which has nine months remaining to maturity; however, the original 0% interest rate is modified to equal the rate associated with each borrower's traditional lending relationship with us for the remainder of the term. As of July 31, 2020, we had processed an additional 16 interest only amendments with loan balances aggregating \$31.0 million and 21 principal and interest payment deferrals with loan balances totaling \$117 million and resulting single payment loans aggregating \$4.2 million. Additional 90-day (three payments) principal and interest payment deferrals for retail borrowers have been nominal with loan balances aggregating less than \$2.0 million through July 31, 2020.

In April, 2020, the Federal Reserve initiated the PPPLF, which is designed to facilitate lending by financial institutions to small businesses under the PPP. Only PPP loans are eligible to serve as collateral for the PPPLF, with each dollar of PPP loans providing one dollar of advance availability. The maturity date of an extension of credit under the PPPLF will equal the maturity date of the pool of PPP loans pledged to secure the extension of credit. Any principal payments received by the financial institution on the PPP loans, such as PPP loan forgiveness payments from the Small Business Administration or principal payments from the borrower after the initial six-month deferral period, must be used to pay down the PPPLF advance by the same dollar amount, maintaining the dollar-for-dollar advance amount and PPP aggregate loan balance relationship. The interest rate on PPPLF advances is fixed at 0.35%. No PPPLF advances can be obtained after September 30, 2020. We obtained a PPPLF advance in the amount of \$43.7 million in late April 2020; however, the PPPLF advance was paid-off in full in early June 2020. As of June 30, 2020, we had no advances outstanding under the PPPLF. We may obtain additional PPPLF advances as our borrowers utilize PPP loan proceeds for permissible purposes.

Financial Overview

We reported net income of \$8.7 million, or \$0.54 per diluted share, for the second quarter of 2020, compared to net income of \$11.7 million, or \$0.71 per diluted share, during the second quarter of 2019. Net income for the first six months of 2020 totaled \$19.4 million, or \$1.19 per diluted share, compared to \$23.5 million, or \$1.43 per diluted share, during the first six months of 2019.

Proceeds from a bank owned life insurance claim during the second quarter of 2019 increased net income by \$1.3 million, or \$0.08 per diluted share. Excluding the impact of this transaction, diluted earnings per share decreased \$0.09, or 14.3%, during the second quarter of 2020 compared to the second quarter of 2019. Proceeds from bank owned life insurance claims and a gain on the sale of a former branch facility during the first six months of 2019 increased reported net income by \$3.1 million, or \$0.19 per diluted share. Excluding the impacts of these transactions, diluted earnings per share decreased \$0.05, or 4.0%, during the first six months of 2020 compared to the first six months of 2019.

We believe the overall quality of our loan portfolio remains strong, with nonperforming loans equaling only 0.10% of total loans as of June 30, 2020. Gross loan charge-offs totaled \$0.3 million during the second quarter of 2020, and totaled \$0.4 million for the first six months of the year, while recoveries of prior period loan charge-offs equaled \$0.2 million and \$0.4 million during the respective time periods. Net loan charge-offs, as a percentage of average total loans, equaled an annualized 0.02% during the second quarter, while a net loan recovery equaled an annualized less than 0.01% during the first six months of 2020. We continue our collection efforts on charged-off loans, and expect to record recoveries in future periods; however, given the nature of these efforts, it is not practical to forecast the dollar amount and timing of the recoveries.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Commercial loans increased \$460 million during the first six months of 2020, and at June 30, 2020 totaled \$2.90 billion, or 87.0% of our loan portfolio. As of

December 31, 2019, the commercial loan portfolio comprised 85.5% of total loans. The increase in commercial loans during the first six months of 2020 primarily reflects PPP loan originations totaling \$549 million, partially offset by a \$109 million reduction in lines of credit balances. Commercial and industrial loans, which include PPP loans, were up \$461 million, non-owner occupied commercial real estate (“CRE”) loans increased \$5.8 million and multi-family and residential rental loans grew \$7.5 million, while owner occupied CRE loans decreased \$11.4 million and vacant land, land development and residential construction loans were down \$3.1 million. We believe our loan portfolio remains well diversified. As a percentage of total commercial loans, commercial and industrial loans (excluding PPP loans) and owner occupied CRE loans combined equaled 56.3% as of June 30, 2020, compared to 58.4% at December 31, 2019. The new commercial loan pipeline remains strong, and at June 30, 2020, we had \$78 million in unfunded loan commitments on commercial construction and development loans that are in the construction phase.

We recorded a loan loss provision expense of \$7.6 million during the second quarter of 2020, compared to \$0.9 million during the second quarter of 2019. We recorded a loan loss provision expense of \$8.4 million during the first six months of 2020, compared to \$1.8 million during the first six months of 2019. The provision expense recorded during the 2020 periods primarily reflected an allocation associated with a newly-created Coronavirus Pandemic environmental factor (“COVID-19 factor”) and an increased allocation related to the existing economic conditions environmental factor. The COVID-19 factor was added to address the unique challenges and economic uncertainty resulting from the Coronavirus Pandemic and its potential impact on the collectability of the loan portfolio.

Noninterest income during the second quarter of 2020 was \$11.0 million, compared to \$6.3 million during the prior-year second quarter. Noninterest income during the second quarter of 2019 included a bank owned life insurance claim of \$1.3 million. Excluding the impact of this transaction, noninterest income increased \$5.9 million, or nearly 118%, during the current-year second quarter compared to the respective 2019 period. Noninterest income during the first six months of 2020 was \$17.5 million, compared to \$13.0 million during the same time period in 2019. Noninterest income during the first six months of 2019 included bank owned life insurance claims aggregating \$2.6 million and a gain on the sale of a former branch facility of \$0.6 million. Excluding the impacts of these transactions, noninterest income increased \$7.7 million, or 79.2%, in the first six months of 2020 compared to the respective 2019 period. The higher level of noninterest income in both 2020 periods primarily reflected increased mortgage banking income. We originated \$408 million in residential mortgage loans during the first six months of 2020, which was about 225% higher than originations during the first six months of 2019. The increase is primarily attributable to significant refinance activity stemming from the decreased interest rate environment coupled with the ongoing success of strategic initiatives that were designed to expand market penetration, enhance gain activities and operate more efficiently. Almost 75% of the residential mortgage loans originated during the first six months of 2020 consisted of refinance transactions, compared to about 43% during the first six months of 2019. Residential mortgage loans originated for sale, generally consisting of longer-term fixed rate residential mortgage loans, during the first six months of 2020 totaled \$321 million, or about 79% of total mortgage loans originated. During the first six months of 2019, residential mortgage loans originated for sale totaled \$70.9 million, or about 57% of total mortgage loans originated.

Financial Condition

Our total assets increased \$681 million during the first six months of 2020, and totaled \$4.31 billion as of June 30, 2020. Total loans increased \$476 million and interest-earning deposits grew by \$206 million, while securities available for sale decreased \$27.0 million. Total deposits increased \$572 million, sweep accounts were up \$64.9 million and FHLBI advances increased \$40.0 million during the first six months of 2020.

Table of Contents

MERCANTILE BANK CORPORATION

Commercial loans increased \$460 million during the first six months of 2020, and at June 30, 2020 totaled \$2.90 billion, or 87.0% of the loan portfolio. As of December 31, 2019, the commercial loan portfolio comprised 85.5% of total loans. The increase in commercial loans during the first six months of 2020 primarily reflects PPP loan originations totaling \$549 million, partially offset by a \$109 million reduction in lines of credit balances. Commercial and industrial loans, which include PPP loans, were up \$461 million, non-owner occupied CRE loans increased \$5.8 million and multi-family and residential rental loans grew \$7.5 million, while owner occupied CRE loans decreased \$11.4 million and vacant land, land development and residential construction loans were down \$3.1 million. As a percentage of total commercial loans, commercial and industrial loans (excluding PPP loans) and owner occupied CRE loans combined equaled 56.3% as of June 30, 2020, compared to 58.4% at December 31, 2019.

As of June 30, 2020, availability on existing construction and development loans totaled approximately \$78 million, with most of those funds expected to be drawn over the next 12 to 18 months. Our current pipeline reports indicate continued strong commercial loan funding opportunities in future periods, including \$176 million in new lending commitments, a majority of which we expect to be accepted and funded over the next 12 to 18 months. Our commercial lenders also report ongoing additional opportunities they are currently discussing with existing and potential new borrowers. We remain committed to prudent underwriting standards that provide for an appropriate yield and risk relationship, as well as concentration limits we have established within our commercial loan portfolio. Usage of existing commercial lines of credit declined during the second quarter of 2020, largely reflecting the Coronavirus Pandemic and associated weakened economic conditions.

Residential mortgage loans increased \$27.3 million during the first six months of 2020, totaling \$367 million, or 11.0% of total loans, as of June 30, 2020. We originated \$408 million in residential mortgage loans during the first six months of 2020, which was about 225% higher than originations during the first six months of 2019. The increase was primarily attributable to significant refinance activity stemming from the decreased interest rate environment coupled with the ongoing success of strategic initiatives that were designed to expand market penetration, enhance gain activities and operate more efficiently. Almost 75% of the residential mortgage loans originated during the first six months of 2020 consisted of refinance transactions, compared to approximately 43% during the first six months of 2019. Residential mortgage loans originated for sale, generally consisting of longer-term fixed rate residential mortgage loans, during the first six months of 2020 totaled \$321 million, or approximately 79% of total mortgage loans originated. During the first six months of 2019, residential mortgage loans originated for sale totaled \$70.9 million, or approximately 57% of total mortgage loans originated. Residential mortgage loans originated not sold are generally comprised of adjustable rate residential mortgage loans. We are pleased with the results of our strategic initiatives associated with the growth of our residential mortgage banking operation over the past few years, and remain optimistic that origination volumes will continue to be solid in future periods. We experienced an increase in the origination of purchase residential mortgage loans during the latter part of the second quarter, and as of June 30, 2020, the pipeline for purchase residential mortgage loan applications was at a record level.

Other consumer-related loans declined \$10.6 million during the first six months of 2020, and at June 30, 2020 totaled \$64.7 million, or 2.0% of total loans. Other consumer-related loans comprised 2.6% of total loans as of December 31, 2019. We expect this loan portfolio segment to decline in future periods as scheduled principal payments exceed anticipated new loan origination volumes.

Total Commercial	2,901,252,000	2,472,330,000	2,441,544,000	2,508,367,000	2,464,555,000
Retail:					
1-4 Family Mortgages	367,061,000	356,338,000	339,749,000	346,094,000	335,618,000
Home Equity & Other Consumer Loans	64,743,000	72,875,000	75,374,000	78,552,000	81,320,000
Total Retail	431,804,000	429,213,000	415,123,000	424,646,000	416,938,000
Total	\$ 3,333,056,000	\$ 2,901,543,000	2,856,667,000	2,933,013,000	\$ 2,881,493,000

Our credit policies establish guidelines to manage credit risk and asset quality. These guidelines include loan review and early identification of problem loans to provide effective loan portfolio administration. The credit policies and procedures are meant to minimize the risk and uncertainties inherent in lending. In following these policies and procedures, we must rely on estimates, appraisals and evaluations of loans and the possibility that changes in these could occur quickly because of changing economic conditions. Identified problem loans, which exhibit characteristics (financial or otherwise) that could cause the loans to become nonperforming or require restructuring in the future, are included on an internal watch list. Senior management and the Board of Directors review this list regularly. Market value estimates of collateral on impaired loans, as well as on foreclosed and repossessed assets, are reviewed periodically; however, we have a process in place to monitor whether value estimates at each quarter-end are reflective of current market conditions. Our credit policies establish criteria for obtaining appraisals and determining internal value estimates. We may also adjust outside and internal valuations based on identifiable trends within our markets, such as recent sales of similar properties or assets, listing prices and offers received. In addition, we may discount certain appraised and internal value estimates to address distressed market conditions.

Nonperforming assets, comprised of nonaccrual loans, loans past due 90 days or more and accruing interest and foreclosed properties, totaled \$3.4 million (0.1% of total assets) as of June 30, 2020, compared to \$2.7 million (0.1% of total assets) as of December 31, 2019. Given the low level of nonperforming loans and accruing loans 30 to 89 days delinquent, combined with the manageable and steady level of watch list credits and what we believe are strong credit administration practices, we remain pleased with the overall quality of the loan portfolio at the initial stages of the Coronavirus Pandemic.

	2nd Qtr 2020	1st Qtr 2020	4th Qtr 2019	3rd Qtr 2019	2nd Qtr 2019
Beginning balance	\$ 271,000	\$ 452,000	\$ 243,000	\$ 446,000	\$ 396,000
Additions	0	11,000	245,000	57,000	145,000
Sale proceeds	(49,000)	(192,000)	(36,000)	(252,000)	(74,000)
Valuation write-downs	(24,000)	0	0	(8,000)	(21,000)
Total	\$ 198,000	\$ 271,000	\$ 452,000	\$ 243,000	\$ 446,000

Gross loan charge-offs equaled \$0.3 million during the second quarter of 2020, and totaled \$0.4 million for the first six months of the year, while recoveries of prior period loan charge-offs equaled \$0.2 million and \$0.4 million during the respective time periods. Net loan charge-offs, as a percentage of average total loans, equaled an annualized 0.02% during the second quarter of 2020. A nominal net loan recovery was recorded during the first six months of 2020. We continue our collection efforts on charged-off loans, and expect to record recoveries in future periods; however, given the nature of these efforts, it is not practical to forecast the dollar amount and timing of the recoveries. The allowance equaled \$32.2 million, or 1.16% of total loans (excluding PPP loans), and over 1,000% of nonperforming loans as of June 30, 2020.

In each accounting period, we adjust the allowance to the amount we believe is necessary to maintain the allowance at an adequate level. Through the loan review and credit departments, we establish portions of the allowance based on specifically identifiable problem loans. The evaluation of the allowance is further based on, but not limited to, consideration of the internally prepared allowance analysis, loan loss migration analysis, composition of the loan portfolio, third party analysis of the loan administration processes and portfolio, and general economic conditions.

Financial institutions are not required to comply with the Current Expected Credit Loss ("CECL") methodology requirements from the enactment date of the CARES Act until the earlier of the end of the President's declaration of a National Emergency or December 31, 2020. An economic forecast is a key component of

the CECL methodology. As we continue to experience an unprecedented economic environment whereby a sizable portion of the economy has been significantly impacted by shelter in place declarations and similar reactions by businesses and individuals, substantial government stimulus has been provided to businesses, individuals and state and local governments and financial institutions have offered businesses and individuals payment relief options, economic forecasts are regularly revised and there continues to be no economic forecast consensus. Given the high degree of uncertainty surrounding economic forecasting, we have elected to postpone the adoption of CECL, and will continue to use our incurred loan loss reserve model as permitted.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

The allowance analysis applies reserve allocation factors to non-impaired outstanding loan balances, the result of which is combined with specific reserves to calculate an overall allowance dollar amount. For non-impaired commercial loans, reserve allocation factors are based on the loan ratings as determined by our standardized grade paradigms and by loan purpose. Our commercial loan portfolio is segregated into five classes: 1) commercial and industrial loans; 2) vacant land, land development and residential construction loans; 3) owner occupied real estate loans; 4) non-owner occupied real estate loans; and 5) multi-family and residential rental property loans. The reserve allocation factors are primarily based on the historical trends of net loan charge-offs through a migration analysis whereby net loan losses are tracked via assigned grades over various time periods, with adjustments made for environmental factors reflecting the current status of, or recent changes in, items such as: lending policies and procedures; economic conditions; nature and volume of the loan portfolio; experience, ability and depth of management and lending staff; volume and severity of past due, nonaccrual and adversely classified loans; effectiveness of the loan review program; value of underlying collateral; loan concentrations; and other external factors such as competition and regulatory environment. Adjustments for specific lending relationships, particularly impaired loans, are made on a case-by-case basis. Non-impaired retail loan reserve allocations are determined in a similar fashion as those for non-impaired commercial loans, except that retail loans are segmented by type of credit and not a grading system. We regularly review the allowance analysis and make needed adjustments based upon identifiable trends and experience.

A migration analysis is completed quarterly to assist us in determining appropriate reserve allocation factors for non-impaired commercial loans. Our migration analysis takes into account various time periods, with most weight placed on the time frame from December 31, 2010 through June 30, 2020. We believe this time period represents an appropriate range of economic conditions, and that it provides for an appropriate basis in determining reserve allocation factors given current economic conditions and the general consensus of economic conditions in the near future. We are actively monitoring our loan portfolio and assessing reserve allocation factors in light of the Coronavirus Pandemic and its impact on the U.S. economic environment and our customers in particular.

Although the migration analysis provides a historical accounting of our net loan losses, it is not able to fully account for environmental factors that will also very likely impact the collectability of our commercial loans as of any quarter-end date. Therefore, we incorporate the environmental factors as adjustments to the historical data. Environmental factors include both internal and external items. We believe the most significant internal environmental factor is our credit culture and the relative aggressiveness in assigning and revising commercial loan risk ratings, with the most significant external environmental factor being the assessment of the current economic environment and the resulting implications on our commercial loan portfolio.

During the second quarter of 2020, we changed the impact rating of the economic and business conditions environmental factor from moderate to high due to the ongoing and expected stressed economic environment resulting from the Coronavirus Pandemic. This modification impacted all loan portfolio segments, adding almost \$4.0 million to the required reserve level. During the first quarter of 2020, we changed the trend rating on the economic and business conditions environmental factor from slightly deteriorating to severely deteriorating due to the initial and expected stressed economic environment resulting from the Coronavirus Pandemic. This modification impacted all loan portfolio segments, adding approximately \$4.0 million to the required allowance during the quarter. Also during the first quarter of 2020, we improved the trend rating on the lending policies environmental factor from slightly deteriorating to relatively stable to reflect the duration since the Firstbank merger in 2014 and recent loan policy enhancements. This modification impacted all loan portfolio segments, subtracting \$2.6 million from the required allowance level. We also, during the first quarter of 2020, improved the trend rating on the changes in the experience, ability and depth of lending management and staff environmental factor from slightly deteriorating to relatively stable to reflect the duration since personnel changes were made as part of the Firstbank merger and personnel changes necessitated by the retirement of our former CEO two years ago. This modification impacted the commercial loan portfolio segment, subtracting \$1.7 million from the required allowance.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

During the second quarter of 2020, we also established a COVID-19 pandemic environmental factor to address the Coronavirus Pandemic and its potential impact on the collectability of the loan portfolio. The creation of this factor reflects our belief that the traditional nine qualitative factors did not sufficiently capture and address the unique circumstances, challenges and uncertainties associated with the Coronavirus Pandemic, which include unprecedented federal government stimulus and interventions, statewide mandatory closures of nonessential businesses and periodic changes to such and our ability to provide payment deferral programs to commercial and retail borrowers without the interjection of troubled debt restructuring accounting rules. We review a myriad of items when assessing this new environmental factor, including virus infection rates, economic outlooks, unemployment, business closures, foreclosures, payment deferments and government-sponsored stimulus programs. Impacting all loan portfolio segments, the establishment of the COVID-19 pandemic environmental factor added almost \$4.0 million to the required reserve level.

The primary risk elements with respect to commercial loans are the financial condition of the borrower, the sufficiency of collateral, and timeliness of scheduled payments. We have a policy of requesting and reviewing periodic financial statements from commercial loan customers, and we have a disciplined and formalized review of the existence of collateral and its value. The primary risk element with respect to each residential real estate loan and consumer loan is the timeliness of scheduled payments. We have a reporting system that monitors past due loans and have adopted policies to pursue creditors' rights in order to preserve our collateral position.

As of June 30, 2020, the allowance was comprised of \$30.7 million in general reserves relating to non-impaired loans, \$0.1 million in specific reserve allocations relating to nonaccrual loans, and \$1.4 million in specific reserves on other loans, primarily accruing loans designated as troubled debt restructurings. Troubled debt restructurings totaled \$16.5 million at June 30, 2020, consisting of \$0.5 million that are on nonaccrual status and \$16.0 million that are on accrual status. The latter, while considered and accounted for as impaired loans in accordance with accounting guidelines, are not included in our nonperforming loan totals. Impaired loans with an aggregate carrying value of \$1.3 million as of June 30, 2020 had been subject to previous partial charge-offs aggregating \$1.3 million. Those partial charge-offs were recorded as follows: \$0.1 million in 2020, 2019, 2018, 2017, \$0.2 million in 2016, \$0.1 million in 2015, 2014, 2013 and 2012, and \$0.3 million in 2011. As of June 30, 2020, there were no specific reserves allocated to impaired loans that had been subject to a previous partial charge-off.

The following table provides a breakdown of our loans categorized as troubled debt restructurings:

	6/30/20	3/31/20	12/31/19	9/30/19	6/30/19
Performing	\$ 16,018,000	\$ 17,975,000	\$ 11,788,000	\$ 28,102,000	\$ 28,129,000
Nonperforming	521,000	466,000	353,000	225,000	877,000
Total	<u>\$ 16,539,000</u>	<u>\$ 18,441,000</u>	<u>\$ 12,141,000</u>	<u>\$ 28,327,000</u>	<u>\$ 29,006,000</u>

Although we believe the allowance is adequate to absorb loan losses in our originated loan portfolio as they arise, there can be no assurance, especially given the current uncertainties related to the Coronavirus Pandemic and its impact on the U.S. economic environment, that we will not sustain loan losses in any given period that could be substantial in relation to, or greater than, the size of the allowance. Further, our analysis does not utilize the CECL model for the measurement of credit losses. For more information on CECL, please refer to Note 1 – “Significant Accounting Policies” in the Notes to Consolidated Financial Statements and to the risk factor titled “We have elected to postpone adoption of the CECL methodology...” under the heading “Risk Factors” in Part II, Item 1A of our Quarterly Report on Form 10-Q dated March 31, 2020.

MERCANTILE BANK CORPORATION

Securities available for sale increased \$27.0 million during the first six months of 2020, totaling \$308 million as of June 30, 2020. Purchases during the first six months of 2020, consisting of U.S. Government agency bonds (\$176 million) and municipal bonds (\$13.3 million), totaled \$189 million. Proceeds from matured and called U.S. Government agency bonds and municipal bonds during the first six months of 2020 totaled \$202 million and \$12.2 million, respectively, with another \$7.0 million from principal paydowns on mortgage-backed securities. At June 30, 2020, the portfolio was primarily comprised of U.S. Government agency bonds (53%), municipal bonds (35%) and U.S. Government agency issued or guaranteed mortgage-backed securities (12%). All of our securities are currently designated as available for sale, and are therefore stated at fair value. The fair value of securities designated as available for sale at June 30, 2020 totaled \$308 million, including a net unrealized gain of \$7.7 million. We maintain the securities portfolio at levels to provide adequate pledging and secondary liquidity for our daily operations. In addition, the securities portfolio serves a primary interest rate risk management function. We expect purchases during the remainder of 2020 to generally consist of U.S. Government agency bonds and municipal bonds, with the securities portfolio maintained at about 10% of total assets.

FHLBI stock totaled \$18.0 million as of June 30, 2020, unchanged from the balance at December 31, 2019. Our investment in FHLBI stock is necessary to engage in their advance and other financing programs. We have regularly received quarterly cash dividends, and we expect a cash dividend will continue to be paid in future quarterly periods.

Market values on our U.S. Government agency bonds, mortgage-backed securities issued or guaranteed by U.S. Government agencies and municipal bonds are generally determined on a monthly basis with the assistance of a third party vendor. Evaluated pricing models that vary by type of security and incorporate available market data are utilized. Standard inputs include issuer and type of security, benchmark yields, reported trades, broker/dealer quotes and issuer spreads. The market value of certain non-rated securities issued by relatively small municipalities generally located within our markets is estimated at carrying value. We believe our valuation methodology provides for a reasonable estimation of market value, and that it is consistent with the requirements of accounting guidelines.

Interest-earning deposit balances, primarily consisting of excess funds deposited at the Federal Reserve Bank of Chicago and a correspondent bank, are used to manage daily liquidity needs and interest rate sensitivity. During the first six months of 2020, the average balance of these funds equaled \$203 million, or 5.6% of average earning assets, compared to a more-typical \$81.3 million, or 2.5% of average earning assets, during the first six months of 2019. The higher level during 2020 over 2019 largely reflects increased local deposit balances, primarily a product of federal government stimulus programs as well as lower business and consumer investing and spending. We expect the level of interest-earning deposit balances to remain elevated through the remainder of 2020 given the conditions associated with the Coronavirus Pandemic.

Net premises and equipment equaled \$59.2 million at June 30, 2020, an increase of \$1.8 million during the first six months of 2020. The increase was primarily attributable to net purchases of \$4.4 million, in large part associated with a new regional banking center in Mt. Pleasant, Michigan. Depreciation expense totaled \$2.5 million during the first six months of 2020. Foreclosed and repossessed assets equaled \$0.2 million as of June 30, 2020, compared to \$0.5 million as of December 31, 2019.

Total deposits increased \$572 million during the first six months of 2020, totaling \$3.26 billion at June 30, 2020. Local deposits increased \$629 million, while out-of-area deposits decreased \$56.8 million during the first six months of 2020. As a percentage of total deposits, out-of-area deposits equaled 2.4% as of June 30, 2020, compared to 5.0% as of December 31, 2019. Noninterest-bearing checking accounts increased \$521 million during the first six months of 2020, while interest-bearing checking accounts and money market deposit accounts grew \$50.1 million and \$32.6 million, respectively, during the same time period. The increases in these transactional deposit products largely reflect federal government stimulus, especially the PPP, as well as lower business investing and spending. Savings deposits were up \$32.6 million, primarily reflecting the impact of federal government stimulus programs and lower consumer investing and spending. Local time deposits decreased \$7.3 million during the first six months of 2020, primarily reflecting the maturity of certain time deposits that were not renewed as we did not aggressively seek to renew these time deposits which were opened as part of a special time deposit campaign we ran during February, March and early April of 2019, that was not fully mitigated by new time deposits from one municipal deposit customer. The reduction in out-of-area deposits during the first six months of 2020 reflects maturities during the period that were not replaced as the funds were no longer needed.

MERCANTILE BANK CORPORATION

Sweep accounts increased \$64.9 million during the first six months of 2020, totaling \$168 million as of June 30, 2020. The aggregate balance of this funding type can be subject to relatively large fluctuations given the nature of the customers utilizing this product and the sizable balances of many of the customers. The balance at June 30, 2020 was the maximum balance during the first six months of 2020, compared to an average balance of \$123 million during the period. Our sweep account program entails transferring collected funds from certain business noninterest-bearing checking accounts and savings deposits into over-night interest-bearing repurchase agreements. Such sweep accounts are not deposit accounts and are not afforded federal deposit insurance, and are accounted for as secured borrowings.

FHLBI advances increased \$40.0 million during the first six months of 2020, reflecting new advances obtained primarily to replace maturities and manage interest rate risk. As of June 30, 2020, FHLBI advances totaled \$394 million. In June 2020, we executed a blend and extend transaction with the FHLBI to extend the duration of the FHLBI advance portfolio as part our interest rate risk management program. We prepaid seven advances aggregating \$70.0 million with maturities ranging from August 2020 through October 2021 and fixed interest rates from 1.36% to 2.84% and averaging 1.97%, using the proceeds from seven new advances aggregating \$70.0 million with maturities ranging from June 2024 through June 2027 and fixed interest rates from 0.55% to 1.18% and averaging 0.84%. Prepayment fees totaling \$0.9 million were embedded into the fixed rates on the newly obtained advances, equating to 0.22% of the 0.84% average rate of the new advances. The FHLBI advances are generally collateralized by a blanket lien on our residential mortgage loan portfolio and certain commercial real estate loans. Our borrowing line of credit as of June 30, 2020 totaled \$775 million, with remaining availability of \$375 million.

Shareholders' equity was \$425 million at June 30, 2020, compared to \$417 million at December 31, 2019. The \$8.7 million increase during the first six months of 2020 primarily reflects the positive impact of net income totaling \$19.4 million, compared to the negative impact of cash dividends and common stock repurchases totaling \$9.0 million and \$6.3 million, respectively. Reflecting a decline in market interest rates, the change in net unrealized holding gain/loss on securities available for sale, net of tax effect, had a \$2.4 million positive impact on shareholders' equity during the first six months of 2020.

Liquidity

Liquidity is measured by our ability to raise funds through deposits, borrowed funds, and capital, or cash flow from the repayment of loans and securities. These funds are used to fund loans, meet deposit withdrawals, maintain reserve requirements and operate our company. Liquidity is primarily achieved through local and out-of-area deposits and liquid assets such as securities available for sale, matured and called securities, federal funds sold and interest-earning deposit balances. Asset and liability management is the process of managing our balance sheet to achieve a mix of earning assets and liabilities that maximizes profitability, while providing adequate liquidity.

To assist in providing needed funds, we have regularly obtained monies from wholesale funding sources. Wholesale funds, primarily comprised of deposits from customers outside of our market areas and advances from the FHLBI, totaled \$471 million, or 12.3% of combined deposits and borrowed funds, as of June 30, 2020, compared to \$487 million, or 15.5% of combined deposits and borrowed funds, as of December 31, 2019.

Sweep accounts increased \$64.9 million during the first six months of 2020, totaling \$168 million as of June 30, 2020. The aggregate balance of this funding type can be subject to relatively large fluctuations given the nature of the customers utilizing this product and the sizable balances of many of the customers. The balance at June 30, 2020 was the maximum balance during the first six months of 2020, compared to an average balance of \$123 million during the period. Our sweep account program entails transferring collected funds from certain business noninterest-bearing checking accounts and savings deposits into over-night interest-bearing repurchase agreements. Such sweep accounts are not deposit accounts and are not afforded federal deposit insurance, and are accounted for as secured borrowings.

MERCANTILE BANK CORPORATION

Information regarding our repurchase agreements as of June 30, 2020 and during the first six months of 2020 is as follows:

Outstanding balance at June 30, 2020	\$	167,527,000
Weighted average interest rate at June 30, 2020		0.10%
Maximum daily balance six months ended June 30, 2020	\$	167,527,000
Average daily balance for six months ended June 30, 2020	\$	123,486,000
Weighted average interest rate for six months ended June 30, 2020		0.13%

FHLBI advances increased \$40.0 million during the first six months of 2020, reflecting new advances obtained primarily to replace maturities and manage interest rate risk. As of June 30, 2020, FHLBI advances totaled \$394 million. In June 2020, we executed a blend and extend transaction with the FHLBI to extend the duration of the FHLBI advance portfolio as part our interest rate risk management program. We prepaid seven advances aggregating \$70.0 million with maturities ranging from August 2020 through October 2021 and fixed interest rates from 1.36% to 2.84% and averaging 1.97%, using the proceeds from seven new advances aggregating \$70.0 million with maturities ranging from June 2024 through June 2027 and fixed interest rates from 0.55% to 1.18% and averaging 0.84%. Prepayment fees totaling \$0.9 million were embedded into the fixed rates on the newly obtained advances, equating to 0.22% of the 0.84% average rate of the new advances. The FHLBI advances are generally collateralized by a blanket lien on our residential mortgage loan portfolio and certain commercial real estate loans. Our borrowing line of credit as of June 30, 2020 totaled \$775 million, with remaining availability of \$375 million.

We also have the ability to borrow up to \$70.0 million on a daily basis through correspondent banks using established unsecured federal funds purchased lines

of credit. We did not access the lines of credit during the first six months of 2020. Conversely, our interest-earning deposit balance with the Federal Reserve Bank of Chicago averaged \$175 million during the first six months of 2020. We also have a line of credit through the Discount Window of the Federal Reserve Bank of Chicago. Using certain municipal bonds as collateral, we could have borrowed up to \$33.3 million as of June 30, 2020. We did not utilize this line of credit during the first six months of 2020 or at any time during the previous eleven fiscal years, and do not plan to access this line of credit in future periods.

The following table reflects, as of June 30, 2020, significant fixed and determinable contractual obligations to third parties by payment date, excluding accrued interest:

	One Year or Less	One to Three Years	Three to Five Years	Over Five Years	Total
Deposits without a stated maturity	\$ 2,671,952,000	\$ 0	\$ 0	\$ 0	\$ 2,671,952,000
Time deposits	348,542,000	207,563,000	34,223,000	0	590,328,000
Short-term borrowings	167,527,000	0	0	0	167,527,000
Federal Home Loan Bank advances	0	154,000,000	160,000,000	80,000,000	394,000,000
Subordinated debentures	0	0	0	47,222,000	47,222,000
Other borrowed money	0	0	0	2,550,000	2,550,000
Property leases	658,000	1,153,000	747,000	1,221,000	3,779,000

In addition to normal loan funding and deposit flow, we must maintain liquidity to meet the demands of certain unfunded loan commitments and standby letters of credit. As of June 30, 2020, we had a total of \$1.19 billion in unfunded loan commitments and \$21.4 million in unfunded standby letters of credit. Of the total unfunded loan commitments, \$1.01 billion were commitments available as lines of credit to be drawn at any time as customers' cash needs vary, and \$176 million were for loan commitments generally expected to close and become funded within the next 12 to 18 months. We regularly monitor fluctuations in loan balances and commitment levels, and include such data in our overall liquidity management.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

We monitor our liquidity position and funding strategies on an ongoing basis, but recognize that unexpected events, changes in economic or market conditions, a reduction in earnings performance, declining capital levels or situations beyond our control could cause liquidity challenges. While we believe it is unlikely that a funding crisis of any significant degree is likely to materialize, we have developed a comprehensive contingency funding plan that provides a framework for meeting liquidity disruptions.

Capital Resources

Shareholders' equity was \$425 million at June 30, 2020, compared to \$417 million at December 31, 2019. The \$8.7 million increase during the first six months of 2020 primarily reflects the positive impact of net income totaling \$19.4 million, compared to the negative impact of cash dividends and common stock repurchases totaling \$9.0 million and \$6.3 million, respectively. Reflecting a decline in market interest rates, the change in net unrealized holding gain/loss on securities available for sale, net of tax effect, had a \$2.4 million positive impact on shareholders' equity during the first six months of 2020.

As part of a \$20 million common stock repurchase program announced in May 2019 and instituted in conjunction with the completion of our existing program that was introduced in January 2015 and later expanded in April 2016, we repurchased approximately 222,000 shares for \$6.3 million, or a weighted average all-in cost per share of \$28.25, during the first quarter of 2020. No shares were repurchased during the second quarter of 2020. During the period of January 2015 through March 2020, we repurchased approximately 1,612,000 shares for \$38.9 million, or a weighted average all-in cost per share of \$24.13, under the original and new programs on a combined basis. In March 2020, we elected to suspend stock repurchases to preserve capital for lending and other purposes while we assess the potential impacts of the Coronavirus Pandemic. We have the ability to reinstate the repurchase program as circumstances warrant. The stock buybacks have been funded from cash dividends paid to us from our bank. Additional repurchases may be made during in future periods under the authorized plan, which would also likely be funded from cash dividends paid to us from our bank.

We and our bank are subject to regulatory capital requirements administered by state and federal banking agencies. Failure to meet the various capital requirements can initiate regulatory action that could have a direct material effect on the financial statements. Under the BASEL III capital rules that became effective on January 1, 2015, there is a requirement for a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets which is in addition to the other minimum risk-based capital standards in the rule. Institutions that do not meet this required capital buffer will become subject to progressively more stringent limitations on the percentage of earnings that can be paid out in cash dividends or used for stock repurchases and on the payment of discretionary bonuses to senior executive management. The capital buffer requirement was phased in over three years beginning in 2016. The capital buffer requirement raised the minimum required common equity Tier 1 capital ratio to 7.0%, the Tier 1 capital ratio to 8.5% and the total capital ratio to 10.5% on a fully phased-in basis on January 1, 2019. We believe that, as of June 30, 2020, our bank met all capital adequacy requirements under the BASEL III capital rules on a fully phased-in basis.

As of June 30, 2020, our bank's total risk-based capital ratio was 13.5%, compared to 13.0% at December 31, 2019. Our bank's total regulatory capital increased \$11.9 million during the first six months of 2020, in large part reflecting the net impact of net income totaling \$22.3 million and cash dividends paid to us aggregating \$19.5 million. Our bank's total risk-based capital ratio was also impacted by a \$38.4 million decrease in total risk-weighted assets, primarily resulting from a reduction in commercial line of credit balances. As of June 30, 2020, our bank's total regulatory capital equaled \$437 million, or \$113 million in excess of the 10.0% minimum which is among the requirements to be categorized as "well capitalized." Our and our bank's capital ratios as of June 30, 2020 and December 31, 2019 are disclosed in Note 11 of the Notes to Consolidated Financial Statements.

MERCANTILE BANK CORPORATION

Results of Operations

We recorded net income of \$8.7 million, or \$0.54 per basic and diluted share, for the second quarter of 2020, compared to net income of \$11.7 million, or \$0.71 per basic and diluted share, for the second quarter of 2019. We recorded net income of \$19.4 million, or \$1.19 per basic and diluted share, for the first six months of 2020, compared to net income of \$23.5 million, or \$1.43 per basic and diluted share, for the first six months of 2019.

Proceeds from a bank owned life insurance claim increased net income during the second quarter of 2019 by approximately \$1.3 million, or \$0.08 per diluted share. Excluding the impact of this transaction, diluted earnings per share decreased \$0.09, or 14.3%, during the second quarter of 2020 compared to the prior-year second quarter. Proceeds from bank owned life insurance claims and a gain on the sale of a former branch facility increased net income during the first six months of 2019 by approximately \$3.1 million, or \$0.19 per diluted share. Excluding the impacts of these transactions, diluted earnings per share decreased \$0.05, or 4.0%, during the first six months of 2020 compared to the respective prior-year period.

The lower levels of net income during the second quarter and first six months of 2020 compared to the respective prior-year periods resulted from higher provision expense and noninterest expense and decreased net interest income, which more than offset increased noninterest income. The loan loss reserve build during the current-year second quarter was viewed as a precautionary measure to guard against any potential deterioration in the loan portfolio stemming from the Coronavirus Pandemic and associated weakened economic conditions. The higher levels of noninterest expense mainly reflected increased compensation, occupancy, furniture and equipment, and data processing costs, and the declines in net interest income depicted lower yields on earning assets, which more than offset growth in earning assets. The improved noninterest income primarily reflected increased mortgage banking income.

Interest income during the second quarter of 2020 was \$37.2 million, a decrease of \$2.6 million, or 6.7%, from the \$39.8 million earned during the second quarter of 2019. The decrease resulted from a lower yield on average earning assets, which more than offset the impact of growth in average earning assets. The yield on average earning assets was 3.85% during the second quarter of 2020, compared to 4.85% during the second quarter of 2019. The decreased yield on average earning assets primarily resulted from a lower yield on loans, which declined from 5.18% during the second quarter of 2019 to 4.18% during the current-year second quarter. The decrease was mainly due to a lower yield on commercial loans, which equaled 4.20% in the second quarter of 2020 compared to 5.27% in the prior-year second quarter. The lower yield primarily reflected reduced interest rates on variable-rate commercial loans resulting from the Federal Open Market Committee ("FOMC") significantly decreasing the targeted federal funds rate by 225 basis points during the second half of 2019 and first three months of 2020.

The negative impact of the decreased yield on commercial loans was partially mitigated by an improved yield on securities, which equaled 3.37% and 2.85% during the second quarters of 2020 and 2019, respectively. The increased yield on securities mainly reflected the recording of \$0.9 million in accelerated discount accretion on called U.S. Government agency bonds as interest income during the second quarter of 2020. No accelerated discount accretion was recorded during the prior-year second quarter. As part of our interest rate risk management program, U.S. Government agency bonds are periodically purchased at discounts during rising interest rate environments; if these bonds are called during decreasing interest rate environments, the remaining unaccreted discount amounts are immediately recognized as interest income.

A decreased yield on interest-earning deposits and a change in earning asset mix also contributed to the lower yield on average earning assets in the current-year second quarter compared to the respective 2019 period. The yield on interest-earning deposits was 0.15% during the second quarter of 2020, down from 2.38% during the second quarter of 2019, primarily reflecting the decreased interest rate environment. On average, lower-yielding interest-earning deposits represented 6.5% of earning assets during the second quarter of 2020, up from 2.9% during the second quarter of 2019, while higher-yielding loans represented 84.9% of earning assets during the current-year second quarter, down from 86.3% during the respective 2019 period. Average earning assets equaled \$3.88 billion during the current-year second quarter, up \$580 million, or 17.6%, from the level of \$3.30 billion during the prior-year second quarter; average loans were up \$447 million, average interest-earning deposits were up \$157 million, and average securities were down \$23.9 million.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Interest income during the first six months of 2020 was \$75.1 million, a decrease of \$3.4 million, or 4.3%, from the \$78.5 million earned during the first six months of 2019. The decrease resulted from a lower yield on average earning assets, which more than offset the impact of growth in average earning assets. The yield on average earning assets was 4.17% during the first six months of 2020, compared to 4.87% during the respective 2019 period. The decreased yield on average earning assets primarily resulted from a lower yield on loans, which declined from 5.19% during the first six months of 2019 to 4.42% during the first six months of 2020. The decrease was mainly due to a lower yield on commercial loans, which equaled 4.46% in the first six months of 2020 compared to 5.30% in the respective 2019 period. The lower yield primarily reflected reduced interest rates on variable-rate commercial loans stemming from the previously-mentioned FOMC rate reductions.

The negative impact of the decreased yield on commercial loans was partially mitigated by an improved yield on securities, which equaled 4.06% and 2.83% during the first six months of 2020 and 2019, respectively. The increased yield on securities mainly reflected the recording of \$2.7 million in accelerated discount accretion on called U.S. Government agency bonds as interest income during the first six months of 2020. No accelerated discount accretion was recorded during the respective 2019 period.

A change in earning asset mix and a decreased yield on interest-earning deposits also contributed to the lower yield on average earning assets during the first six months of 2020 compared to the first six months of 2019. The yield on interest-earning deposits was 0.55% during the first six months of 2020, down from 2.42% during the respective 2019 period, mainly reflecting the decreased interest rate environment. On average, lower-yielding interest-earning deposits represented 5.6% of earning assets during the first six months of 2020, up from 2.5% during the first six months of 2019, while higher-yielding loans represented 85.0% of earning assets during the first six months of 2020, down from 86.6% during the respective 2019 period. Average earning assets equaled \$3.62 billion during the first six months of 2020, up \$365 million, or 11.2%, from the level of \$3.26 billion during the first six months of 2019; average loans were up \$260 million, average interest-earning deposits were up \$121 million, and average securities were down \$16.7 million.

Interest expense during the second quarter of 2020 was \$6.6 million, a decrease of \$2.1 million, or 24.2%, from the \$8.7 million expensed during the second quarter of 2019. The decrease in interest expense is attributable to a lower weighted average cost of interest-bearing liabilities, which equaled 1.11% in the current-year second quarter compared to 1.55% in the prior-year second quarter. The decrease in the weighted average cost of interest-bearing liabilities mainly reflected

lower costs of non-time deposit accounts, borrowed funds, and time deposits. The cost of interest-bearing non-time deposit accounts decreased from 0.65% during the second quarter of 2019 to 0.23% during the second quarter of 2020, primarily reflecting lower interest rates paid on money market accounts; the reduced interest rates mainly reflect the decreasing interest rate environment. The cost of borrowed funds decreased from 2.40% during the second quarter of 2019 to 1.91% during the current-year second quarter, mainly reflecting a change in borrowing mix and lower costs of subordinated debentures and FHLBI advances. Average lower-cost sweep accounts represented 23.7% and 20.2% of average total borrowings during the second quarters of 2020 and 2019, respectively, while average higher-cost FHLBI advances represented 64.9% and 70.5% of average total borrowings during the current-year second quarter and prior-year second quarter, respectively. The cost of subordinated debentures was 5.10% during the second quarter of 2020, down from 6.94% during the respective 2019 period due to decreases in the 90-Day Libor Rate. The cost of time deposits declined from 2.31% during the second quarter of 2019 to 2.04% during the current-year second quarter due to the lower interest rate environment and a change in composition, primarily reflecting a decrease in higher-cost brokered funds. A change in funding mix, consisting of an increase in average lower-cost interest-bearing non-time deposits and a decrease in average higher-cost time deposits as a percentage of average total interest-bearing liabilities, also contributed to the lower weighted average cost of interest-bearing liabilities during the second quarter of 2020 compared to the respective 2019 period. Average interest-bearing liabilities were \$2.38 billion during the second quarter of 2020, up \$125 million, or 5.5%, from the \$2.25 billion average during the second quarter of 2019.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Interest expense during the first six months of 2020 was \$14.2 million, a decrease of \$2.5 million, or 14.9%, from the \$16.7 million expensed during the first six months of 2019. The decrease in interest expense is attributable to a lower weighted average cost of interest-bearing liabilities, which equaled 1.23% in the first six months of 2020 compared to 1.51% in the respective 2019 period. The decrease in the weighted average cost of interest-bearing liabilities primarily reflected lower costs of non-time deposit accounts, borrowed funds, and time deposits. The cost of interest-bearing non-time deposit accounts decreased from 0.65% during the first six months of 2019 to 0.34% during the first six months of 2020, primarily reflecting lower interest rates paid on money market accounts; the reduced interest rates mainly reflect the decreasing interest rate environment. The cost of borrowed funds decreased from 2.41% during the first six months of 2019 to 2.09% during the respective 2020 period, mainly reflecting a lower cost of subordinated debentures and change in borrowing mix. The cost of subordinated debentures was 5.50% during the first six months of 2020, down from 7.02% during the respective 2019 period due to decreases in the 90-Day Libor Rate. Average lower-cost sweep accounts represented 21.9% and 19.4% of average total borrowings during the first six months of 2020 and 2019, respectively, while average higher-cost FHLBI advances represented 67.5% and 70.8% of average total borrowings during the respective time periods. The cost of time deposits declined from 2.24% during the first six months of 2019 to 2.13% during the respective 2020 period due to the lower interest rate environment and a change in composition, mainly reflecting a decrease in higher-cost brokered funds. A change in funding mix, consisting of an increase in average lower-cost interest-bearing non-time deposits and a decrease in average higher-cost time deposits as a percentage of average total interest-bearing liabilities, also contributed to the lower weighted average cost of interest-bearing liabilities during the first six months of 2020 compared to the first six months of 2019. Average interest-bearing liabilities were \$2.31 billion during the first six months of 2020, up \$82.6 million, or 3.7%, from the \$2.23 billion average during the respective 2019 period.

Net interest income during the second quarter of 2020 was \$30.6 million, a decrease of \$0.5 million, or 1.8%, from the \$31.1 million earned during the second quarter of 2019. The decline in net interest income resulted from a decreased net interest margin, which more than offset the positive impact of an increase in average earning assets. The net interest margin decreased from 3.79% in the second quarter of 2019 to 3.17% in the current-year second quarter due to a lower yield on average earning assets, which more than offset a reduction in the cost of funds. The decreased yield on average earning assets primarily reflected lower interest rates on variable-rate commercial loans stemming from the aforementioned FOMC rate cuts, while the decreased cost of funds mainly reflected lower costs of non-time deposit accounts, borrowed funds, and time deposits. As previously mentioned, the recording of accelerated discount accretion on called U.S. Government agency bonds partially mitigated the negative impact of the decreased yield on commercial loans on the yield on average earning assets during the second quarter of 2020. The accelerated discount accretion recorded during the second quarter of 2020 positively impacted the net interest margin by ten basis points.

Net interest income during the first six months of 2020 was \$60.9 million, a decrease of \$0.9 million, or 1.4%, from the \$61.8 million earned during the first six months of 2019. The decrease in net interest income resulted from a lower net interest margin, which more than offset the positive impact of an increase in average earning assets. The net interest margin decreased from 3.83% in the first six months of 2019 to 3.38% in the respective 2020 period due to a lower yield on average earning assets, which more than offset a reduction in the cost of funds. The decreased yield on average earning assets primarily reflected lower interest rates on variable-rate commercial loans stemming from the previously-mentioned FOMC rate cuts, while the decreased cost of funds mainly reflected lower costs of non-time deposit accounts, borrowed funds, and time deposits. As previously mentioned, the recording of accelerated discount accretion on called U.S. Government agency bonds partially mitigated the negative impact of the decreased yield on commercial loans on the yield on average earning assets during the first six months of 2020. The accelerated discount accretion recorded during the first six months of 2020 positively impacted the net interest margin by 15 basis points.

The following tables set forth certain information relating to our consolidated average interest-earning assets and interest-bearing liabilities and reflect the average yield on assets and average cost of liabilities for the second quarters and first six months of 2020 and 2019. Such yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the period presented. Tax-exempt securities interest income and yield for the second quarters and first six months of 2020 and 2019 have been computed on a tax equivalent basis using a marginal tax rate of 21.0%. Securities interest income was increased by \$60,000 in the second quarter of both 2020 and 2019 and \$120,000 in the first six months of both 2020 and 2019 for this non-GAAP, but industry standard, adjustment. These adjustments equated to one basis point increases in our net interest margin for each of the 2020 and 2019 periods.

A loan loss provision expense of \$7.6 million was recorded during the second quarter of 2020, compared to \$0.9 million during the second quarter of 2019. A loan loss provision expense of \$8.4 million was recorded during the first six months of 2020, compared to \$1.8 million during the first six months of 2019. The provision expense recorded during the 2020 periods primarily reflected an allocation associated with a newly-created Coronavirus Pandemic environmental factor ("COVID-19 factor") and an increased allocation related to the existing economic conditions environmental factor. The COVID-19 factor was added to address the unique challenges and economic uncertainty resulting from the pandemic and its potential impact on the collectability of the loan portfolio. The provision expense recorded during the 2019 periods mainly reflected ongoing net loan growth.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

During the second quarter of 2020, loan charge-offs totaled \$0.3 million, while recoveries of prior period loan charge-offs equaled \$0.1 million, providing for net loan charge-offs of \$0.2 million, or an annualized 0.02% of average total loans. During the second quarter of 2019, loan charge-offs and recoveries of prior period loan charge-offs were both less than \$0.1 million, providing for a nominal net loan recovery. During the first six months of 2020, loan charge-offs and recoveries of prior period loan charge-offs both approximated \$0.4 million, providing for a nominal net loan recovery. During the first six months of 2019, loan charge-offs totaled \$0.3 million, while recoveries of prior period loan charge-offs equaled \$0.2 million, providing for net loan charge-offs of \$0.1 million, or an annualized 0.01% of average total loans. The allowance for loans, as a percentage of total loans, was 1.0% as of June 30, 2020, and 0.9% as of December 31, 2019, and June 30, 2019. Excluding PPP loans, the allowance for loans represented 1.2% of total loans as of June 30, 2020.

Noninterest income during the second quarter of 2020 was \$11.0 million, compared to \$6.3 million during the prior-year second quarter. Noninterest income during the second quarter of 2019 included a bank owned life insurance claim of \$1.3 million. Excluding the impact of this transaction, noninterest income increased \$5.9 million, or nearly 118%, during the current-year second quarter compared to the respective 2019 period. Noninterest income during the first six months of 2020 was \$17.5 million, compared to \$13.0 million during the same time period in 2019. Noninterest income during the first six months of 2019 included bank owned life insurance claims aggregating \$2.6 million and a gain on the sale of a former branch facility of \$0.6 million. Excluding the impacts of these transactions, noninterest income increased \$7.7 million, or 79.2%, in the first six months of 2020 compared to the respective 2019 period. The higher level of noninterest income in both 2020 periods primarily reflected increased mortgage banking income. The improved mortgage banking income mainly reflected a significant increase in refinancing activity spurred by a decrease in residential mortgage loan interest rates, the continuing success of strategic initiatives that were implemented to increase market share, and an increase in the percentage of originated loans being sold. Service charges on accounts declined in the current-year second quarter compared to the prior-year second quarter, primarily reflecting reduced transaction volume in business accounts, and credit and debit card income was down in both 2020 periods compared to the respective 2019 periods, mainly depicting lower card usage. Both of these revenue streams were negatively impacted by Coronavirus Pandemic-related events, including business shutdowns and stay-at-home orders.

Noninterest expense totaled \$23.2 million during the second quarter of 2020, up \$1.1 million, or 5.1%, from the prior-year second quarter. Noninterest expense during the first six months of 2020 was \$46.1 million, an increase of \$2.2 million, or 5.1%, from the \$43.9 million expensed during the first six months of 2019. The higher level of expense in both periods primarily resulted from increased compensation costs, mainly reflecting higher residential mortgage loan originator commissions and associated incentives. Higher occupancy and furniture costs, mainly reflecting increased depreciation expense associated with an expansion of our main office, and data processing costs, primarily depicting growth in transaction volume and new product offerings, also contributed to the increased level of noninterest expense during both periods. As part of a branch network efficiency plan, we announced in June 2020 that we are planning on closing three branches during the fourth quarter of 2020. As a result of these branch network efficiency actions, we recorded a pre-tax charge of approximately \$0.3 million during the second quarter of 2020 for severance-related payments and expect to record approximately \$1.5 million in valuation adjustment costs on the branch facilities during the fourth quarter of 2020. Annual pre-tax savings of approximately \$0.7 million are anticipated as a result of these actions.

During the second quarter of 2020, we recorded income before federal income tax of \$10.7 million and a federal income tax expense of \$2.0 million. During the second quarter of 2019, we recorded income before federal income tax of \$14.5 million and a federal income tax expense of \$2.8 million. During the first six months of 2020, we recorded income before federal income tax of \$23.9 million and a federal income tax expense of \$4.5 million. During the first six months of 2019, we recorded income before federal income tax of \$29.0 million and a federal income tax expense of \$5.5 million. The decreased federal income tax expense in both 2020 periods resulted from lower levels of income before federal income tax. Our effective tax rate was 19.0% during both the second quarter and first six months of 2020 and the respective 2019 periods.

[Table of Contents](#)

MERCANTILE BANK CORPORATION

Our primary market risk exposure is interest rate risk and, to a lesser extent, liquidity risk. All of our transactions are denominated in U.S. dollars with no specific foreign exchange exposure. We have only limited agricultural-related loan assets and therefore have no significant exposure to changes in commodity prices. Any impact that changes in foreign exchange rates and commodity prices would have on interest rates is assumed to be insignificant. Interest rate risk is the exposure of our financial condition to adverse movements in interest rates. We derive our income primarily from the excess of interest collected on our interest-earning assets over the interest paid on our interest-bearing liabilities. The rates of interest we earn on our assets and owe on our liabilities generally are established contractually for a period of time. Since market interest rates change over time, we are exposed to lower profitability if we cannot adapt to interest rate changes. Accepting interest rate risk can be an important source of profitability and shareholder value; however, excessive levels of interest rate risk could pose a significant threat to our earnings and capital base. Accordingly, effective risk management that maintains interest rate risk at prudent levels is essential to our safety and soundness.

Evaluating the exposure to changes in interest rates includes assessing both the adequacy of the process used to control interest rate risk and the quantitative level of exposure. Our interest rate risk management process seeks to ensure that appropriate policies, procedures, management information systems and internal control procedures are in place to maintain interest rate risk at prudent levels with consistency and continuity. In evaluating the quantitative level of interest rate risk, we assess the existing and potential future effects of changes in interest rates on our financial condition, including capital adequacy, earnings, liquidity and asset quality.

We use two interest rate risk measurement techniques. The first, which is commonly referred to as GAP analysis, measures the difference between the dollar amounts of interest sensitive assets and liabilities that will be refinanced or repriced during a given time period. A significant repricing gap could result in a negative impact to our net interest margin during periods of changing market interest rates.

Total liabilities & shareholders' equity	1,533,920,000	258,253,000	555,785,000	80,000,000	\$ 4,314,379,000
Net asset (liability) GAP	\$ (527,529,000)	\$ (24,652,000)	\$ 1,424,989,000	\$ 744,664,000	
Cumulative GAP	\$ (527,529,000)	\$ (552,181,000)	\$ 872,808,000	\$ 1,617,472,000	
Percent of cumulative GAP to total assets	(12.2%)	(12.8%)	20.2%	37.5%	

(1) Floating rate loans that are currently at interest rate floors are treated as fixed rate loans and are reflected using maturity date and not repricing frequency.

(2) Mortgage-backed securities are categorized by average life calculations based upon prepayment trends as of June 30, 2020.

The second interest rate risk measurement we use is commonly referred to as net interest income simulation analysis. We believe that this methodology provides a more accurate measurement of interest rate risk than the GAP analysis, and therefore, it serves as our primary interest rate risk measurement technique. The simulation model assesses the direction and magnitude of variations in net interest income resulting from potential changes in market interest rates.

MERCANTILE BANK CORPORATION

Key assumptions in the model include prepayment speeds on various loan and investment assets; cash flows and maturities of interest sensitive assets and liabilities; and changes in market conditions impacting loan and deposit volume and pricing. These assumptions are inherently uncertain, subject to fluctuation and revision in a dynamic environment; therefore, the model cannot precisely estimate net interest income or exactly predict the impact of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes and changes in market conditions and our strategies, among other factors.

We conducted multiple simulations as of June 30, 2020, in which it was assumed that changes in market interest rates occurred ranging from up 300 basis points to down 100 basis points in equal quarterly instalments over the next twelve months. The following table reflects the suggested dollar and percentage changes in net interest income over the next twelve months in comparison to the \$121 million in net interest income projected using our balance sheet amounts and anticipated replacement rates as of June 30, 2020. The resulting estimates are generally within our policy parameters established to manage and monitor interest rate risk.

Interest Rate Scenario	Dollar Change In Net Interest Income	Percent Change In Net Interest Income
Interest rates down 100 basis points	\$ (710,000)	(0.6%)
Interest rates up 100 basis points	4,940,000	4.1
Interest rates up 200 basis points	9,440,000	7.8
Interest rates up 300 basis points	13,880,000	11.5

The resulting estimates have been significantly impacted by the current interest rate and economic environments, as adjustments have been made to critical model inputs with regards to traditional interest rate relationships. This is especially important as it relates to floating rate commercial loans, which comprise a sizable portion of our balance sheet.

In addition to changes in interest rates, the level of future net interest income is also dependent on a number of other variables, including: the growth, composition and absolute levels of loans, deposits, and other earning assets and interest-bearing liabilities; level of nonperforming assets; economic and competitive conditions; potential changes in lending, investing, and deposit gathering strategies; client preferences; and other factors.

Item 4. Controls and Procedures

As of June 30, 2020, an evaluation was performed under the supervision of and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective as of June 30, 2020.

There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2020 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

MERCANTILE BANK CORPORATION

PART II – OTHER INFORMATION**Item 1. Legal Proceedings.**

From time to time, we may be involved in various legal proceedings that are incidental to our business. In our opinion, we are not a party to any current legal proceedings that are material to our financial condition, either individually or in the aggregate.

Item 1A. Risk Factors.

There have been no material changes in our risk factors from those previously disclosed in our annual report on Form 10-K for the year ended December 31, 2019 and our March 31, 2020 Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

We made no unregistered sales of equity securities during the quarter ended June 30, 2020.

Issuer Purchases of Equity Securities

On May 7, 2019, we announced that our Board of Directors had authorized a program to repurchase up to \$20.0 million of our common stock from time to time in open market transactions at prevailing market prices or by other means in accordance with applicable regulations. This stock repurchase plan was instituted in conjunction with the completion of our existing repurchase program that was introduced in January 2015 and later expanded in April 2016. As reflected in the table below, no shares were repurchased during the second quarter of 2020. In light of the significant disruption caused by the Coronavirus Pandemic and the evolving nature of its impact on our business and the broader economy, we elected to temporarily cease stock repurchases beginning in late March 2020 in order to preserve capital for lending and other purposes. We have the ability to reinstate the buyback program as circumstances warrant.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares or Approximate Dollar Value that May Yet Be Purchased Under the Plans or Programs

Section 2: EX-31 (EXHIBIT 31)

EXHIBIT 31 RULE 13a-14(a) CERTIFICATIONS

I, Robert B. Kaminski, Jr., President and Chief Executive Officer of Mercantile Bank Corporation, certify that:

1. I have reviewed this report on Form 10-Q of Mercantile Bank Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: August 7, 2020

/s/ Robert B. Kaminski, Jr.
Robert B. Kaminski, Jr.
President and Chief Executive Officer

I, Charles E. Christmas, Executive Vice President, Chief Financial Officer and Treasurer of Mercantile Bank Corporation, certify that:

1. I have reviewed this report on Form 10-Q of Mercantile Bank Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Section 3: EX-32.1 (EXHIBIT 32.1)

EXHIBIT 32.1

CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

This certification is provided pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. § 1350, and accompanies the quarterly report on Form 10-Q for the quarter ended June 30, 2020 (the "Form 10-Q") of Mercantile Bank Corporation (the "Issuer").

I, Robert B. Kaminski, Jr., President and Chief Executive Officer of the Issuer, certify that to my knowledge:

- (i) the Form 10-Q fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934; and
- (ii) the information contained in the Form 10-Q fairly presents, in all material respects, the financial condition and results of operations of the Issuer.

Dated: August 7, 2020

Section 4: EX-32.2 (EXHIBIT 32.2)

EXHIBIT 32.2

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

This certification is provided pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. § 1350, and accompanies the quarterly report on Form 10-Q for the quarter ended June 30, 2020 (the "Form 10-Q") of Mercantile Bank Corporation (the "Issuer").

I, Charles E. Christmas, Executive Vice President, Chief Financial Officer and Treasurer of the Issuer, certify that to my knowledge:

- (i) the Form 10-Q fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934; and
- (ii) the information contained in the Form 10-Q fairly presents, in all material respects, the financial condition and results of operations of the Issuer.
